This image shows a sheet of graph paper. The grid consists of small, uniform squares. On the left side, there is a vertical margin, approximately one-tenth of the total width, which contains faint, illegible text or markings. The rest of the page is a continuous field of grid lines.

This image shows a full page of a blank grid, typical of a ledger or account book. The grid consists of approximately 30 columns and 40 rows. The first column on the left is significantly narrower than the others, serving as a margin for text or descriptions. The remaining columns are of uniform width, designed for numerical entries. The grid is completely empty, with no data or text present.

This table is a large grid with approximately 30 columns and 40 rows. The leftmost column contains vertical text, likely serving as a header or index. The grid is mostly empty, with some faint text and numbers scattered across it. The text is too small to read accurately but appears to be organized into sections.

A large grid structure, possibly a spreadsheet or data table, with numerous columns and rows. The grid is composed of thin black lines forming a uniform pattern of squares. There are some thicker lines indicating column boundaries, particularly a vertical one near the left edge and another near the right edge. The grid is mostly empty, with only a few faint marks or small dark spots visible within the cells.

This image shows a page from a ledger or account book. The page is filled with a grid of empty cells. The grid is composed of 10 columns and 50 rows. The columns are of varying widths, with the first column being the narrowest and the last column being the widest. The rows are of varying heights, with the first row being the tallest and the last row being the shortest. The grid is intended for recording financial transactions.

This image shows a large grid of empty cells, likely a data entry table or a ledger. The grid is composed of many small squares arranged in approximately 25 columns and 30 rows. The grid is mostly empty, with a few faint lines and markings. The leftmost column is slightly narrower than the others, suggesting it might be intended for labels or a date column. The overall appearance is that of a blank sheet of graph paper or a template for a data table.

The image shows a sheet of graph paper. On the left side, there is a vertical margin consisting of several narrow columns. The rest of the page is filled with a dense grid of small squares. The grid is mostly empty, with a few faint, thin lines forming a single continuous curve that starts near the top left and ends near the bottom right, passing through several squares. The rest of the grid is blank.

Large grid table with multiple columns and rows, likely a ledger or data table.

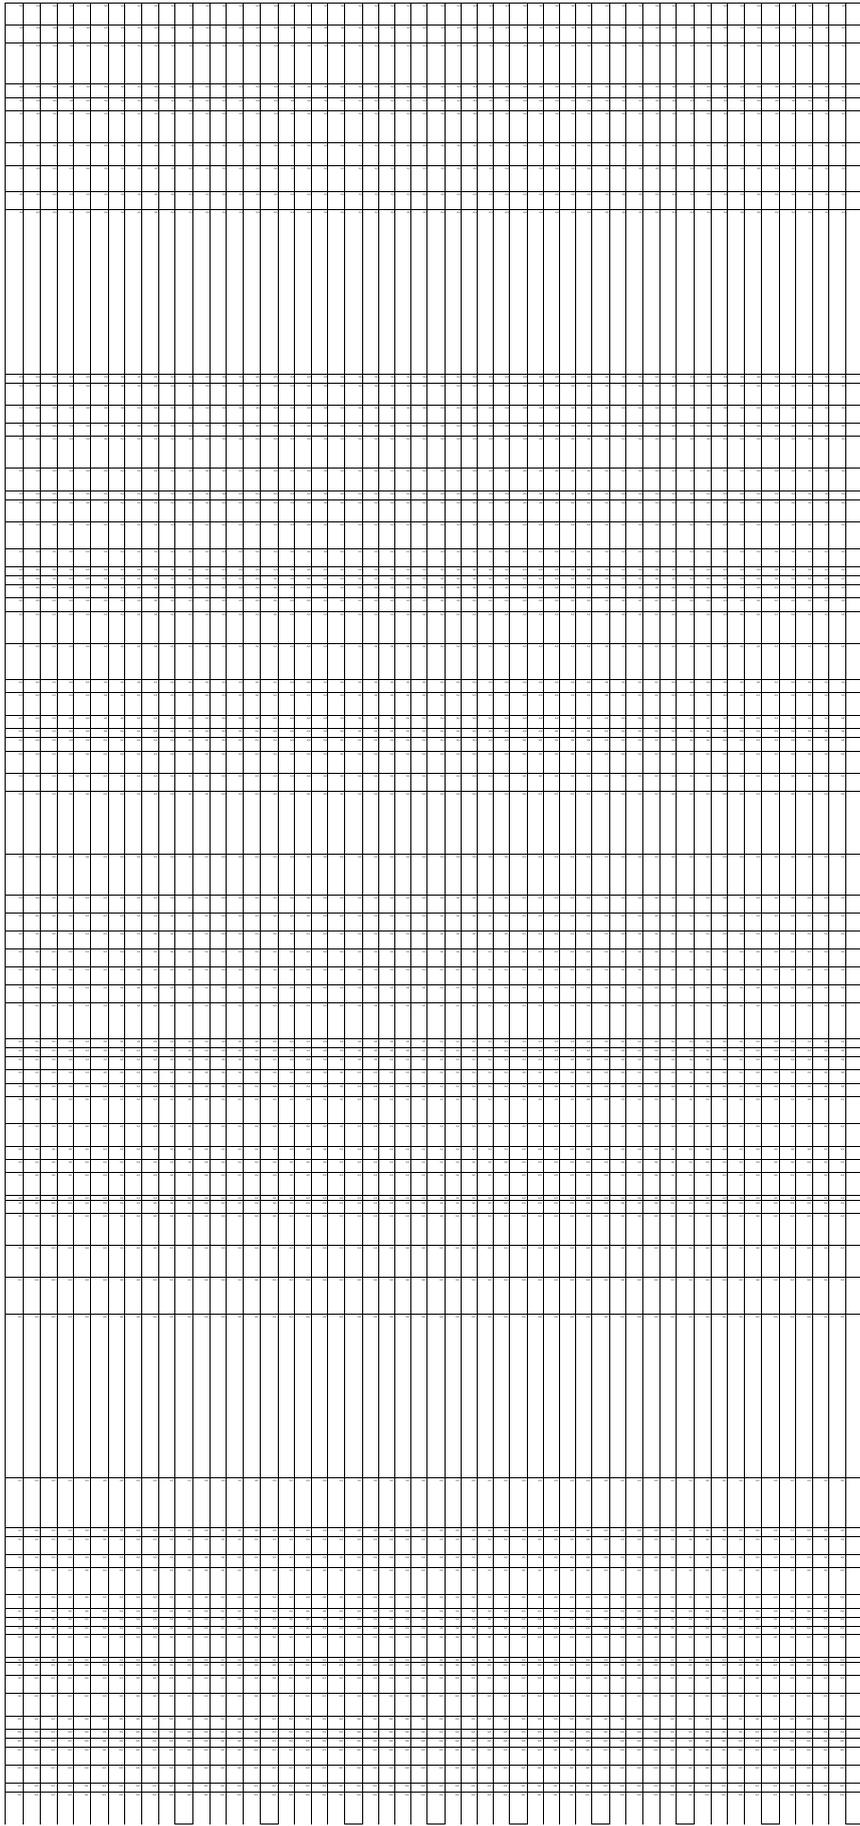

This image shows a sheet of graph paper. It features a grid of small squares. A vertical margin is present on the left side of the page, consisting of a column of smaller squares. The rest of the page is filled with a uniform grid of larger squares. The grid is empty and ready for use.

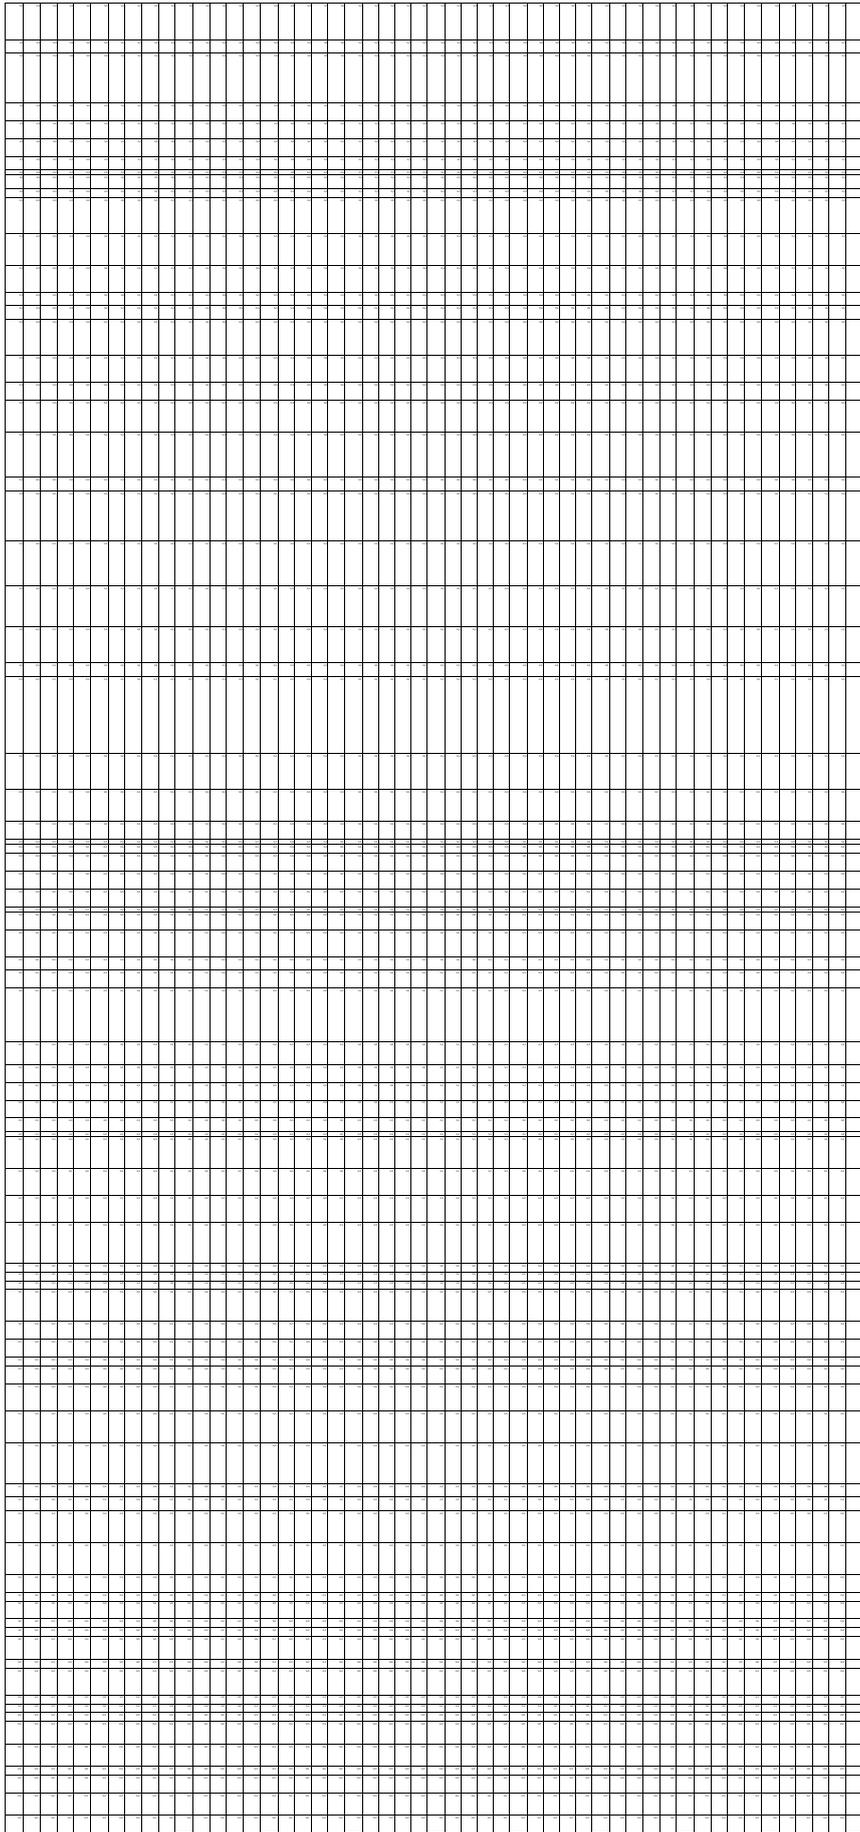

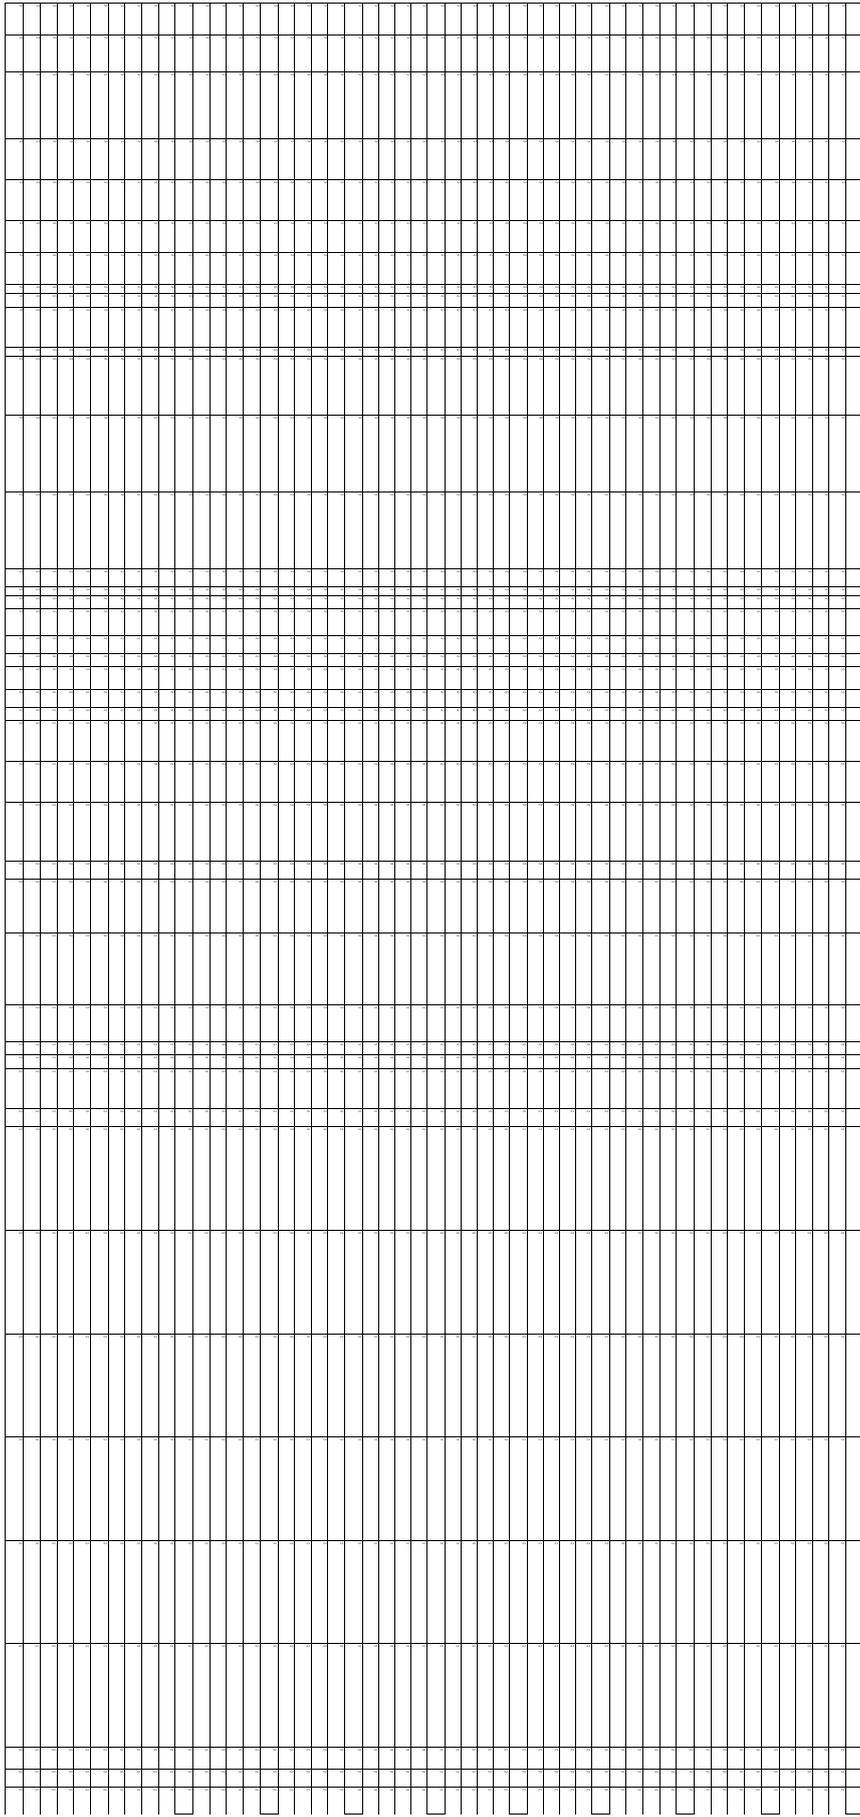

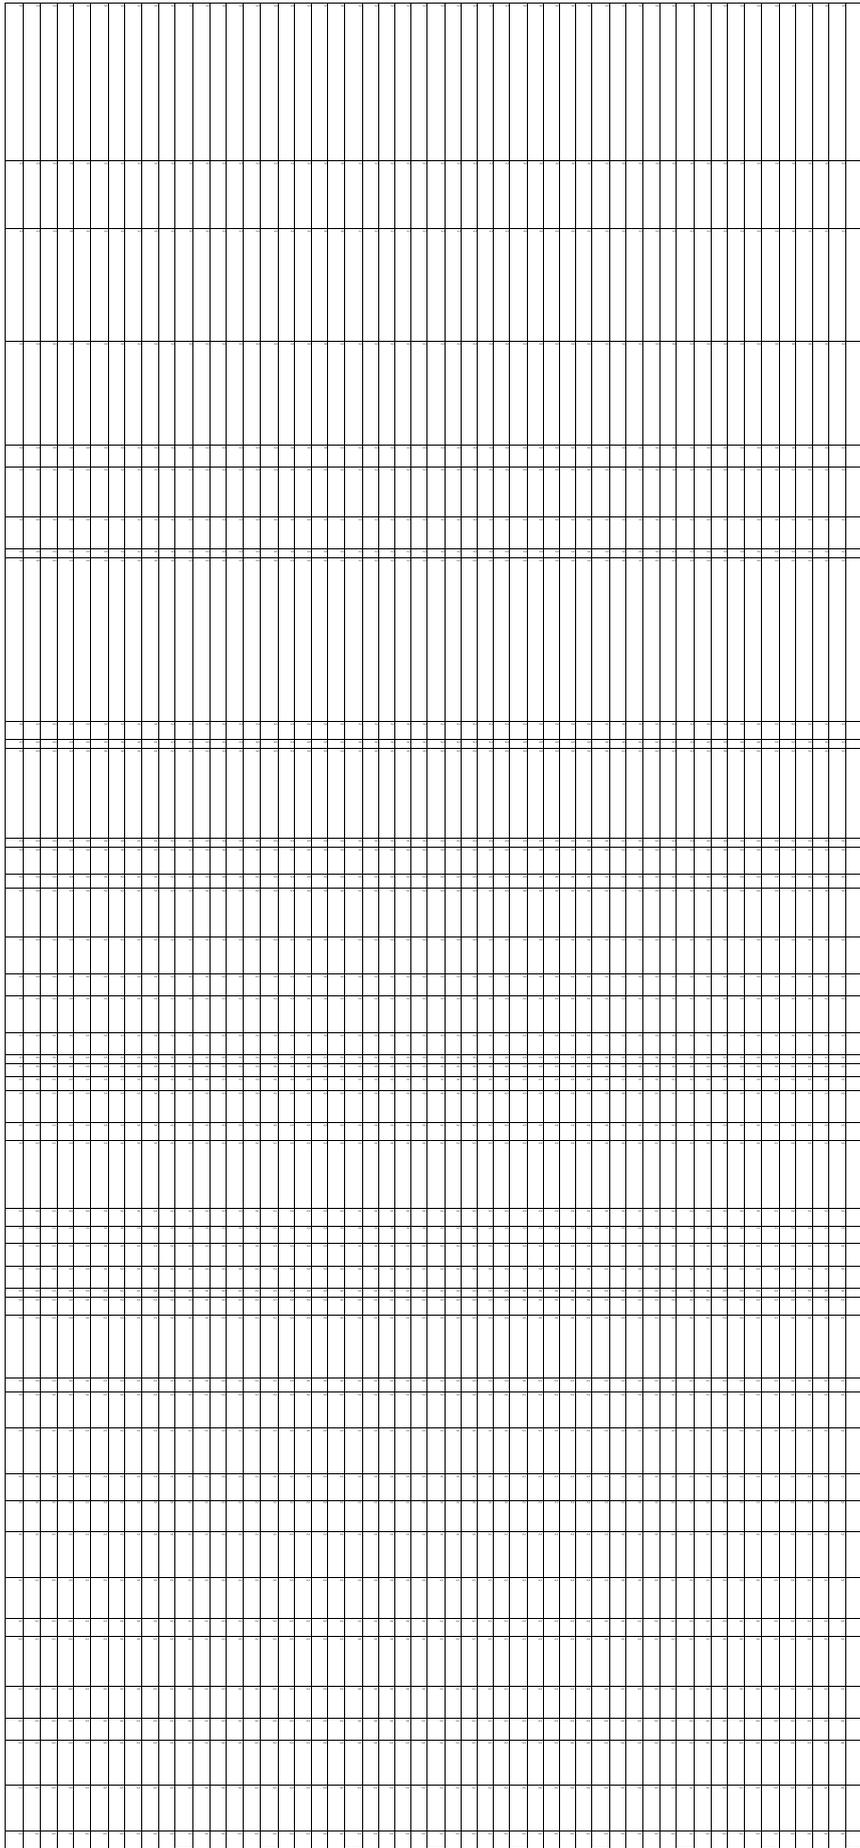

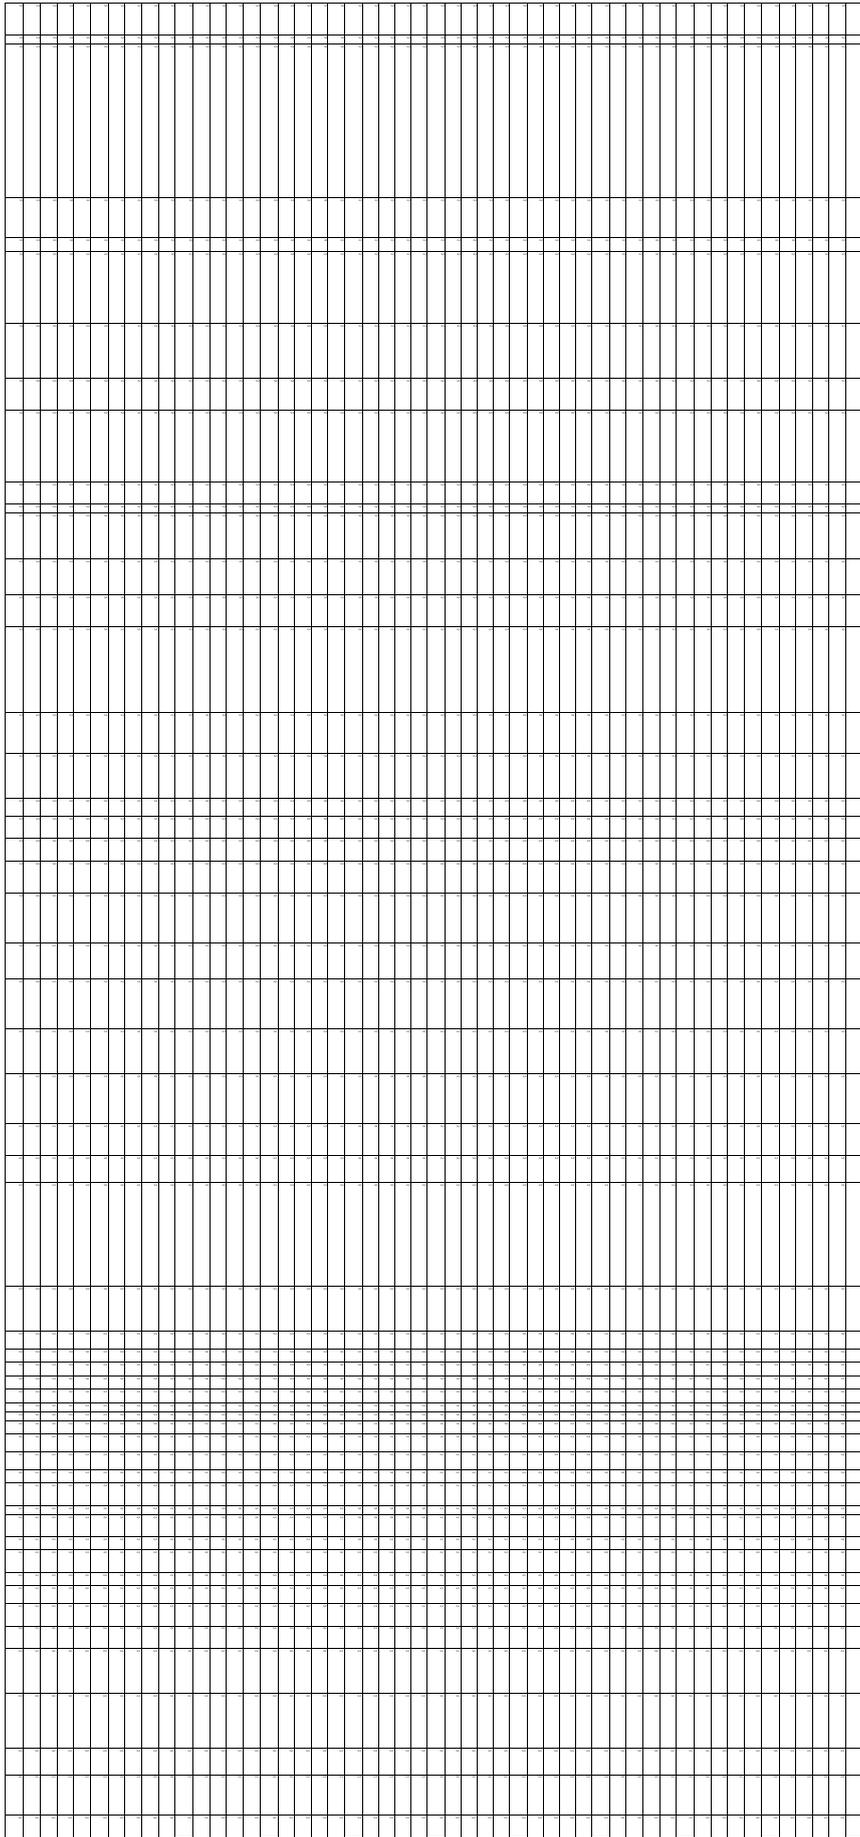

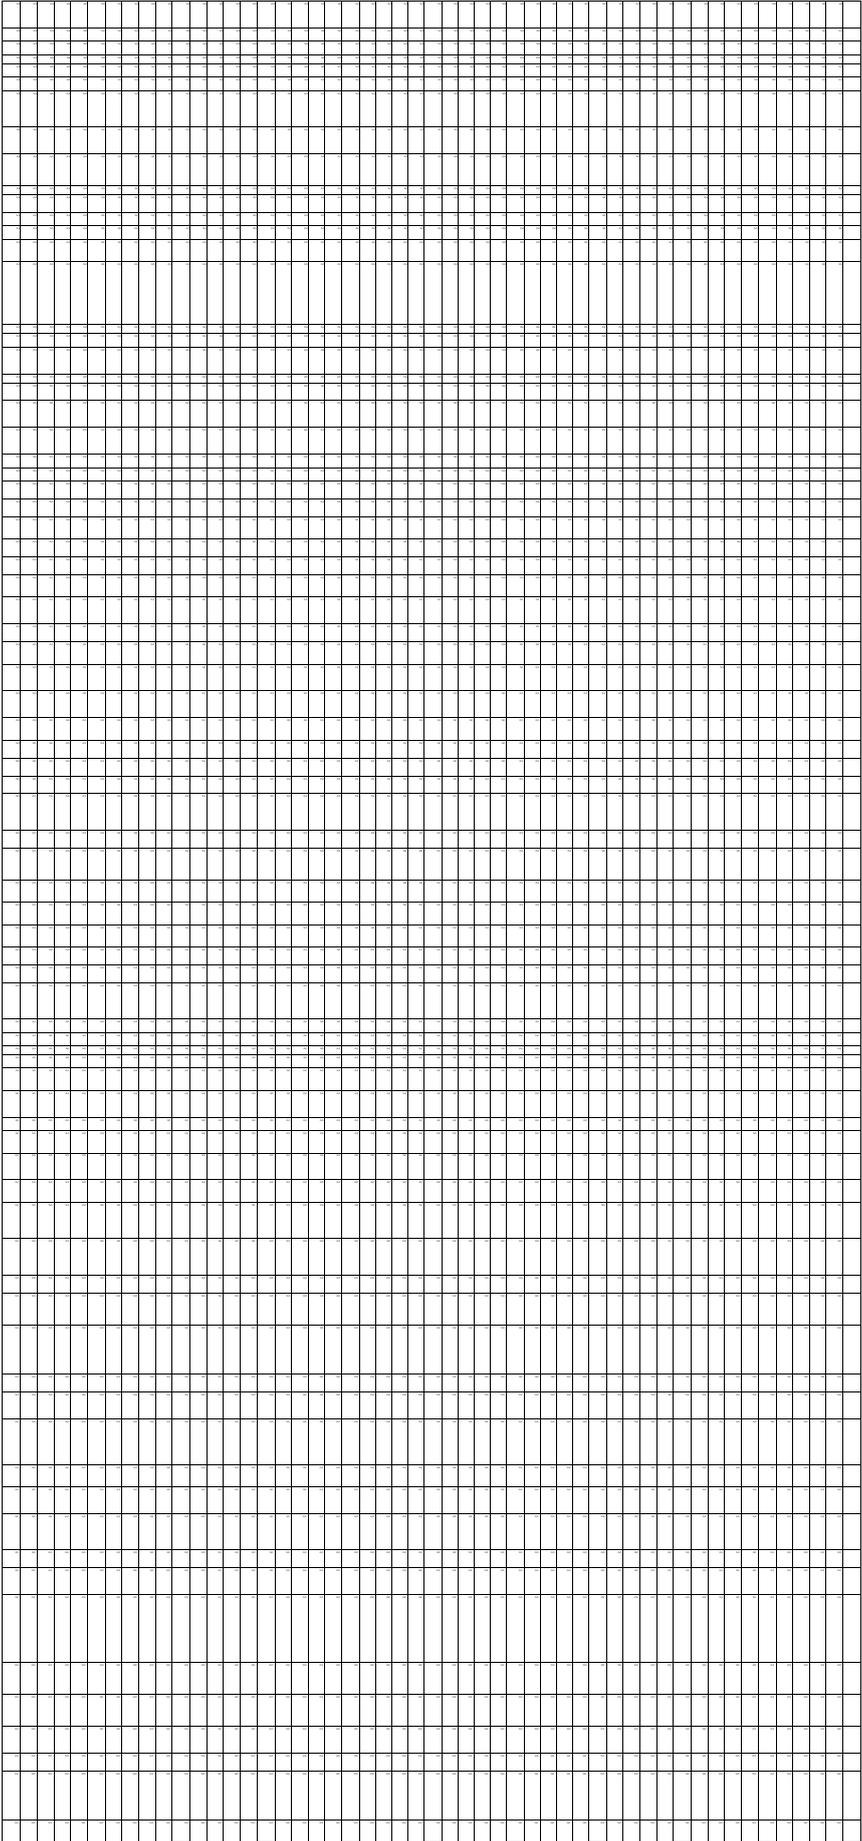

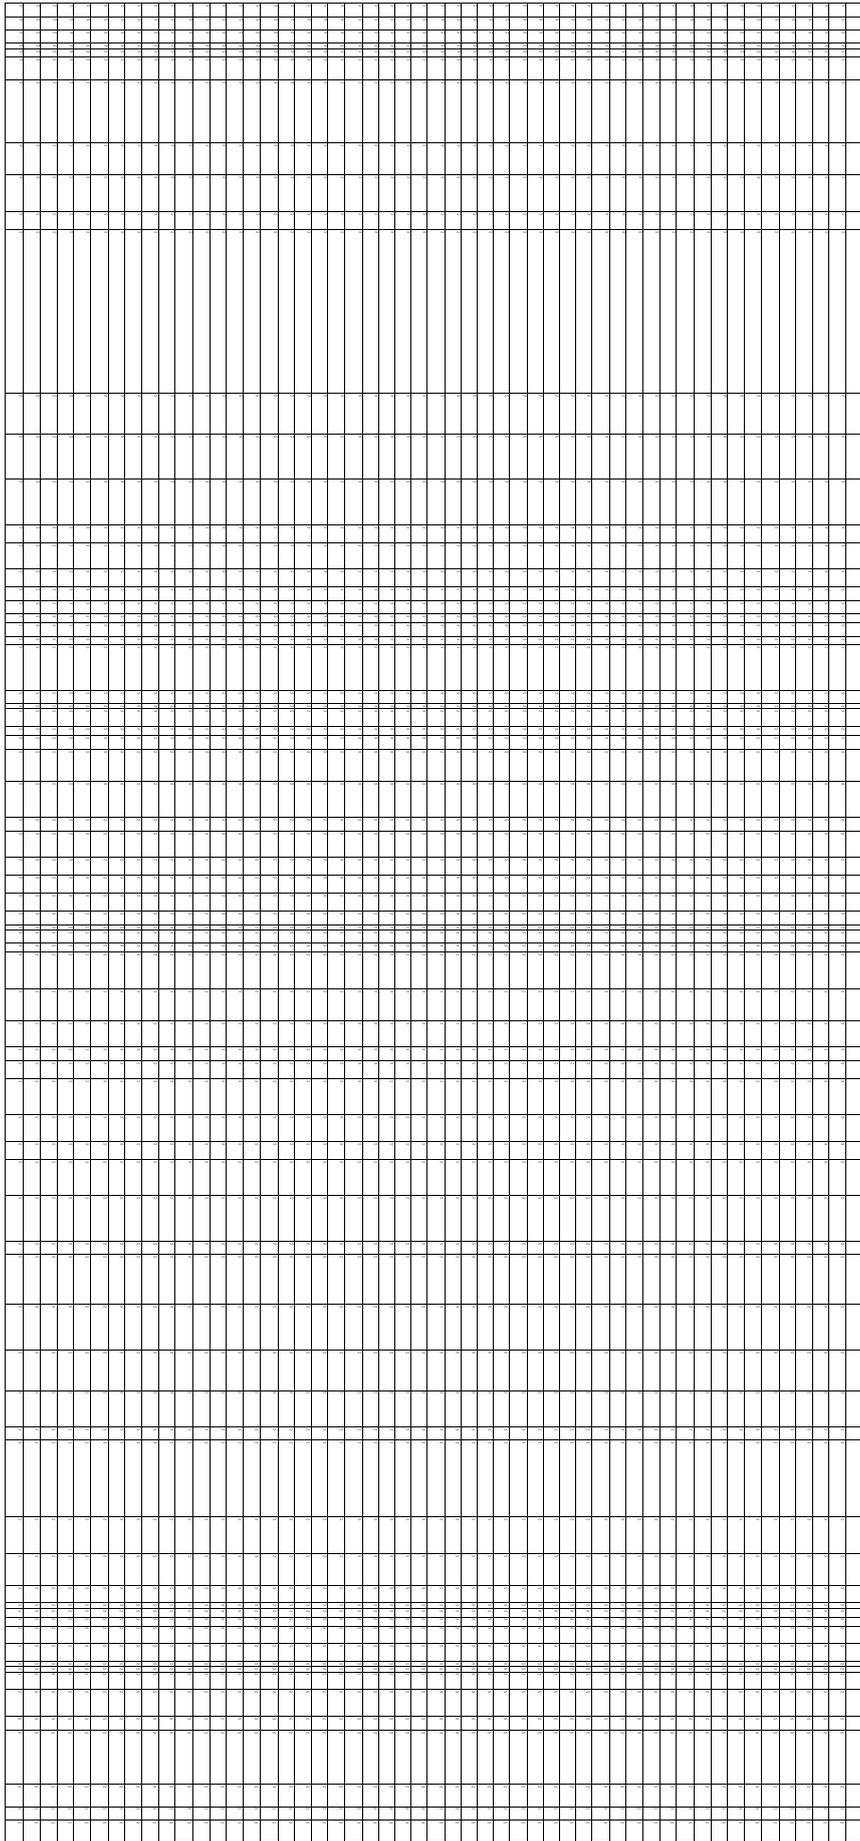

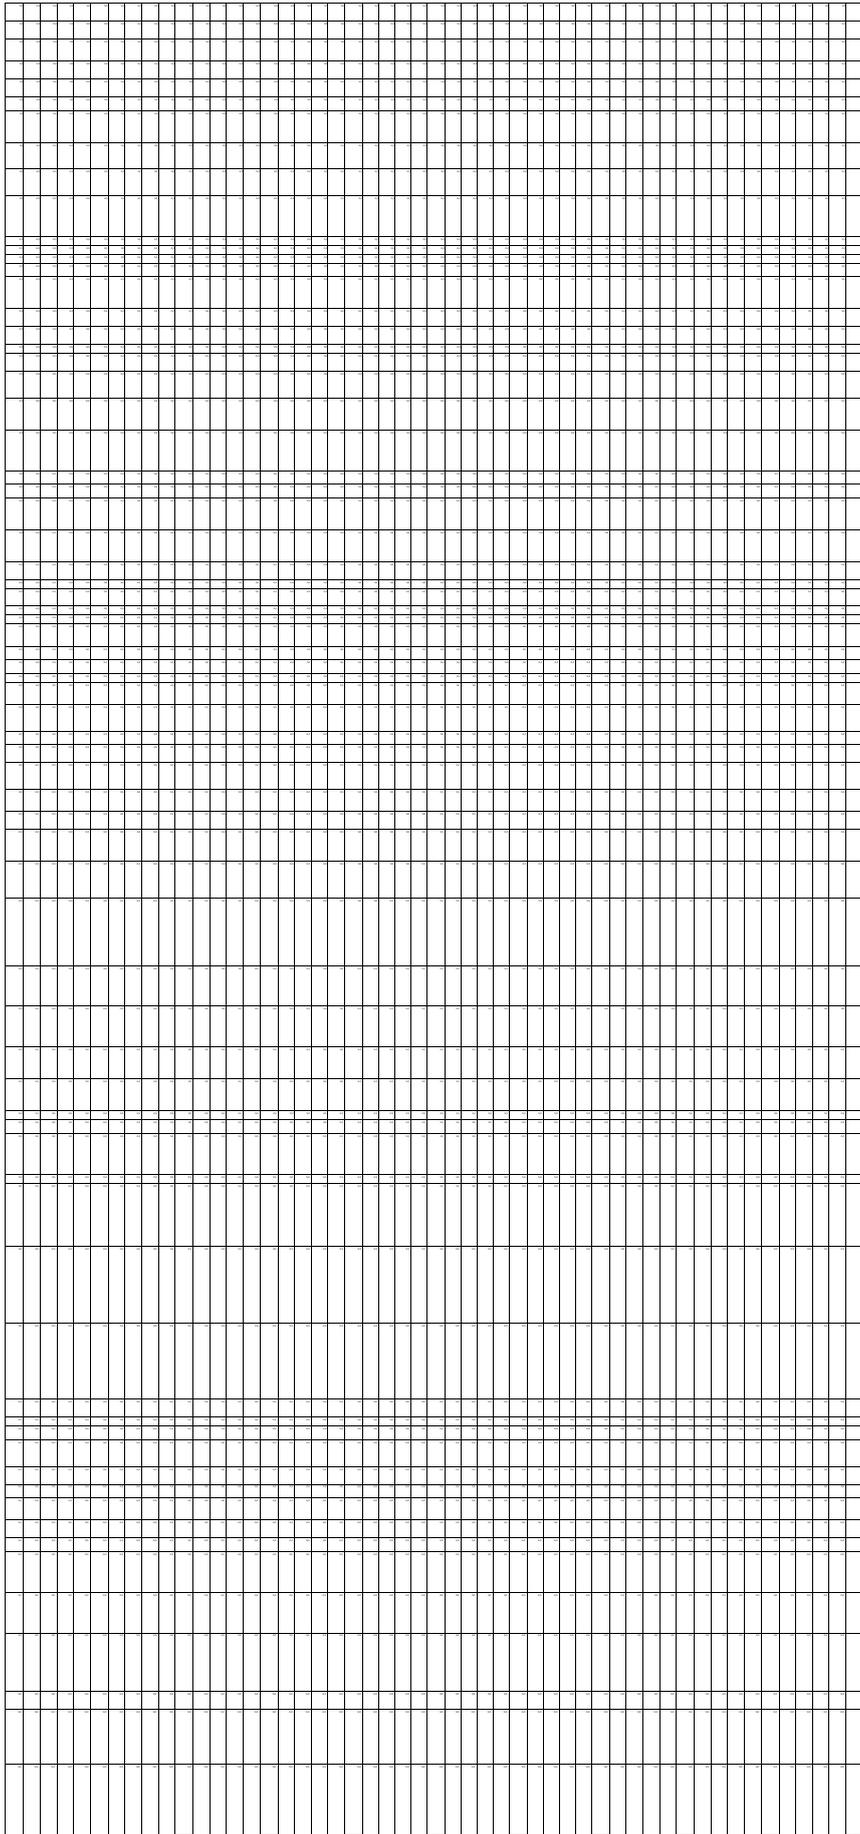

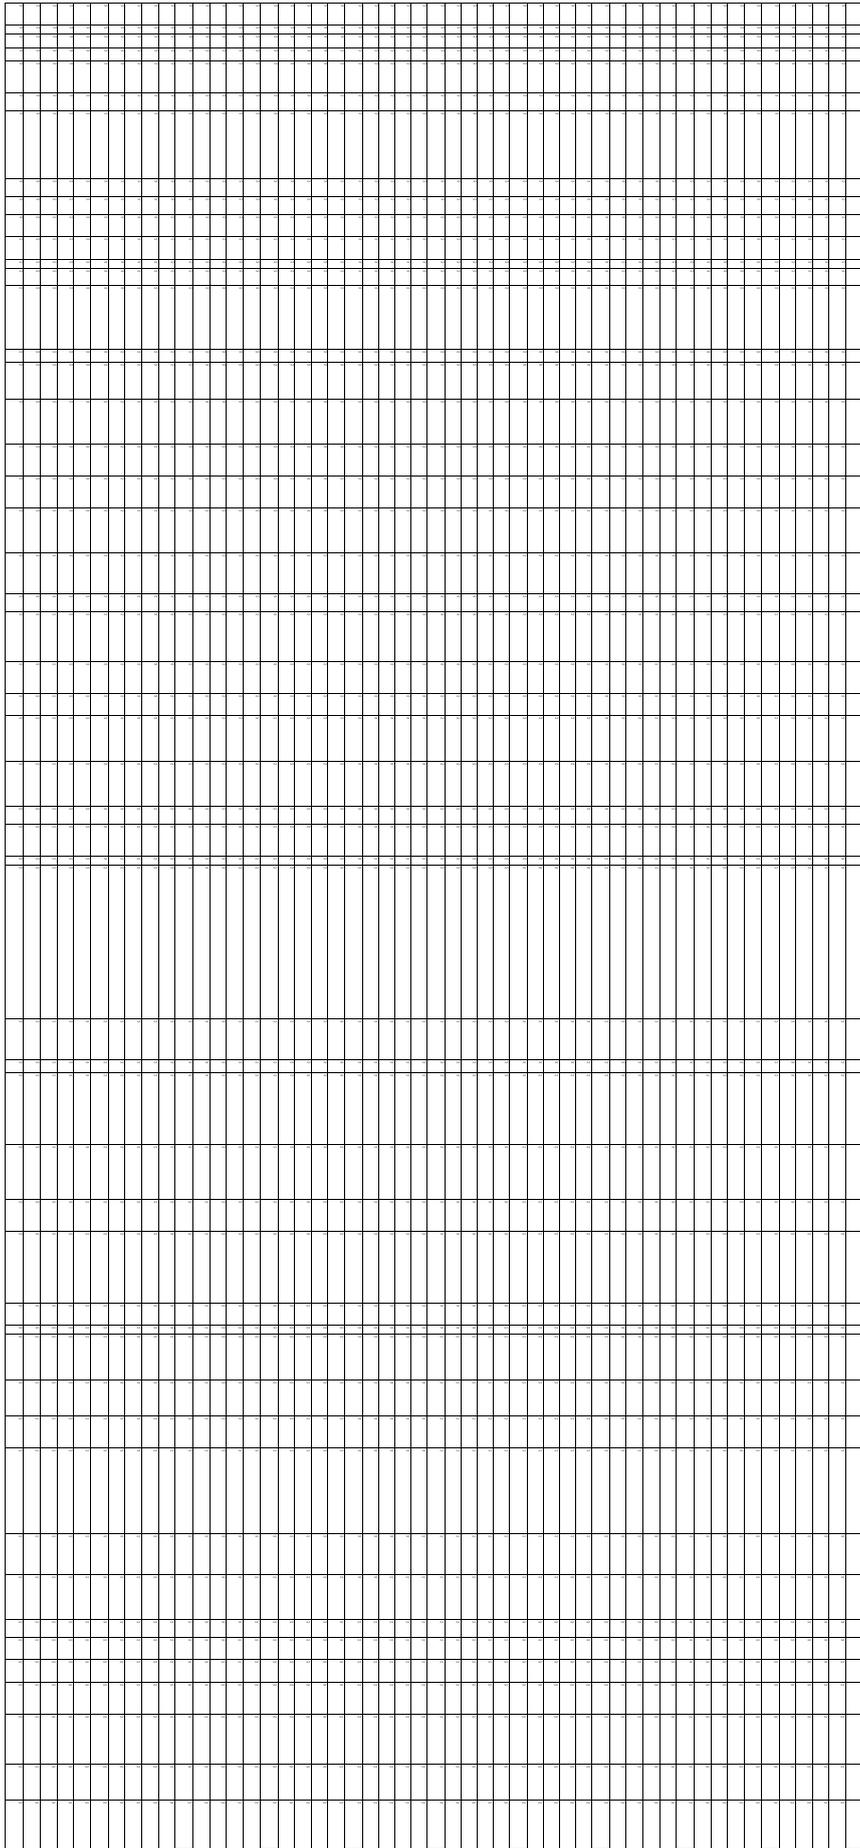

The image shows a large grid table consisting of 12 columns and 100 rows. The grid is divided into five horizontal sections by four thick lines. Each section contains 20 rows. The grid is empty, with no data or text inside the cells.

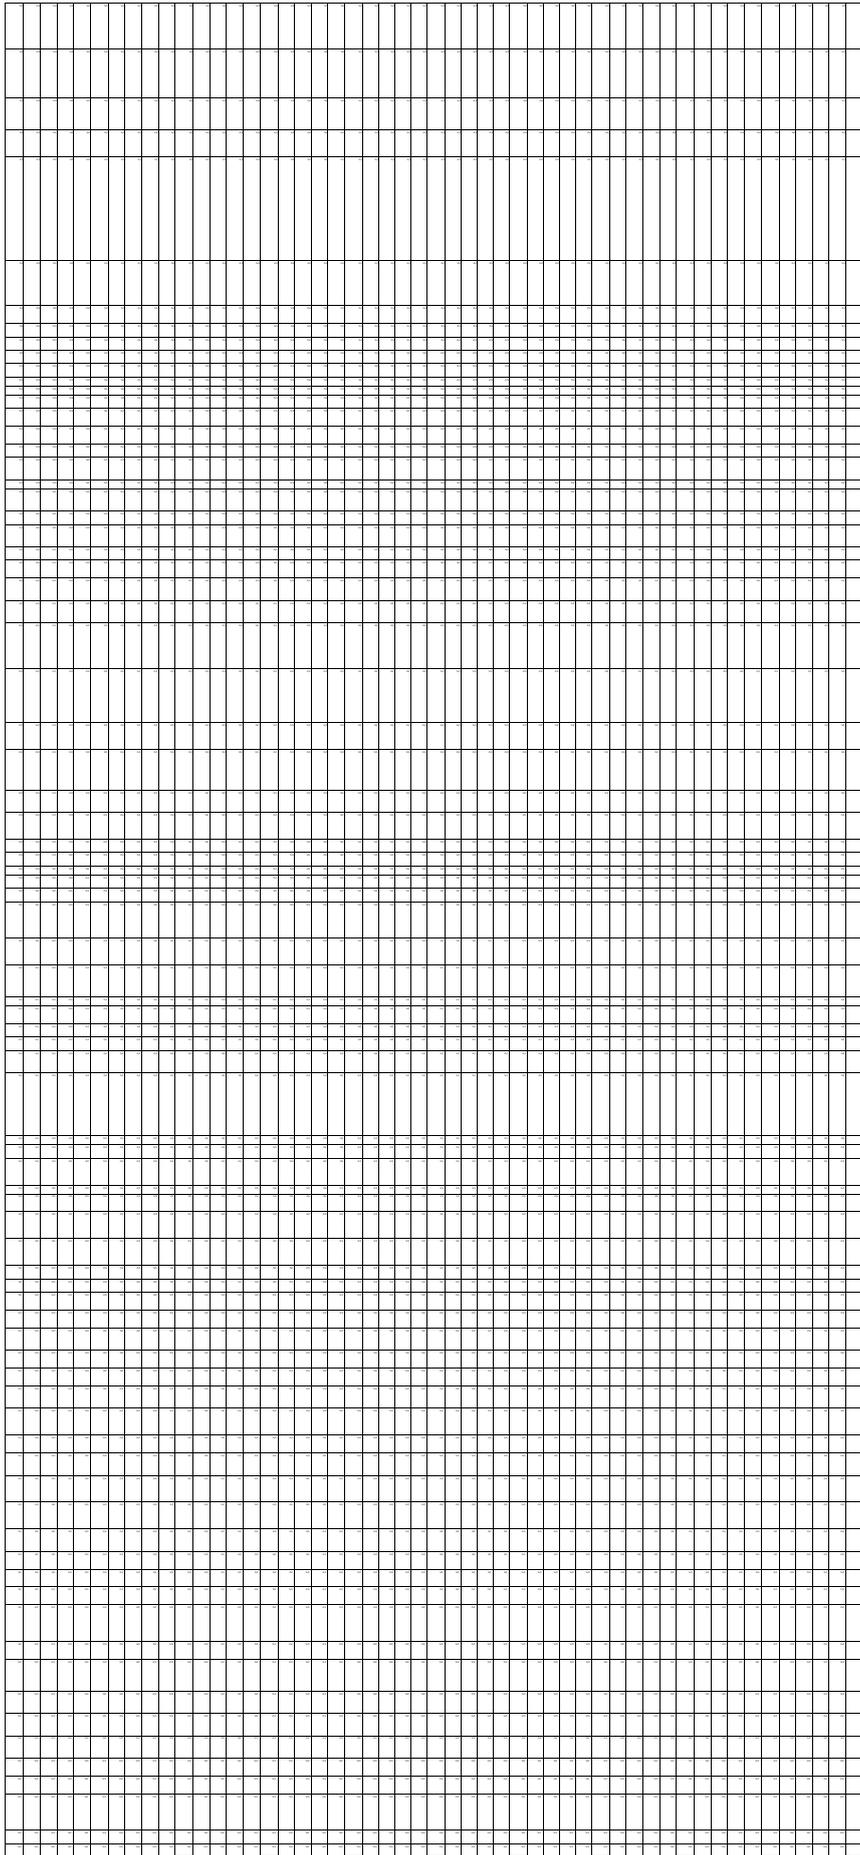

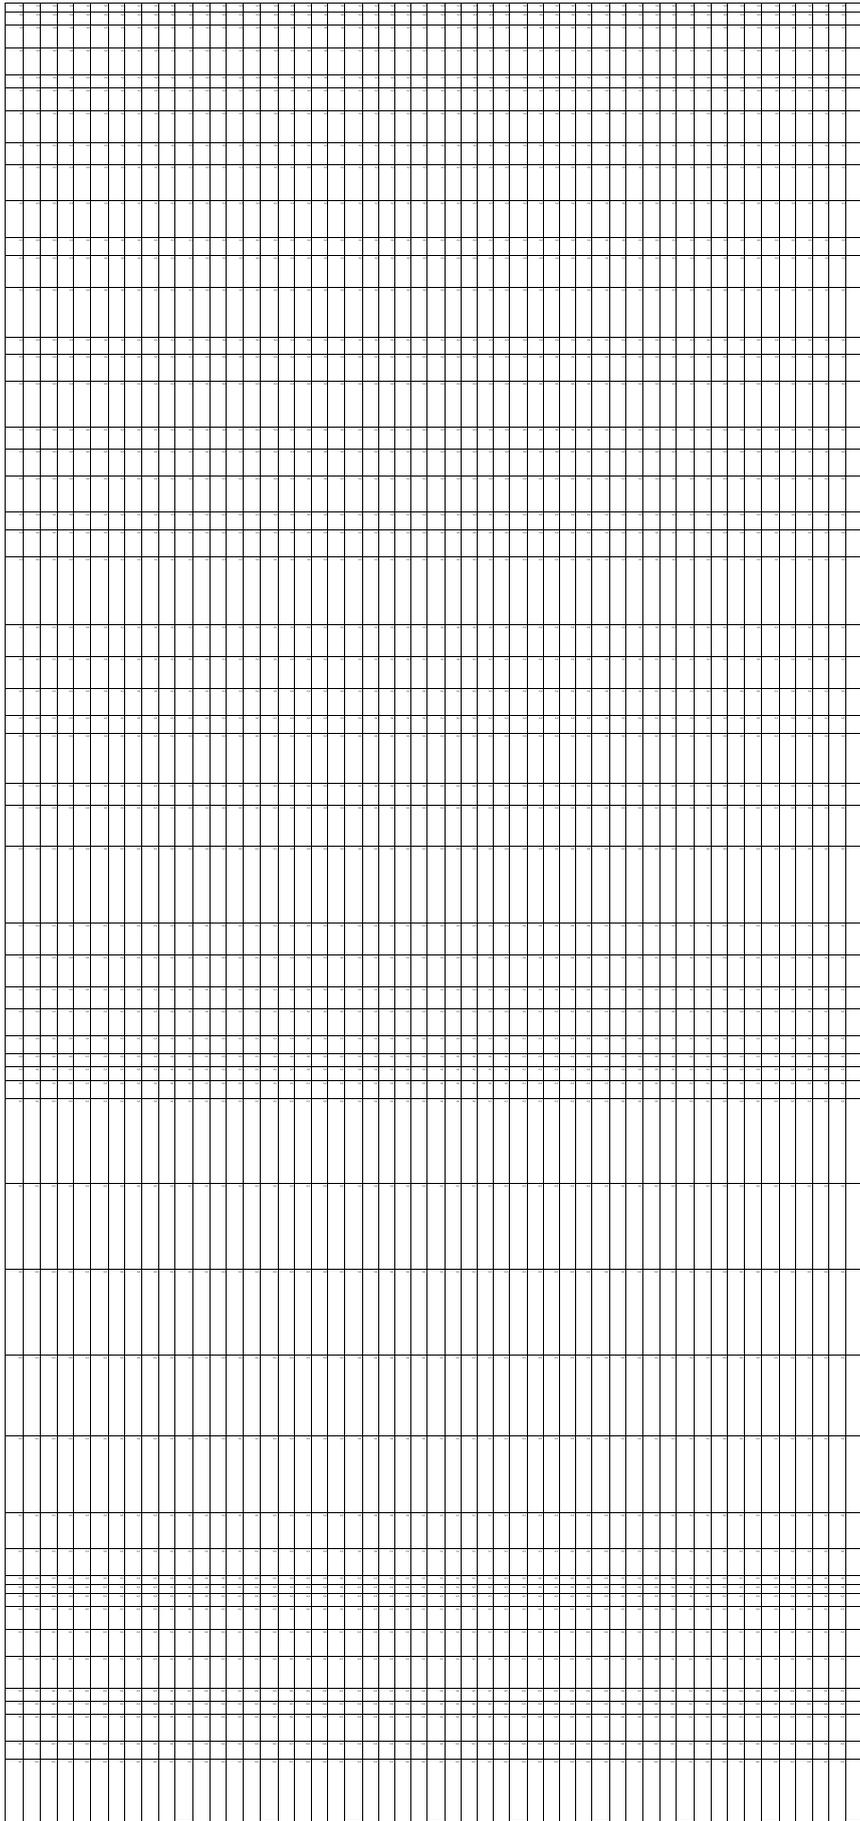

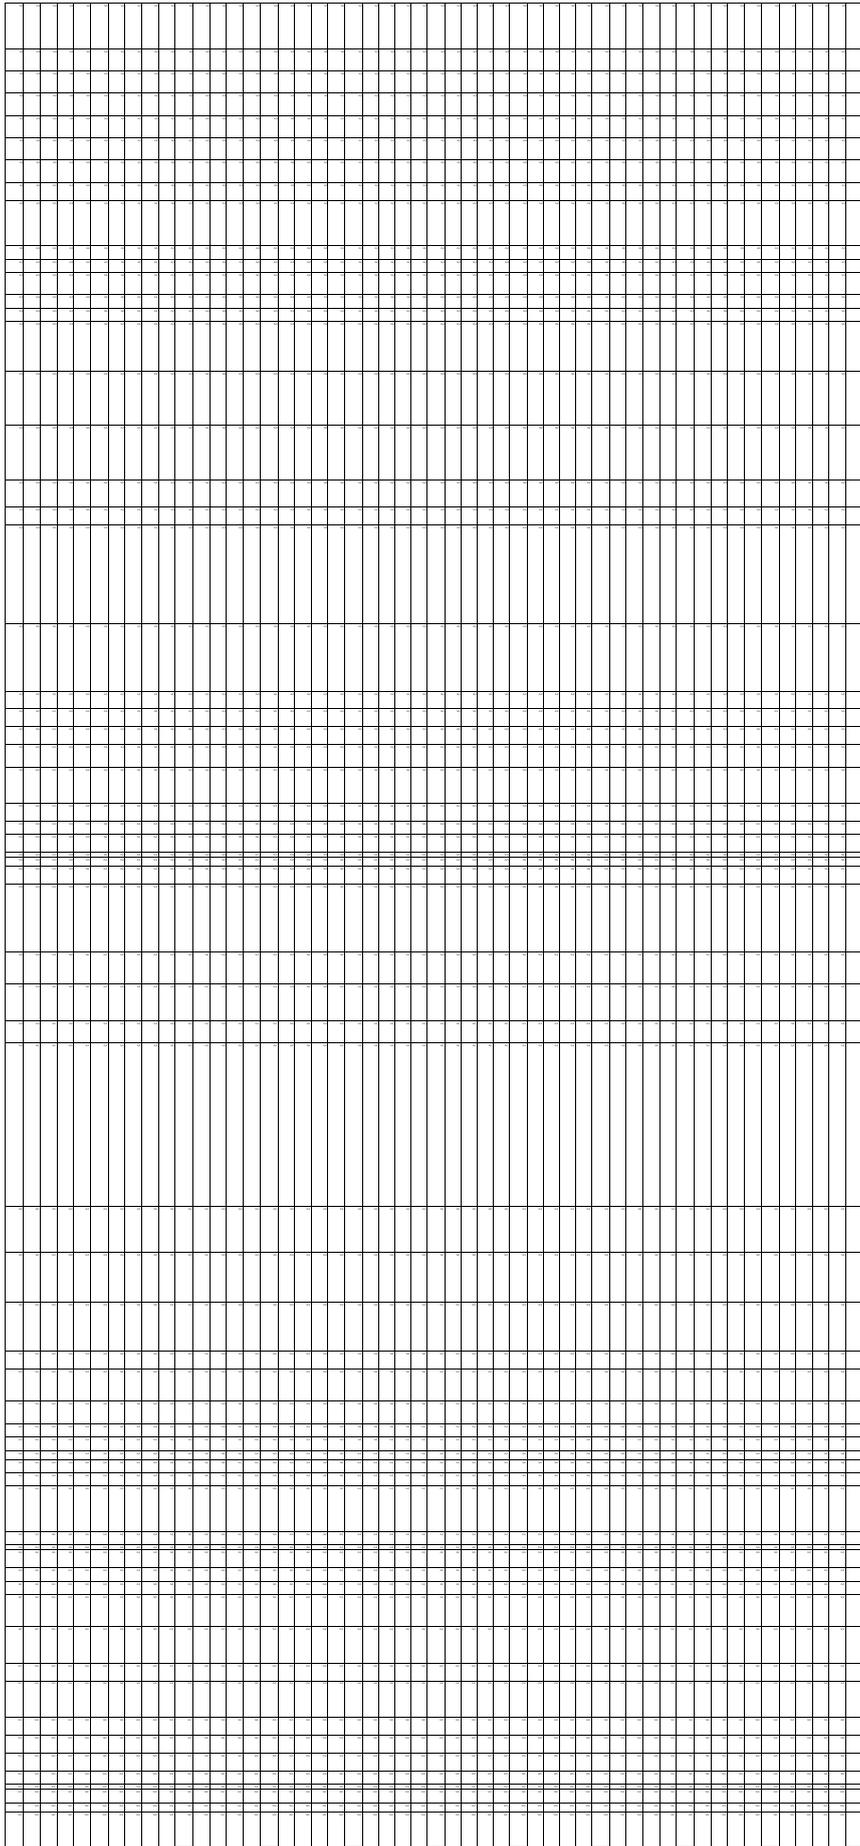

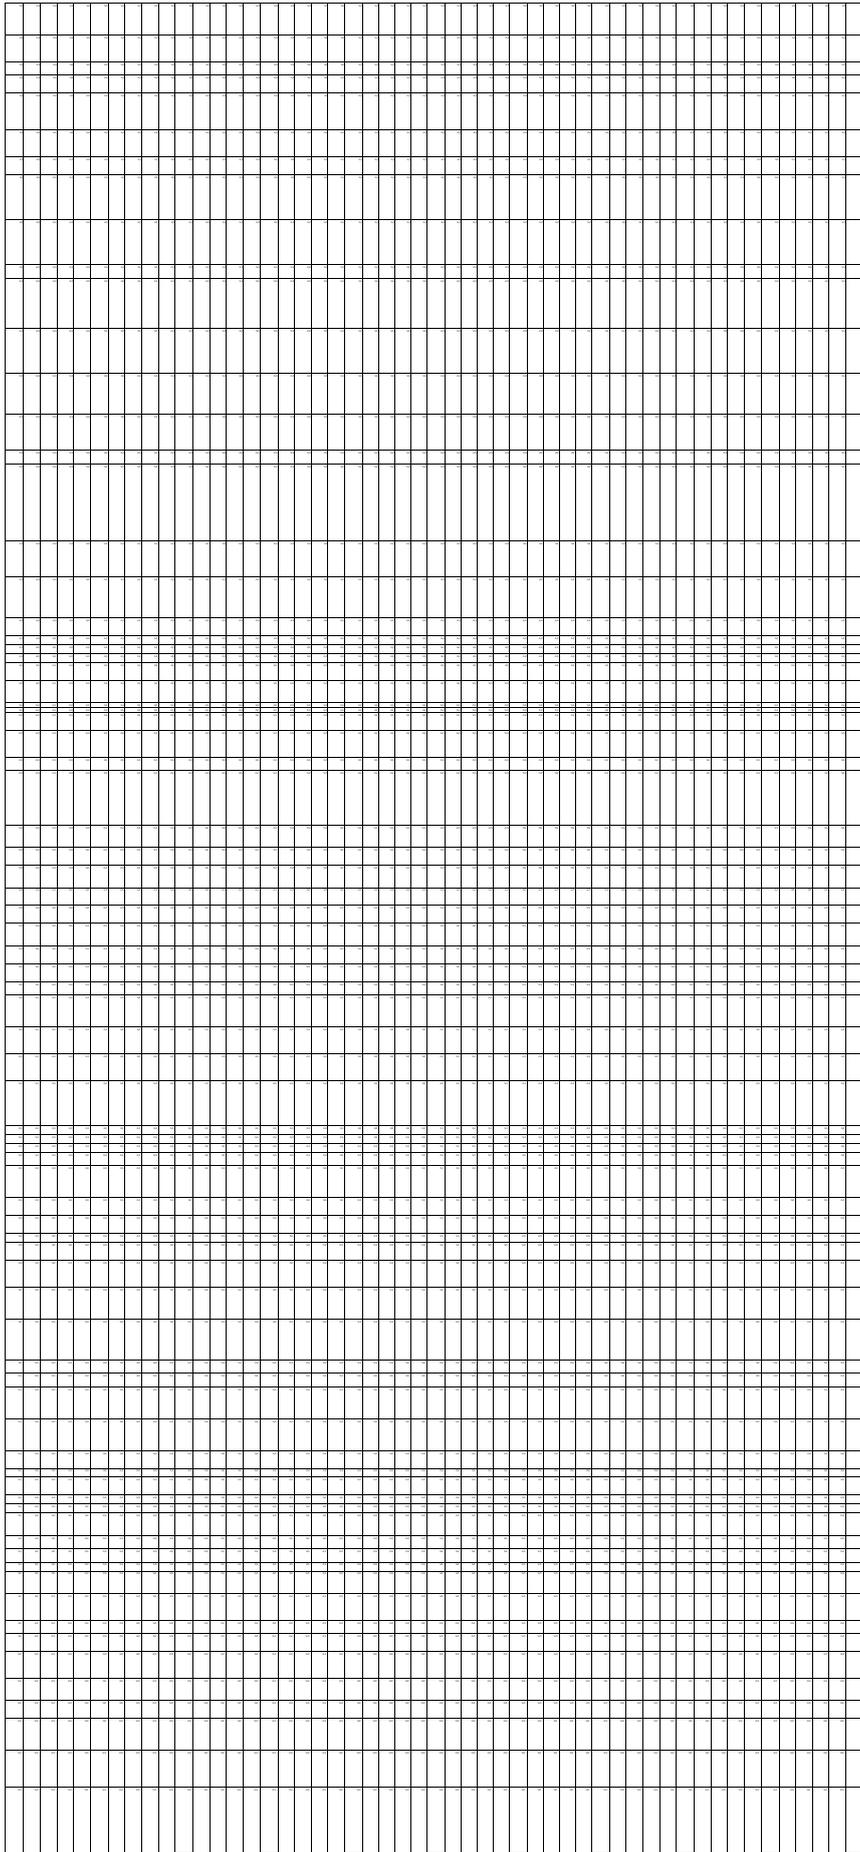

A grid of 20 columns and 30 rows. The grid is composed of thin black lines. The 5th row from the top and the 25th row from the top are each enclosed by a double-line border. The remaining 24 rows are enclosed by single-line borders. The bottom edge of the grid has a slight irregularity, with the lines not being perfectly straight.

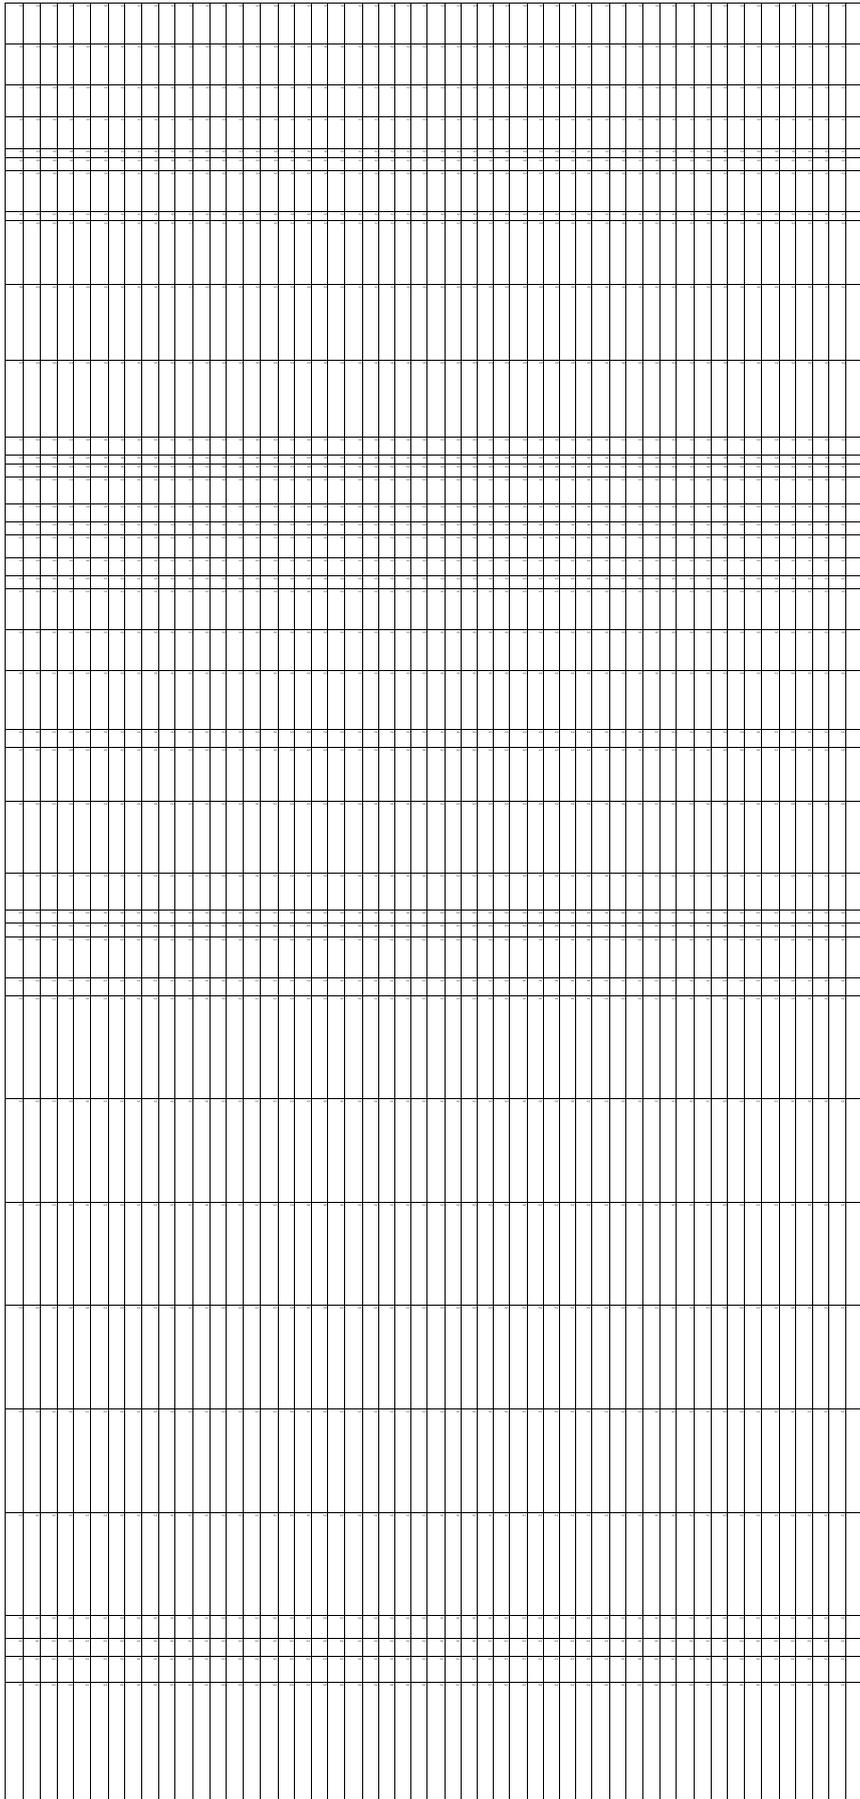

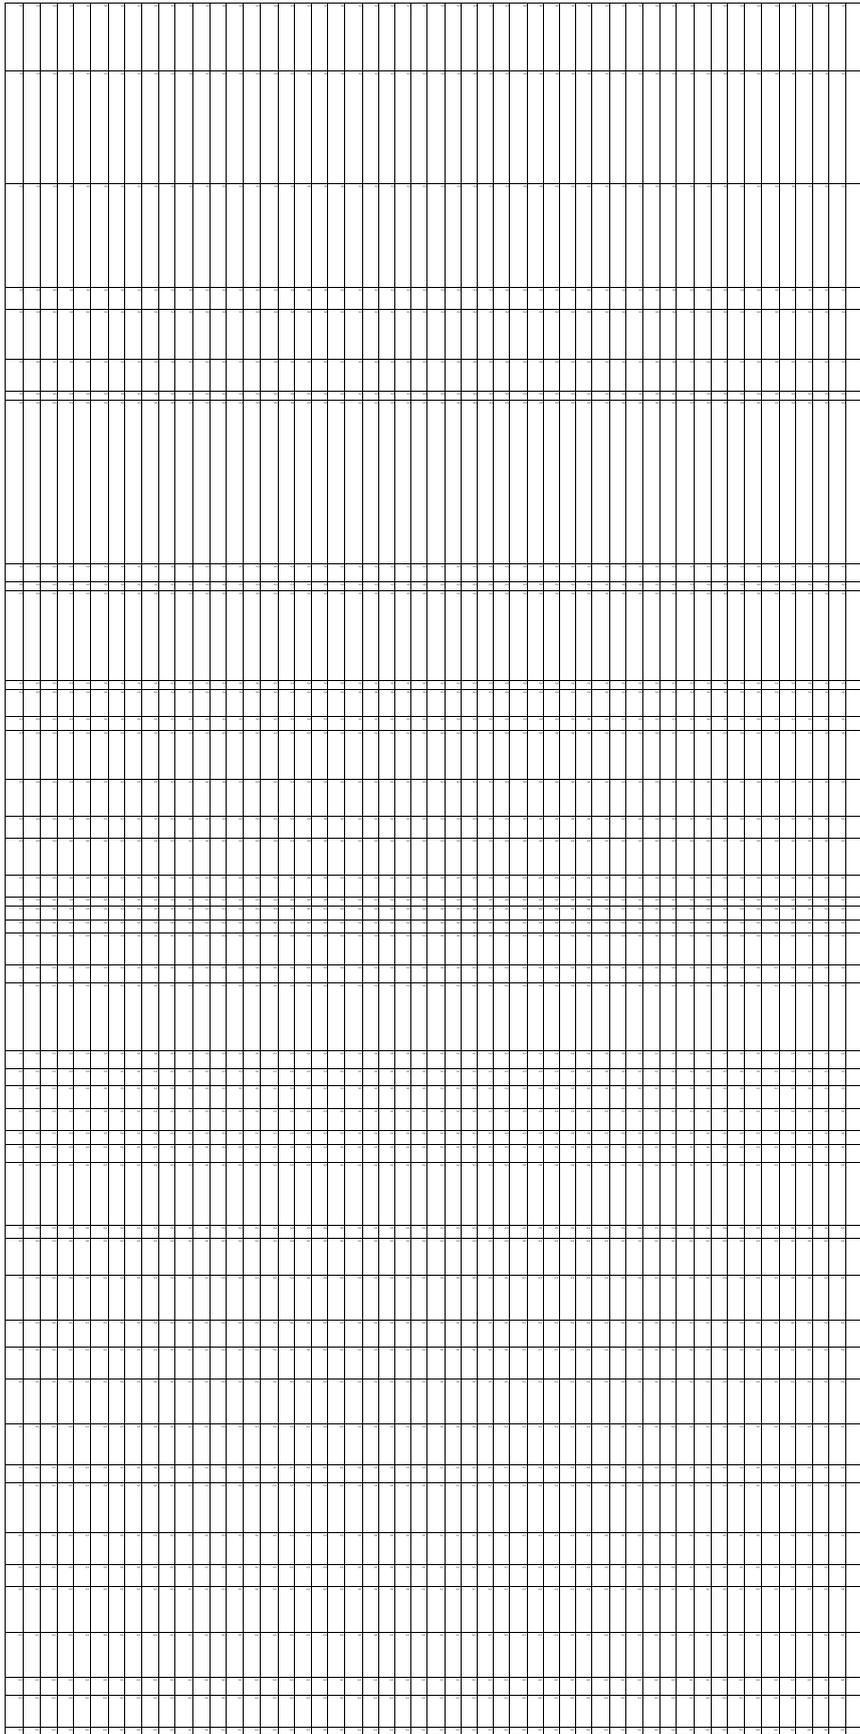

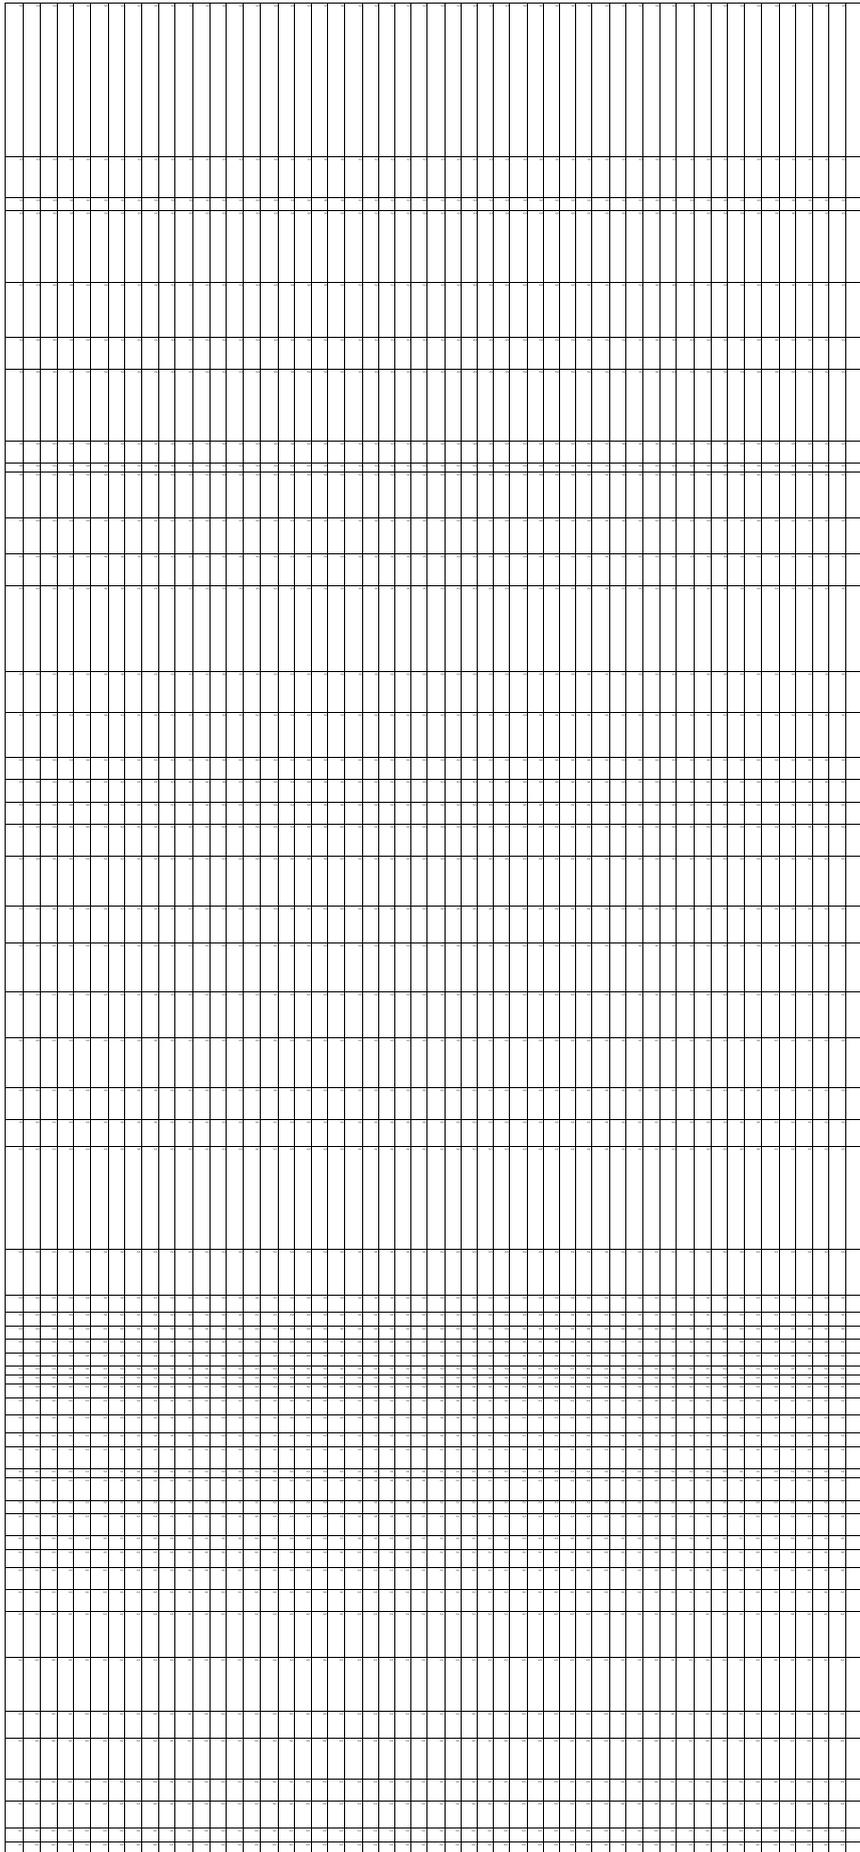

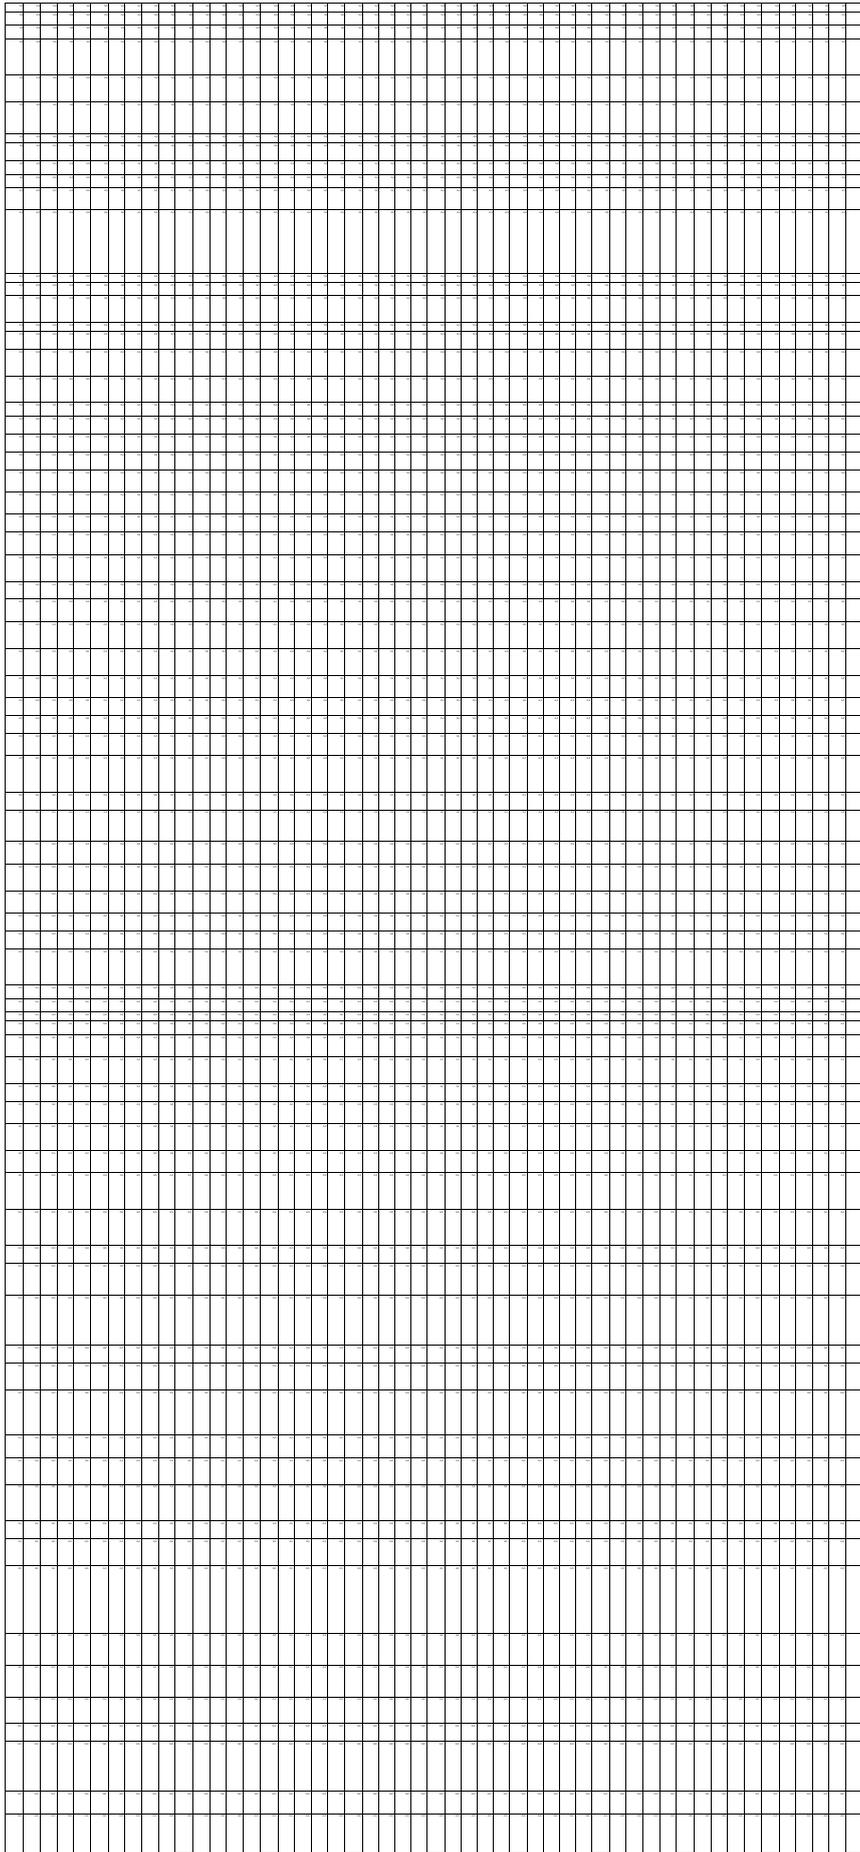

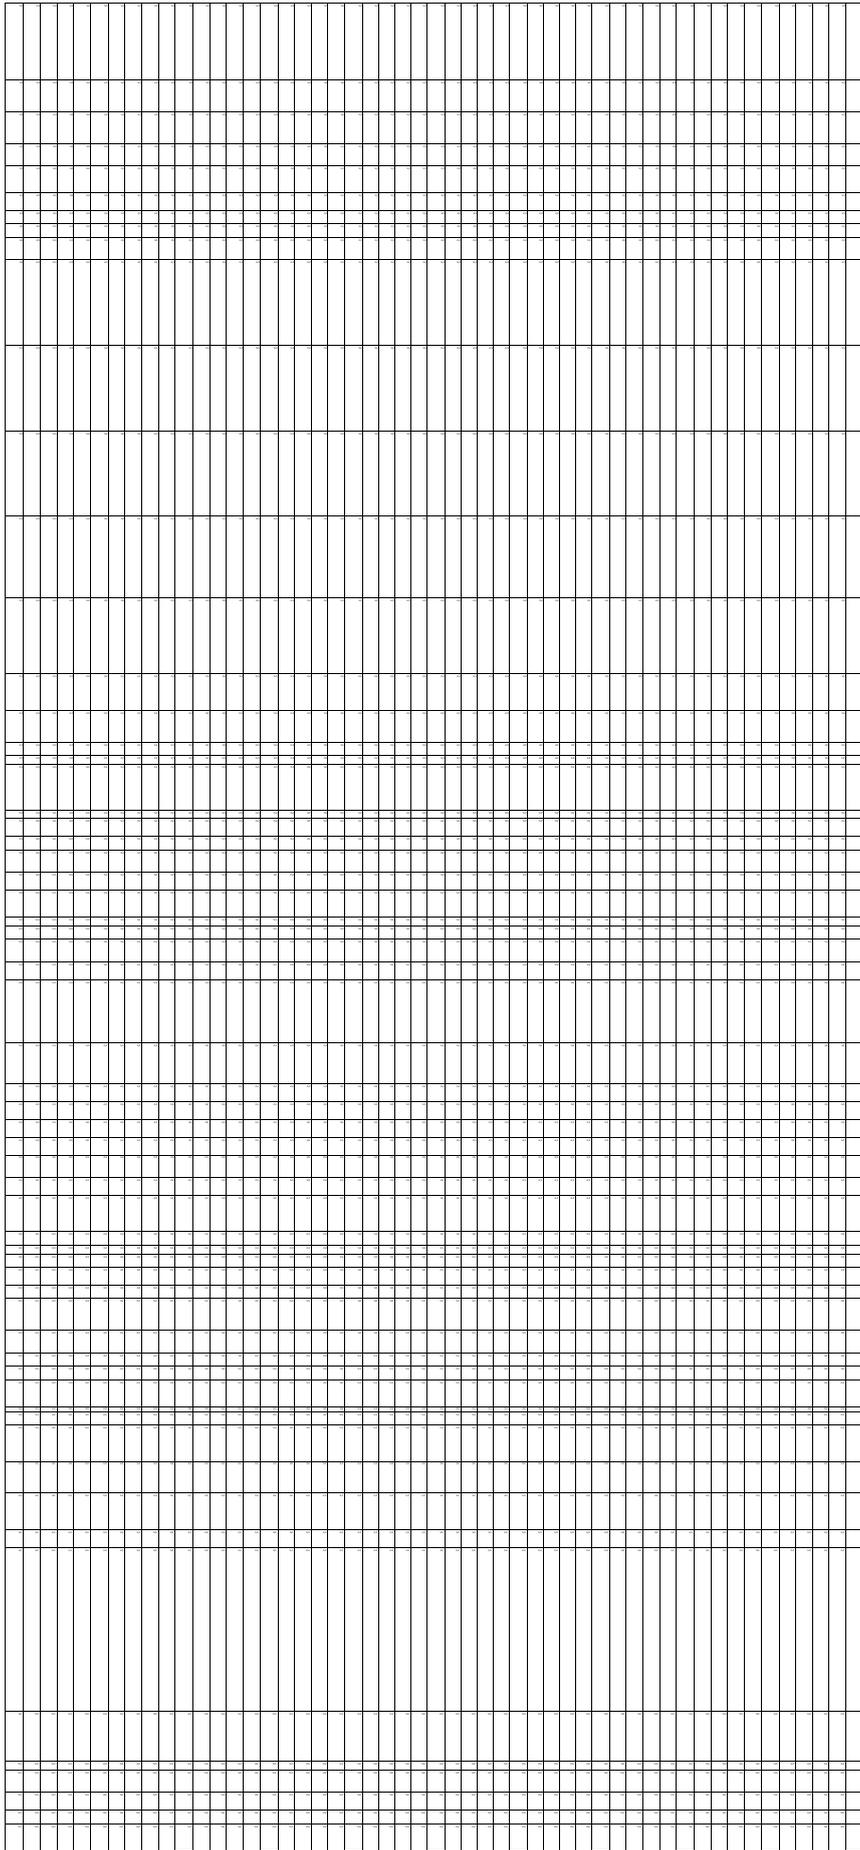

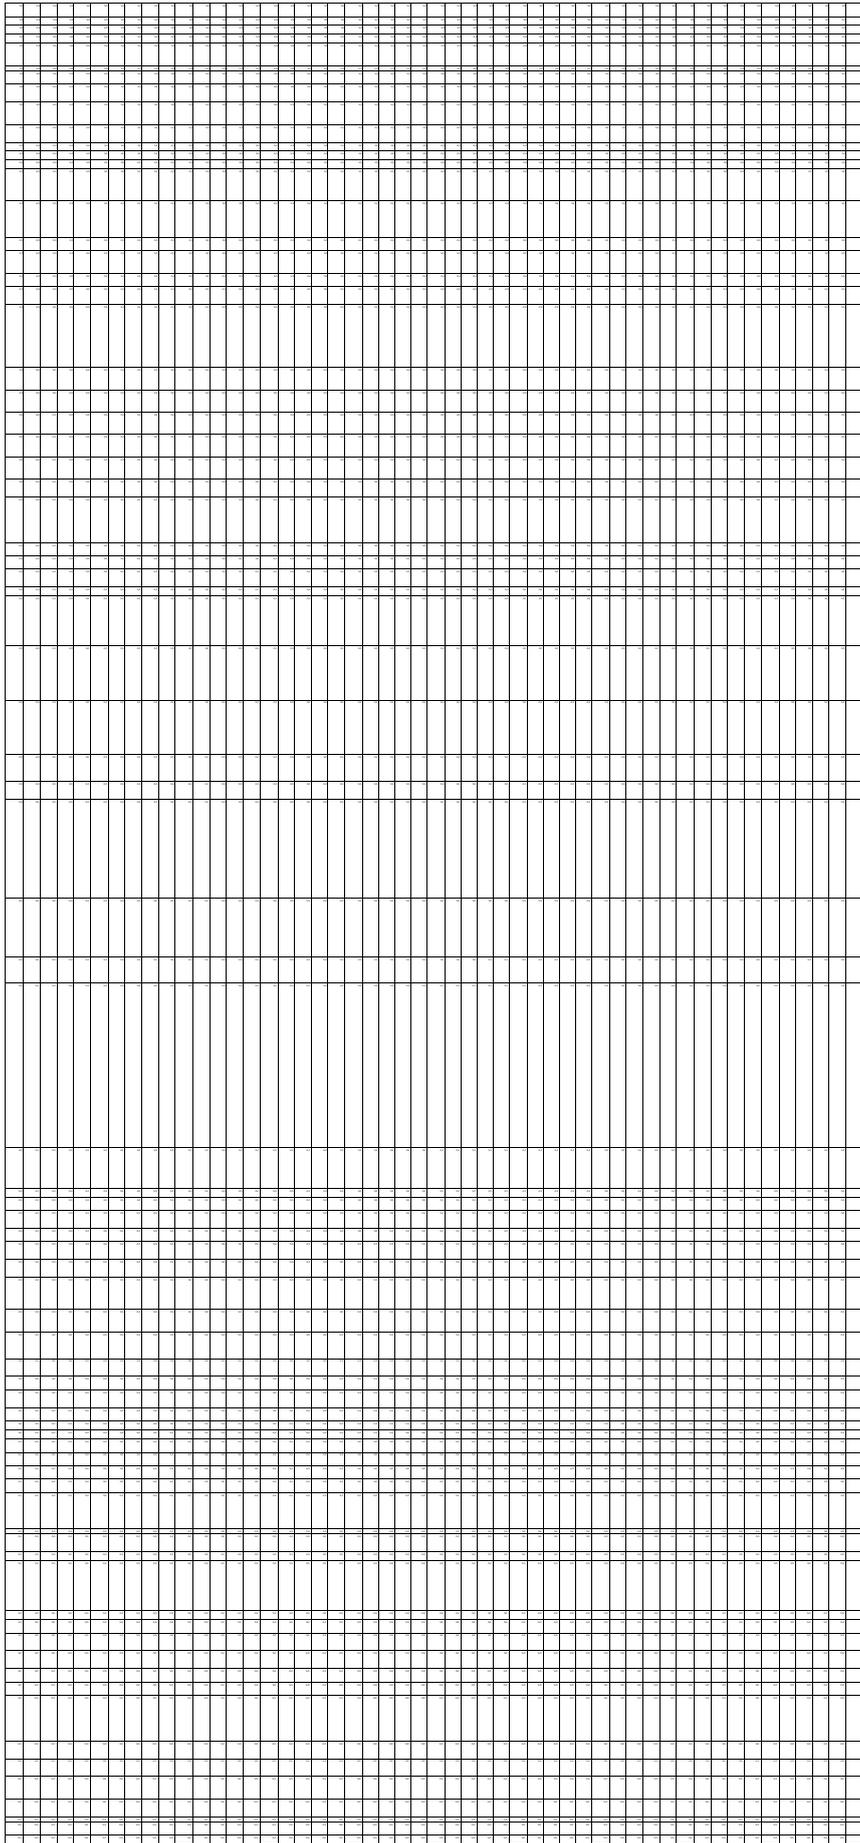

This image shows a large, empty grid of cells, resembling graph paper or a ledger page. The grid is composed of 30 columns and 20 rows of small, uniform rectangular cells. The lines forming the grid are thin and black, set against a white background. The grid is positioned on the left side of the page, leaving a wide white margin on the right. There are no markings, text, or data within the cells.

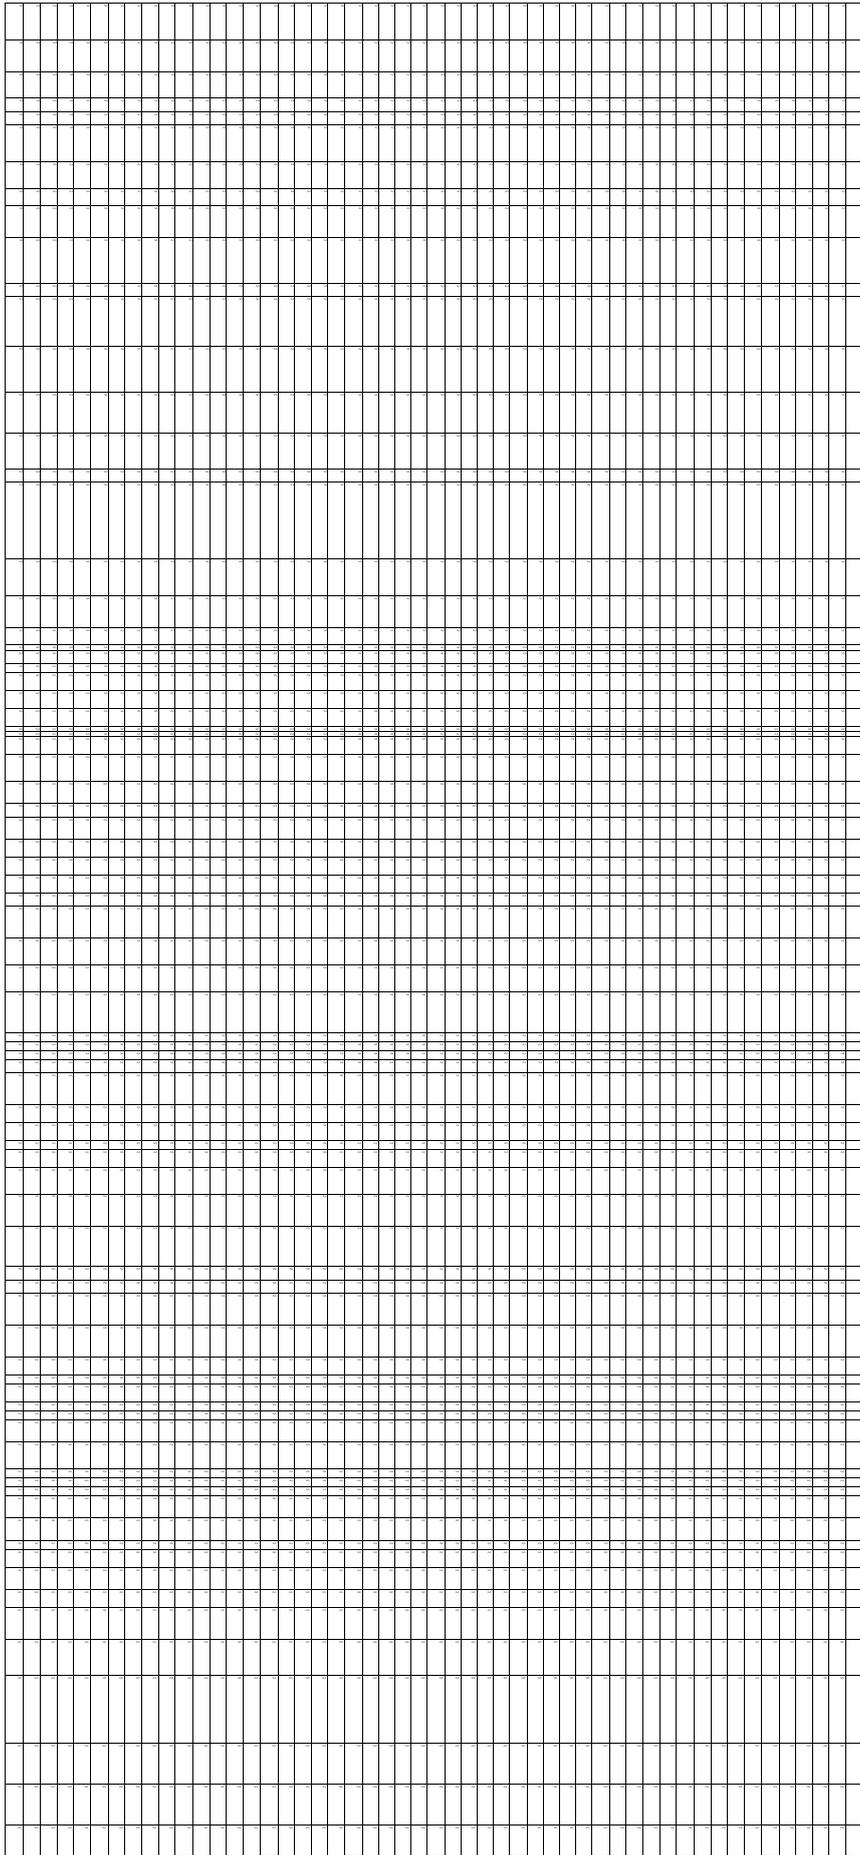

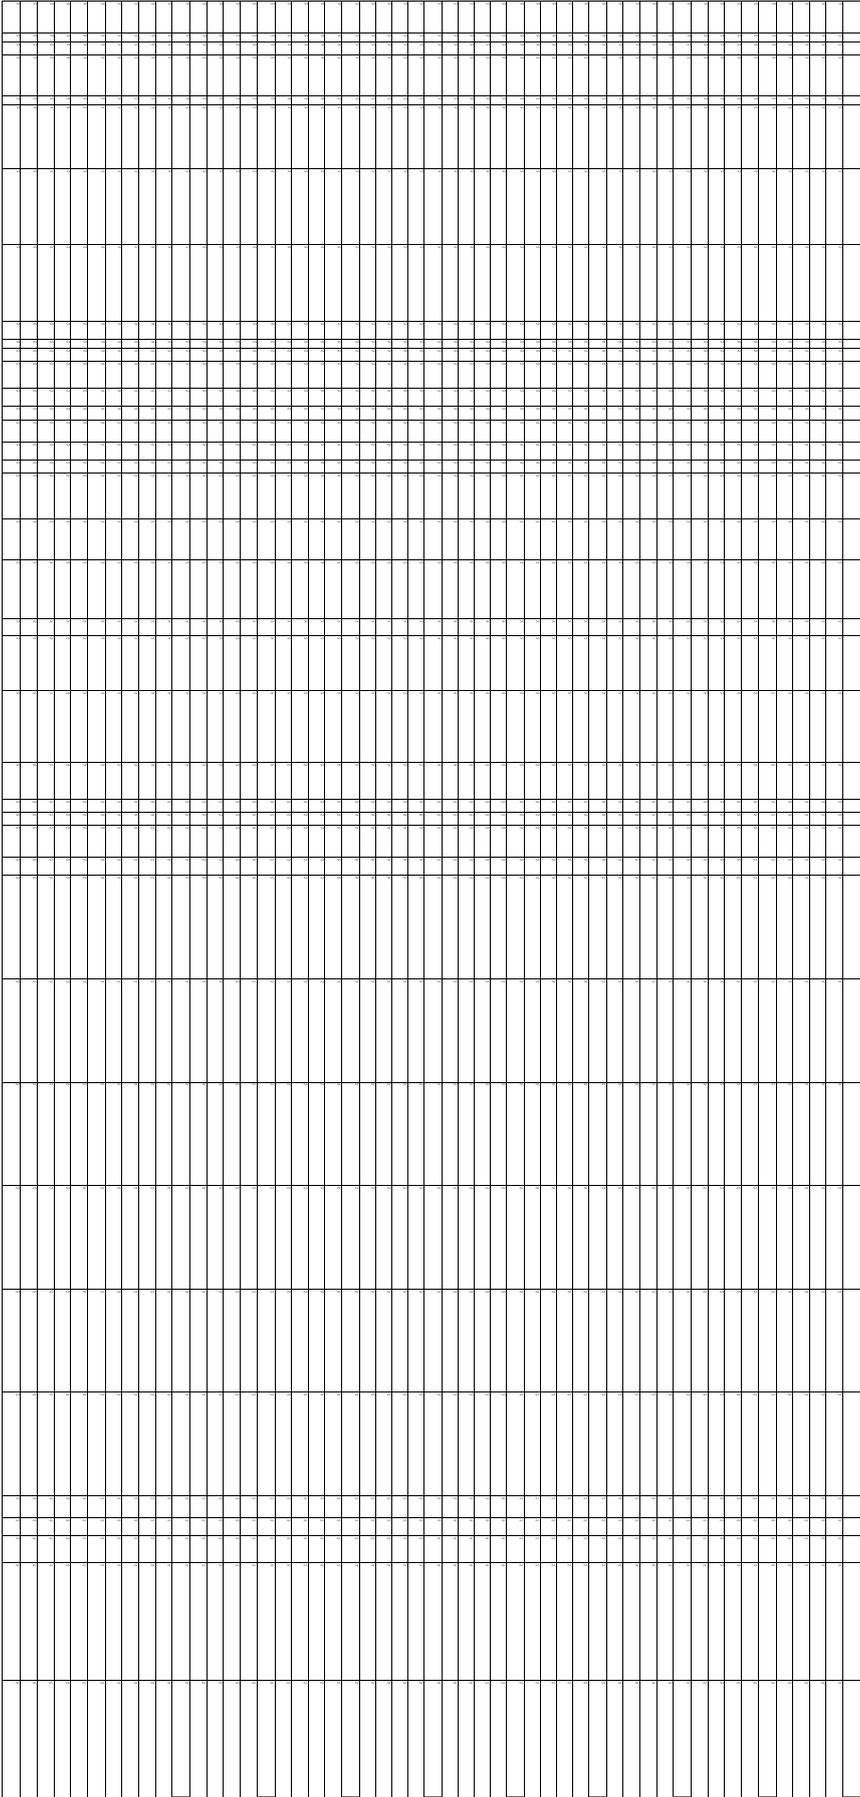

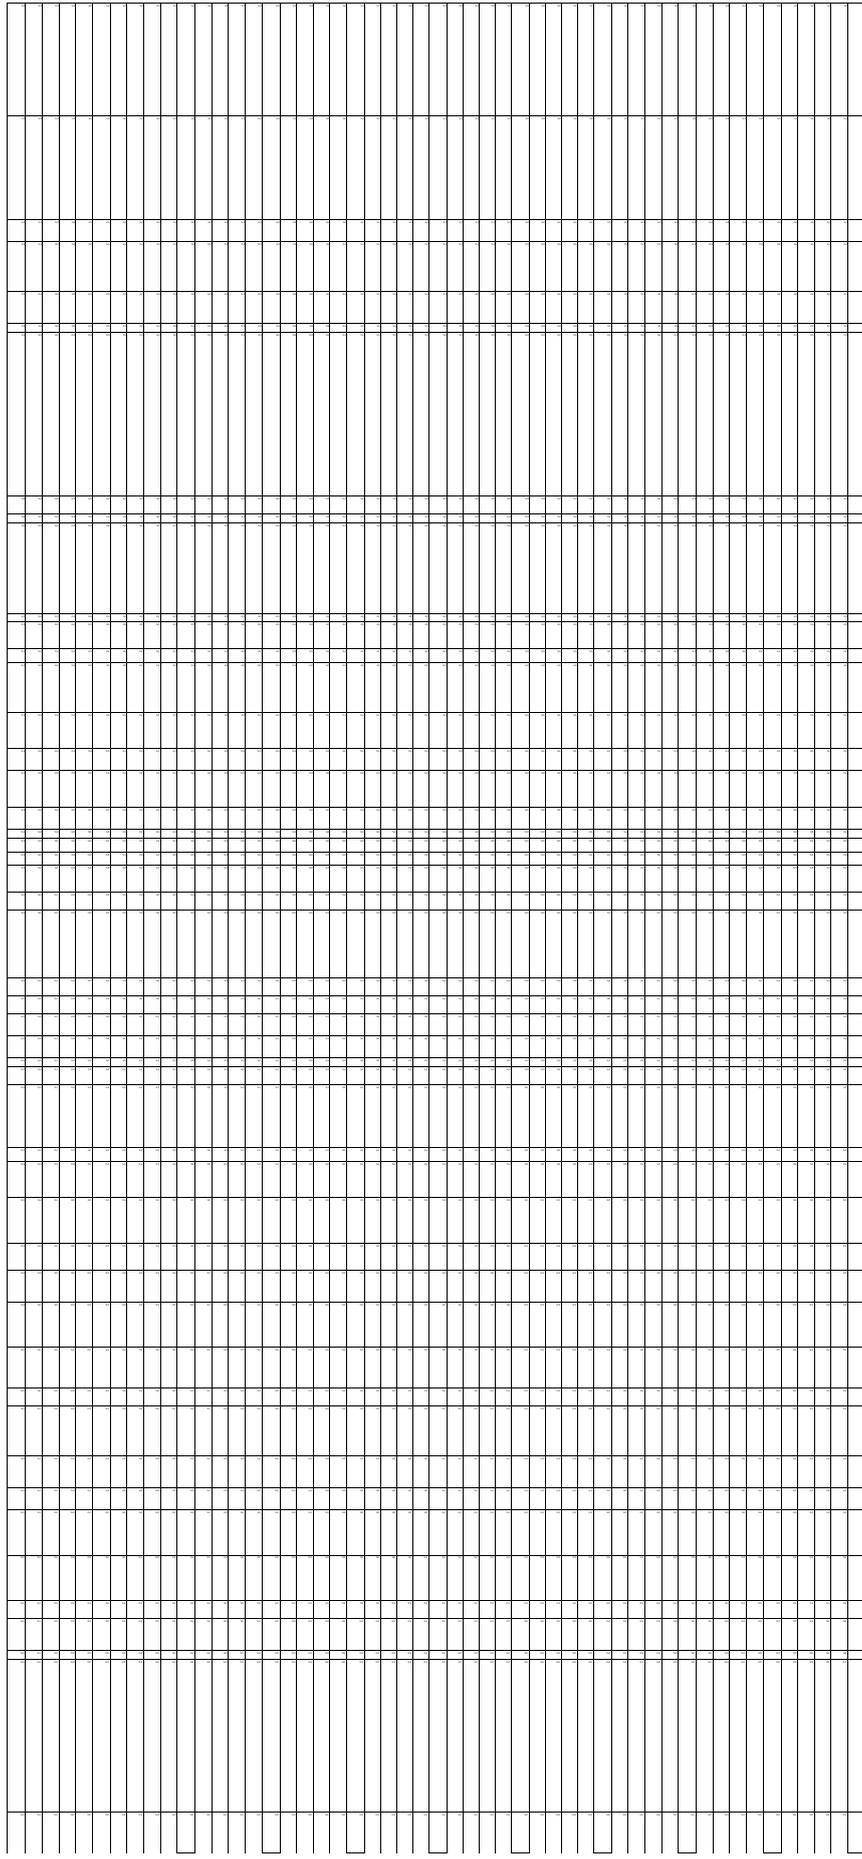

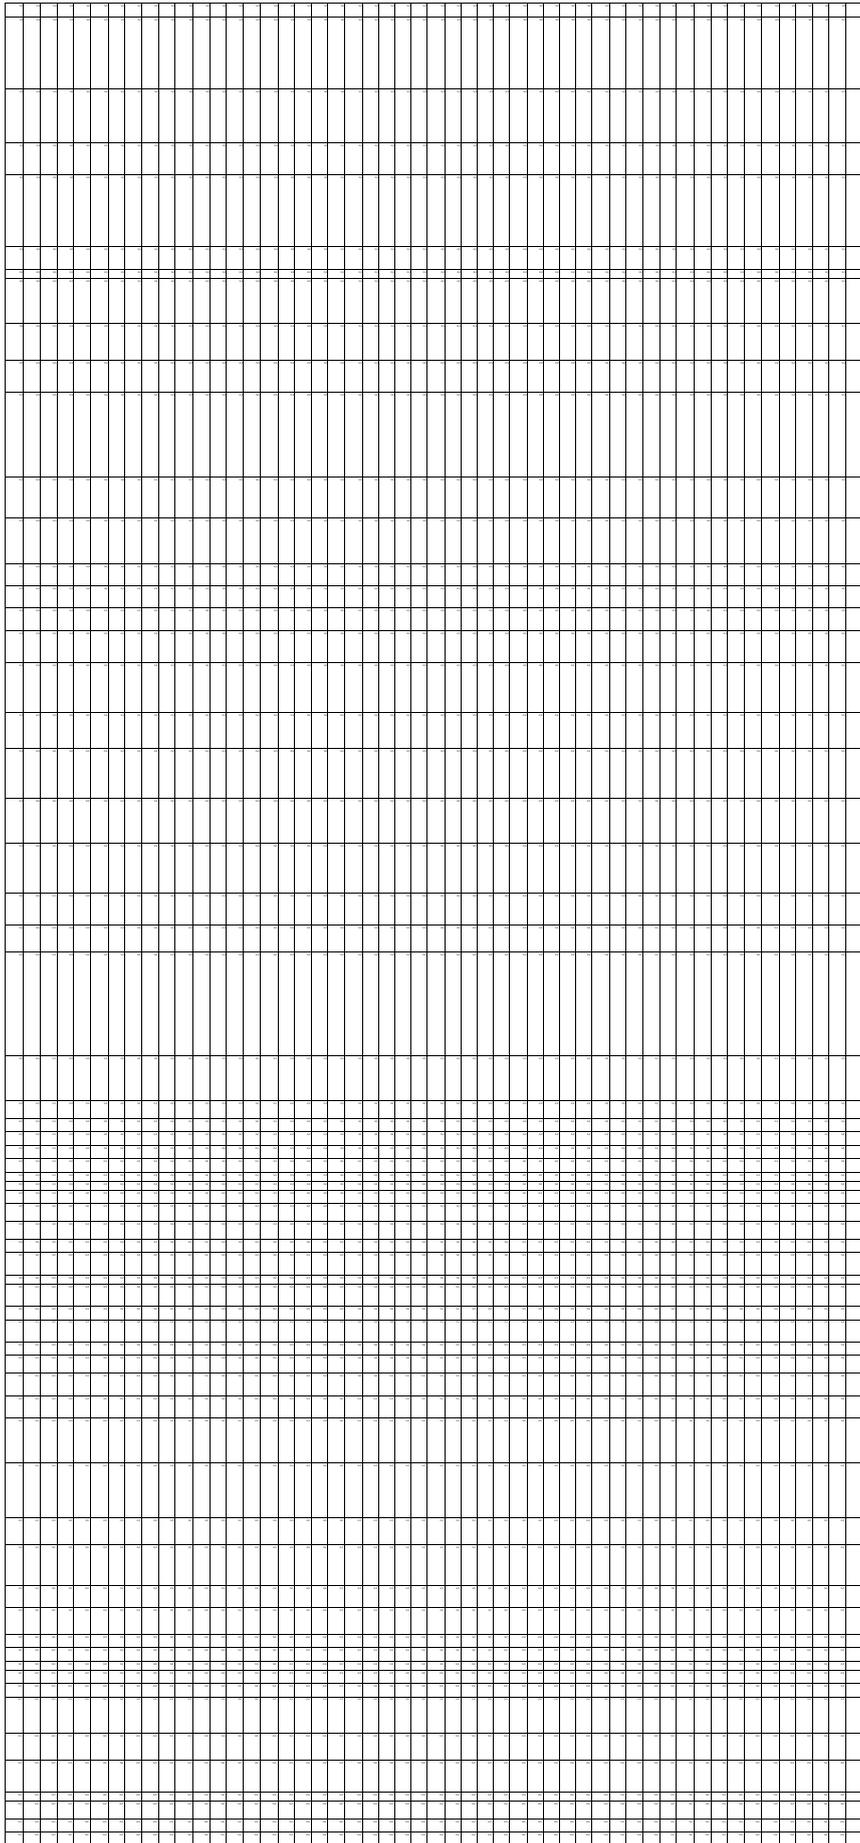

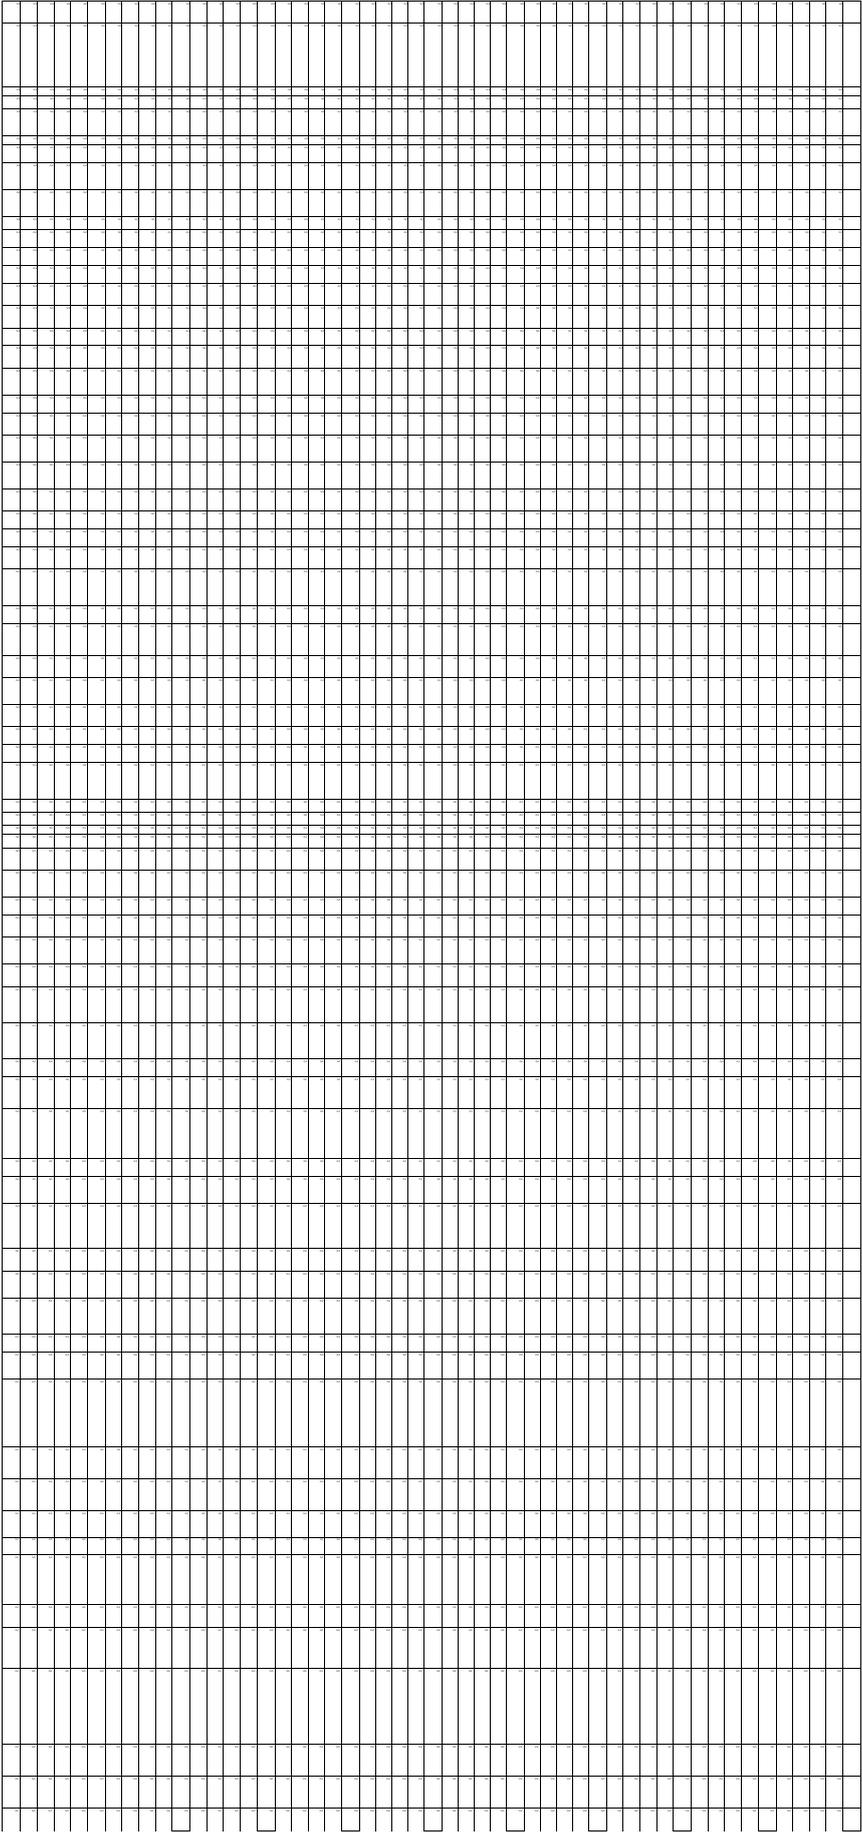

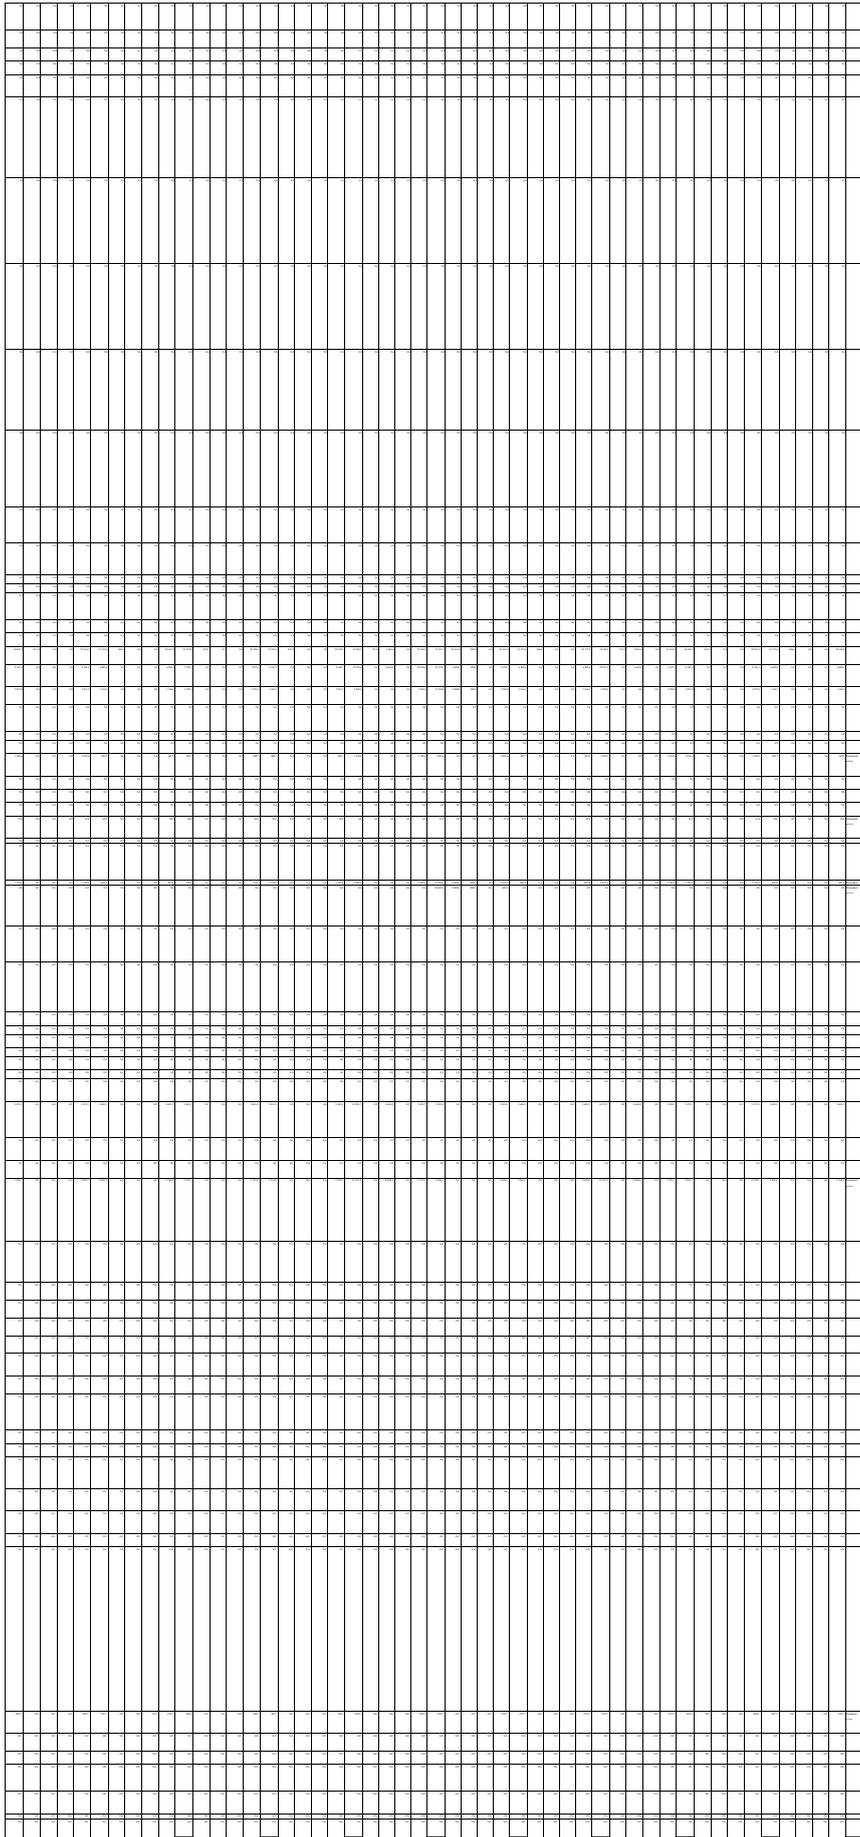

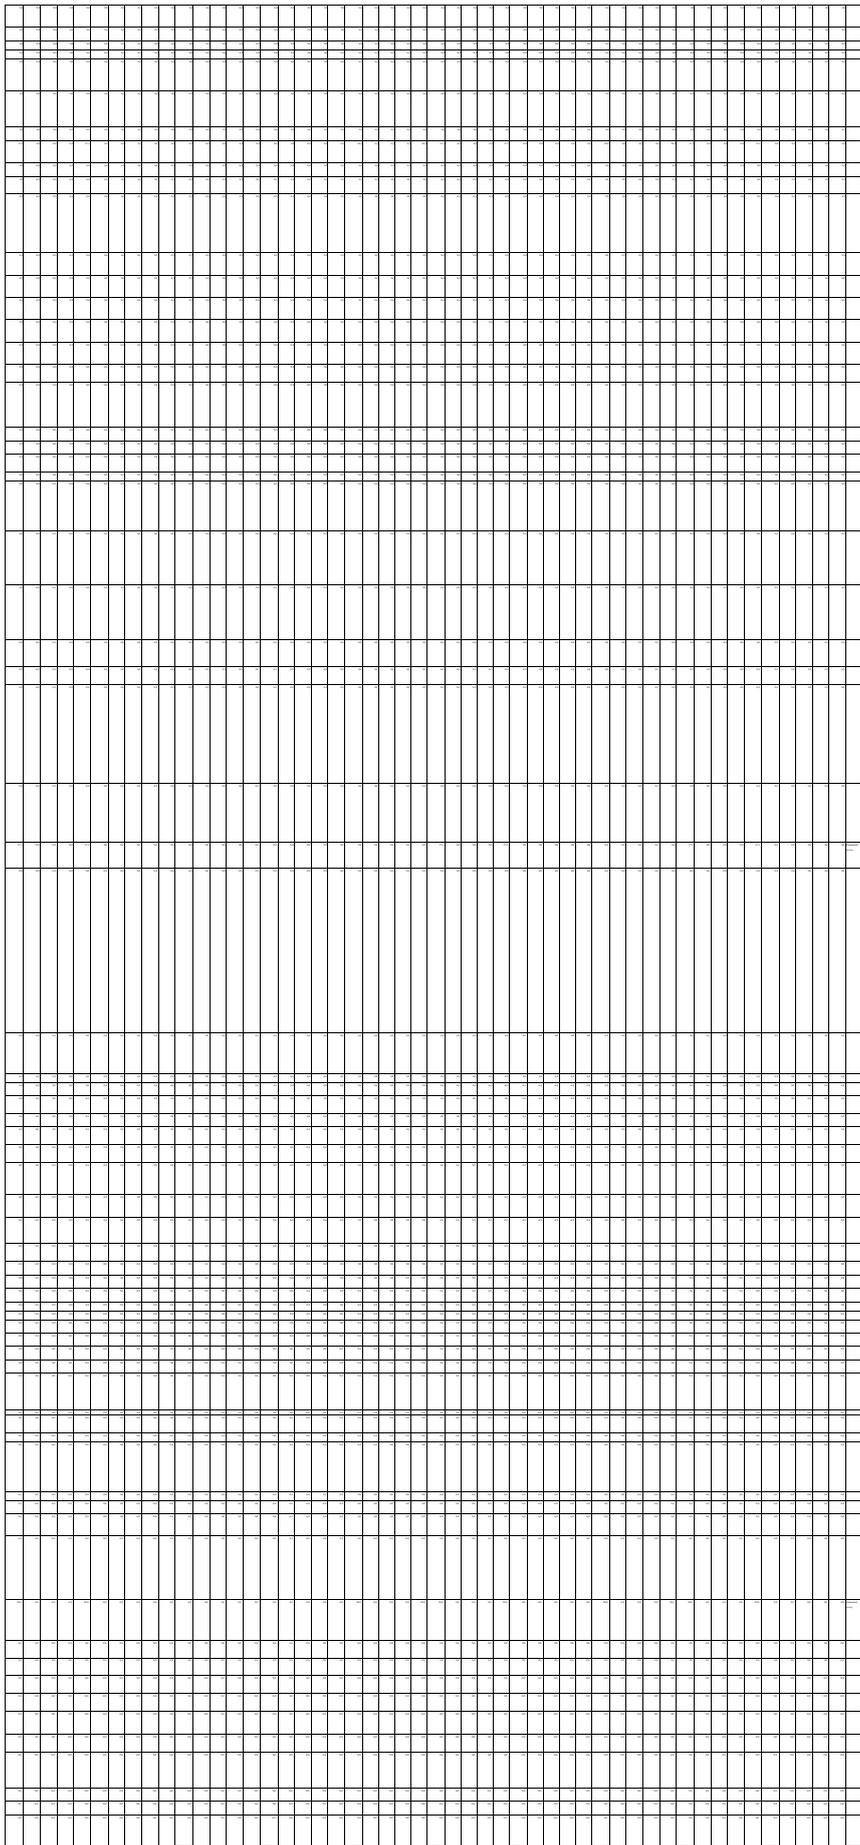

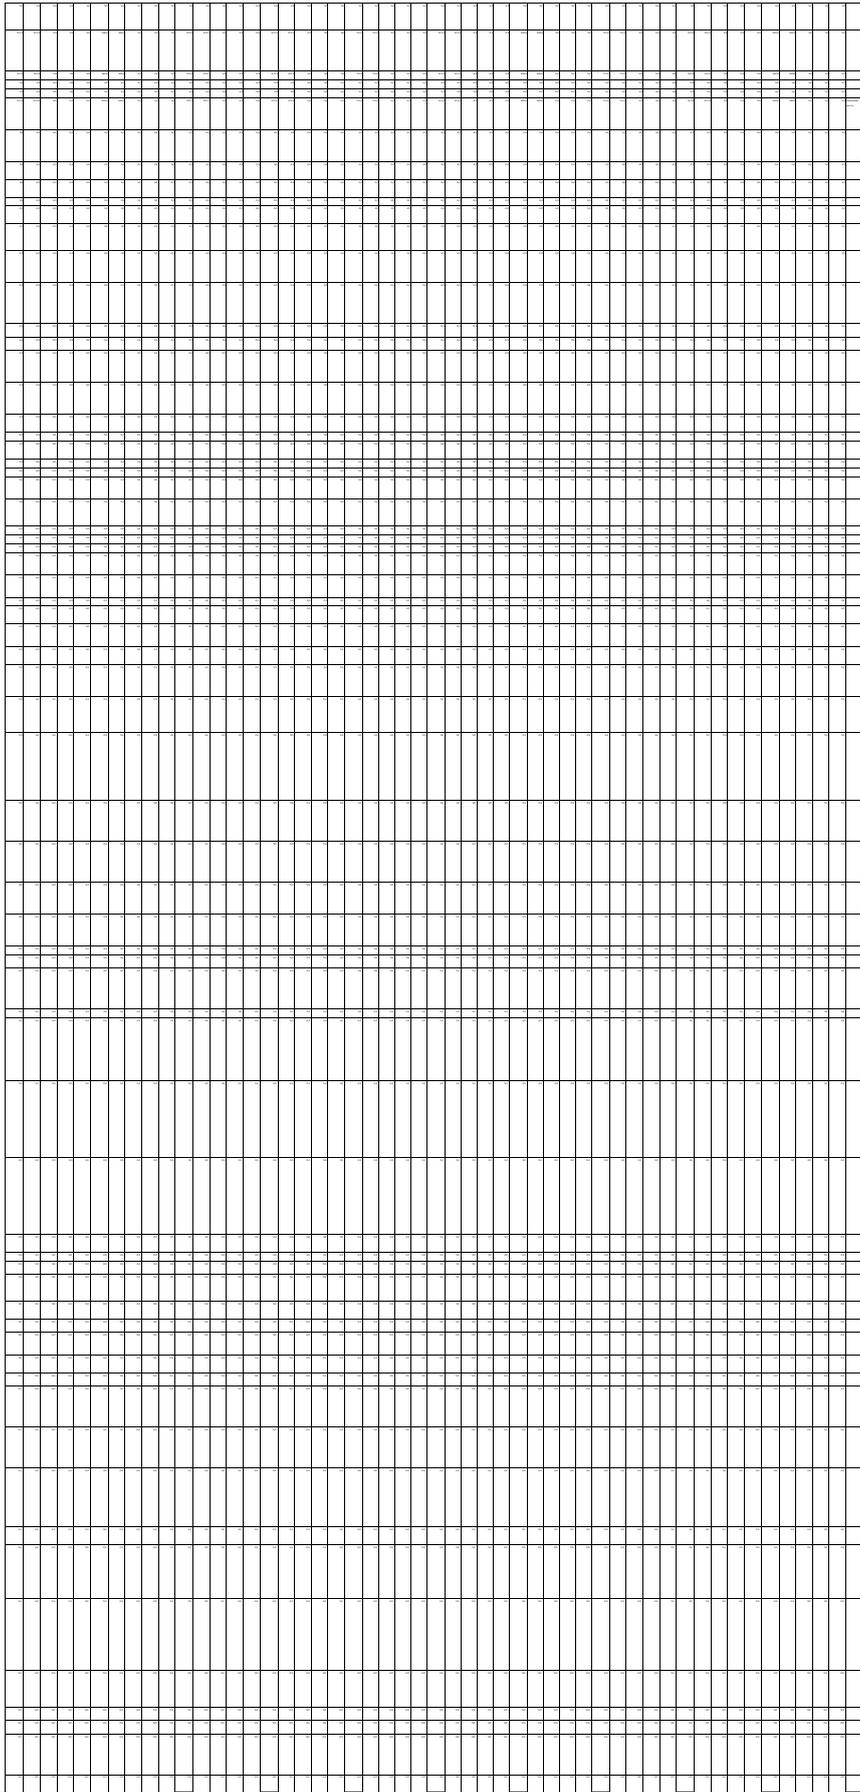

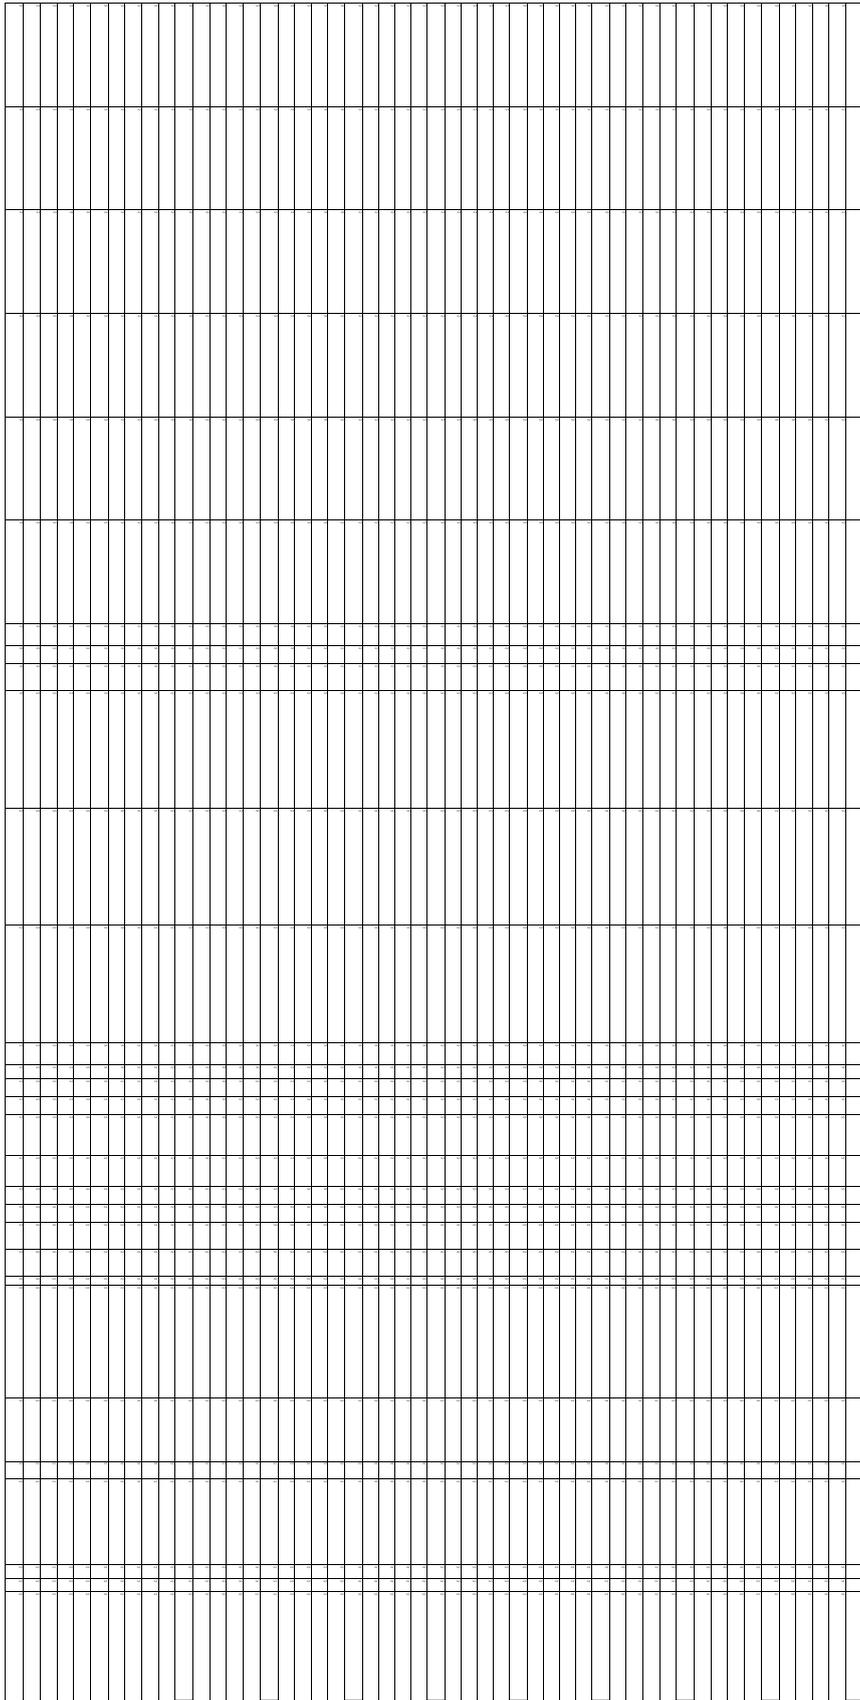

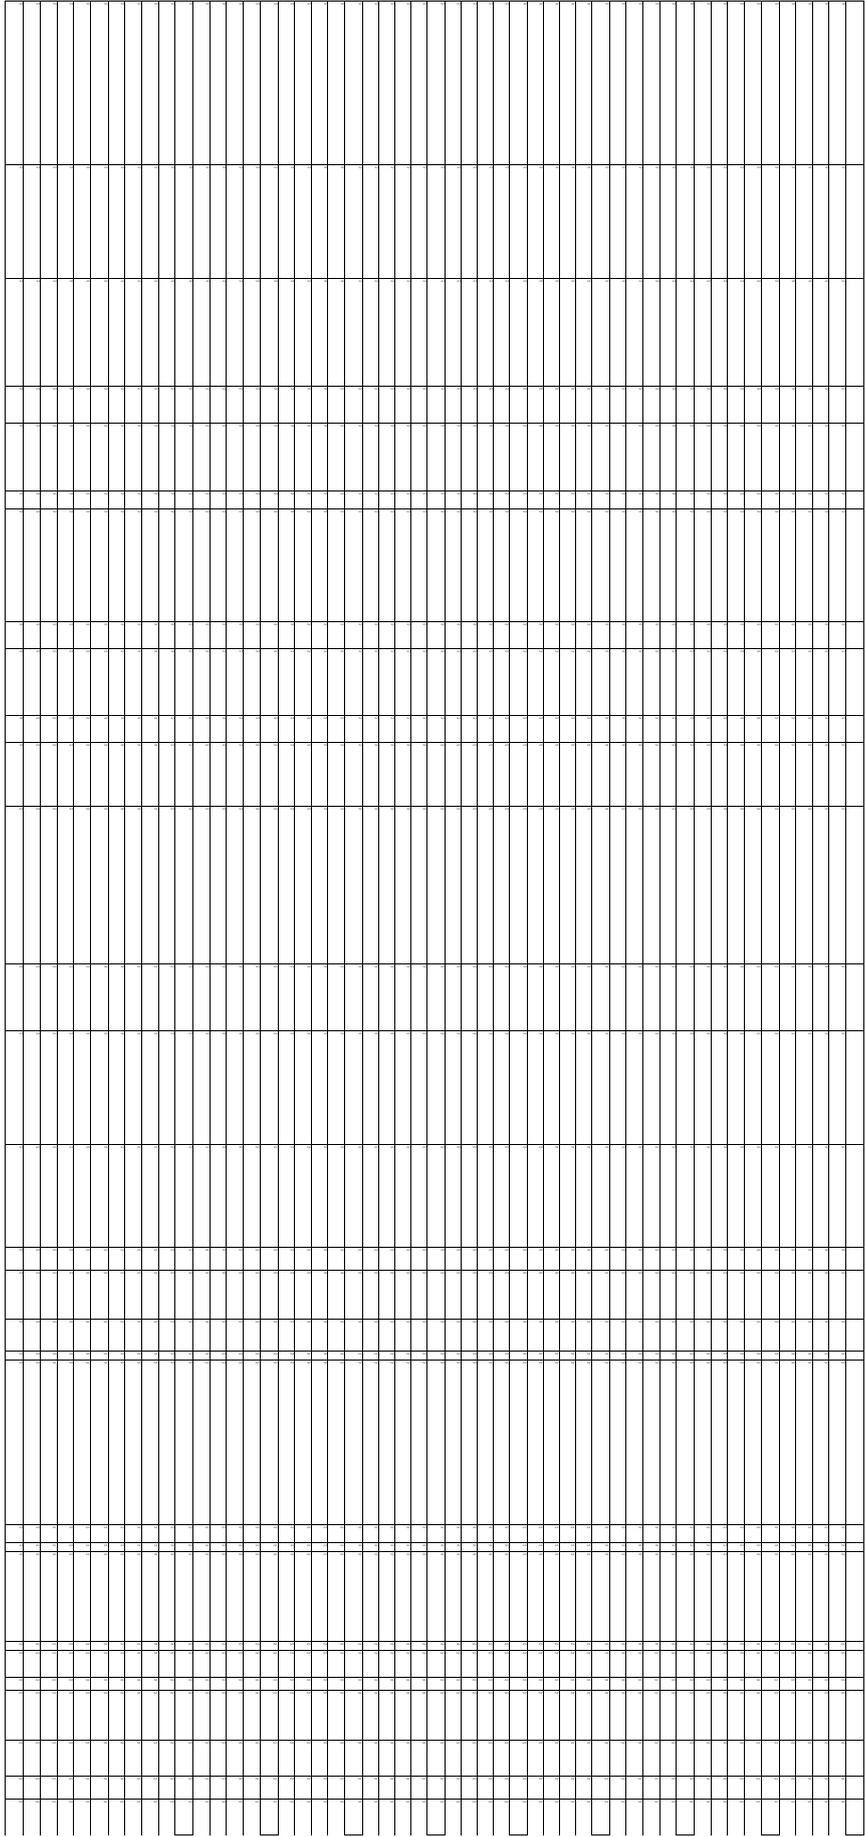

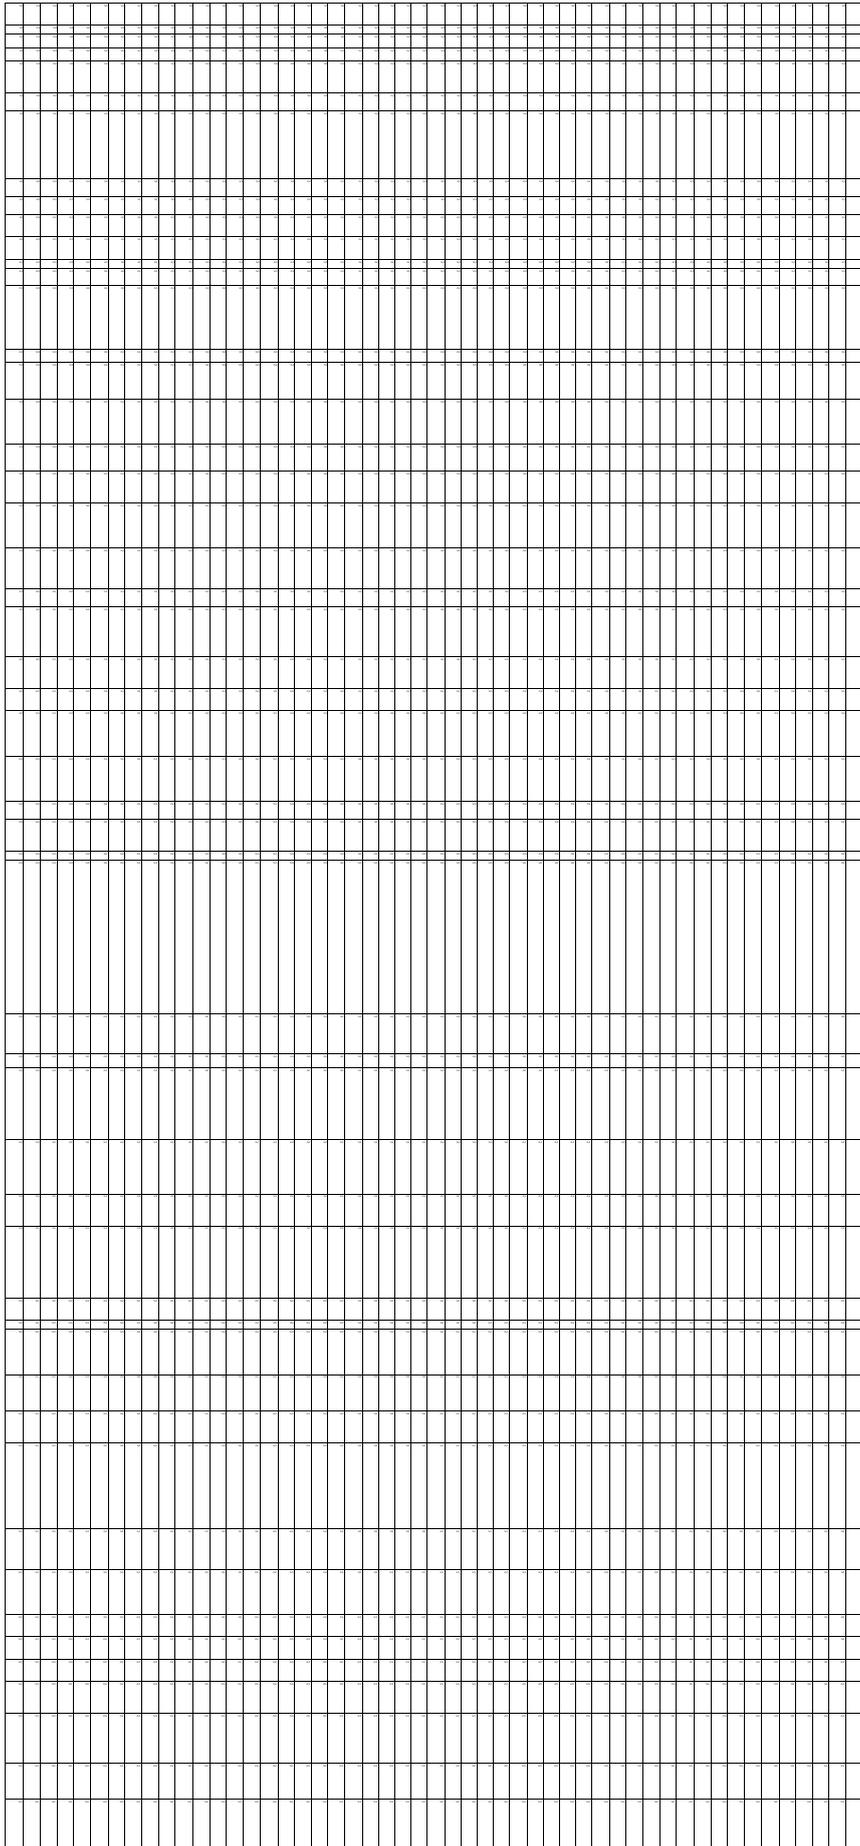

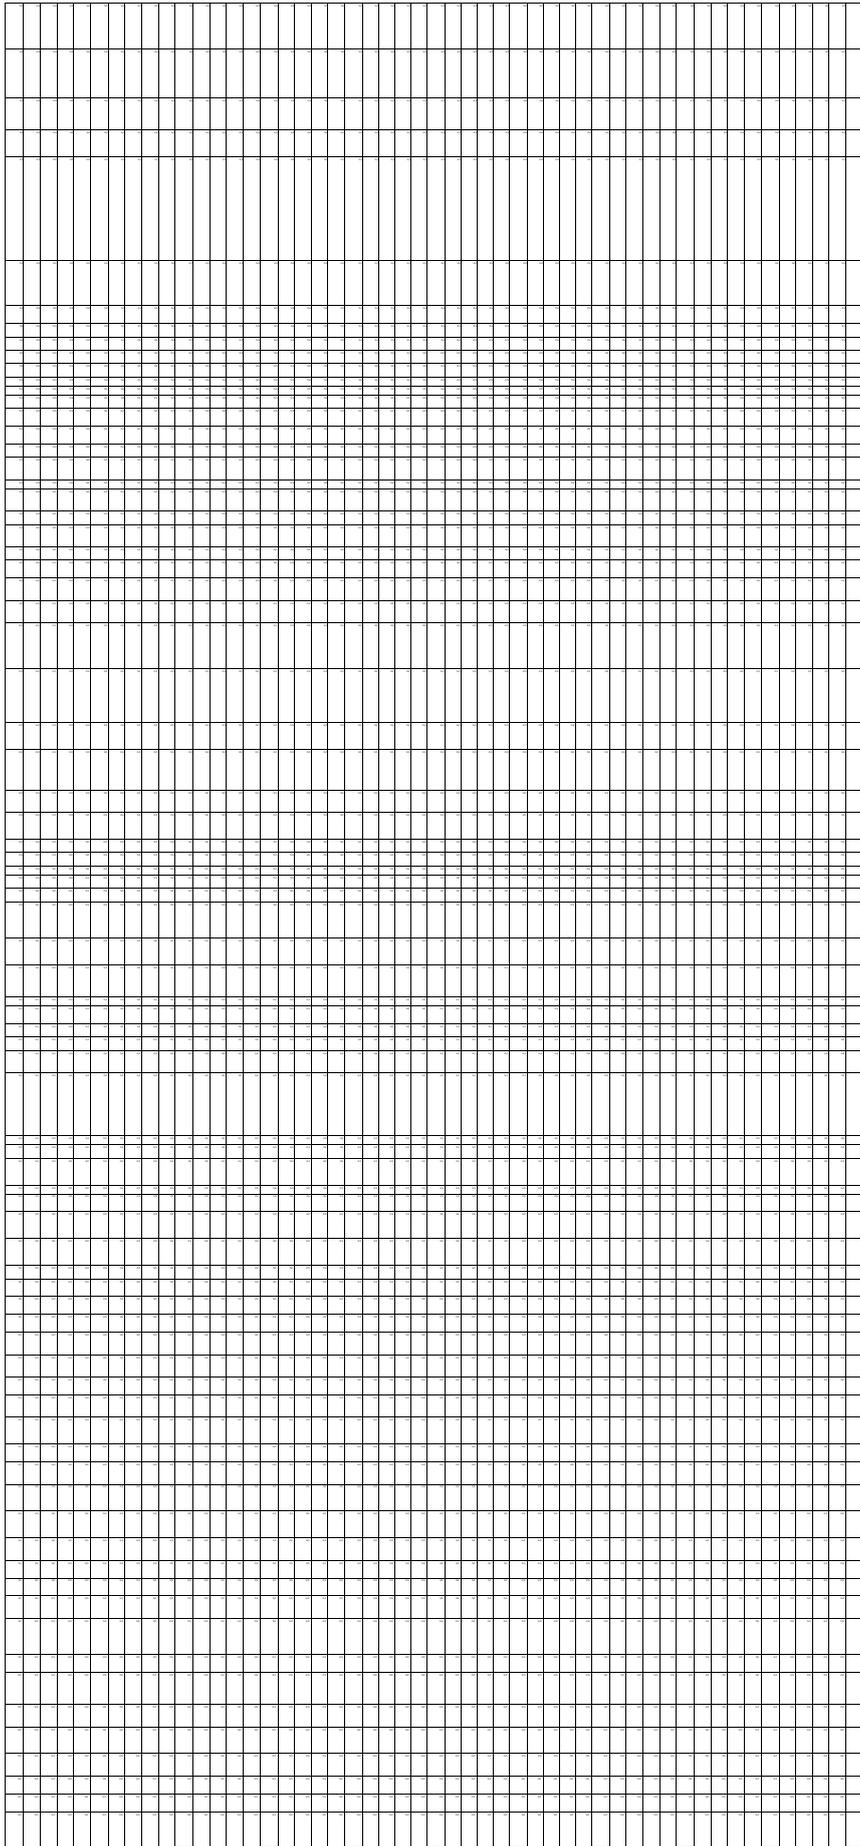

The image shows a sheet of graph paper with a grid of small squares. A central portion of the grid is filled with vertical lines, creating a series of narrow columns. This section is bounded by horizontal lines at approximately the top and bottom of the page. The rest of the page is a standard grid of squares.

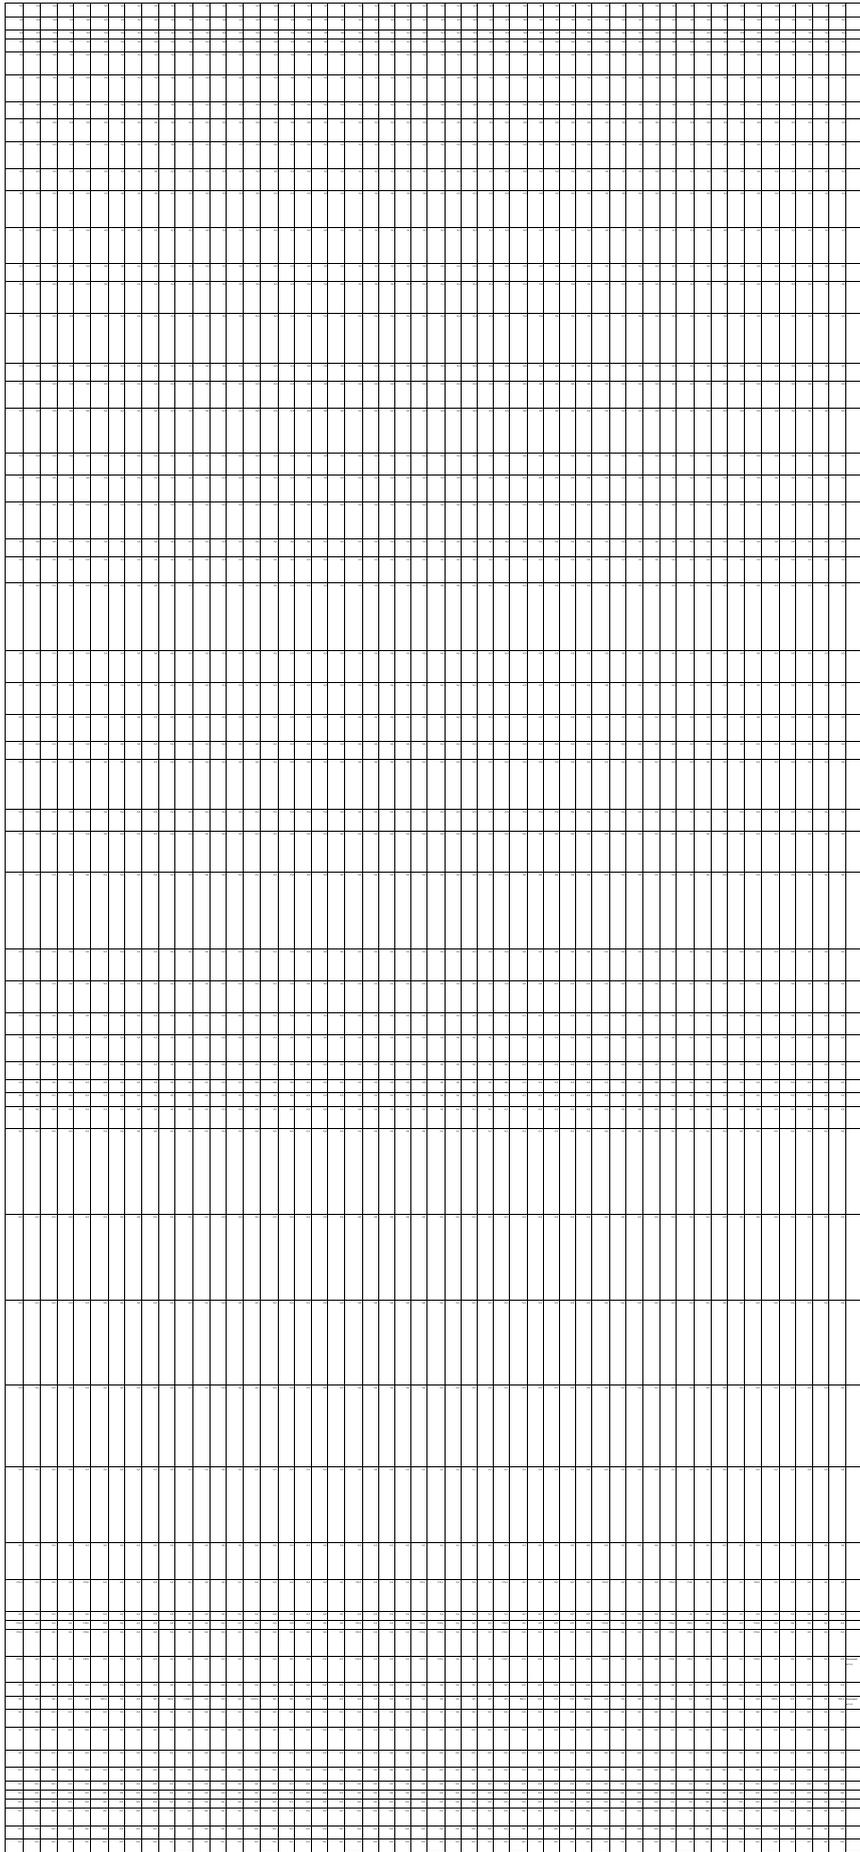

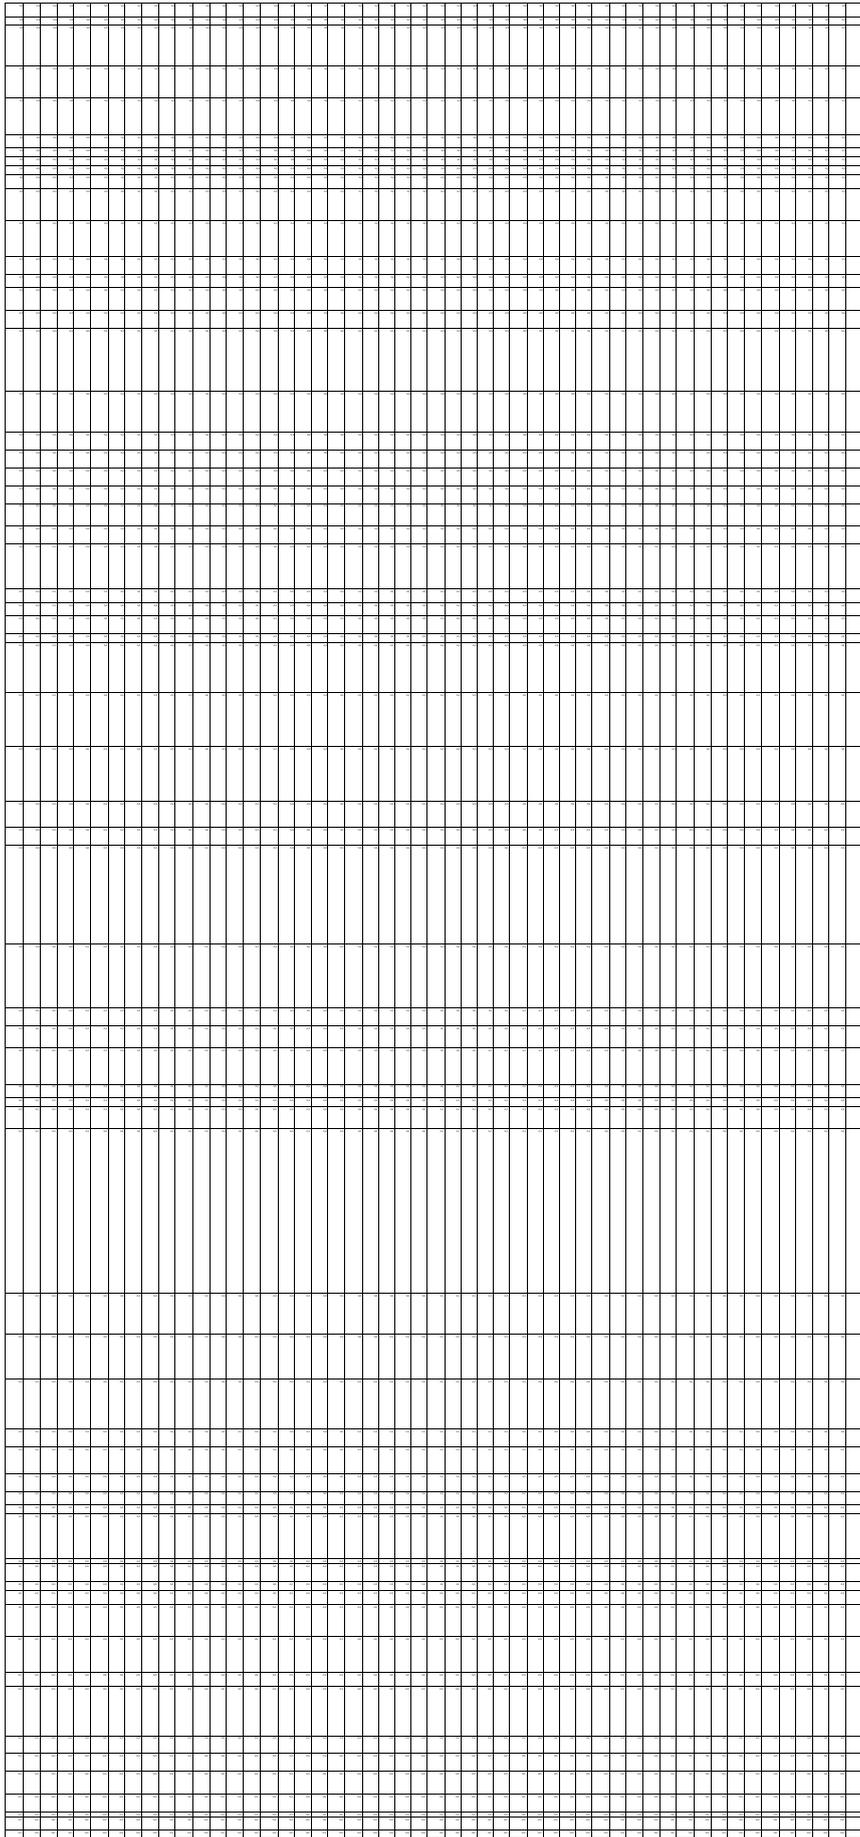

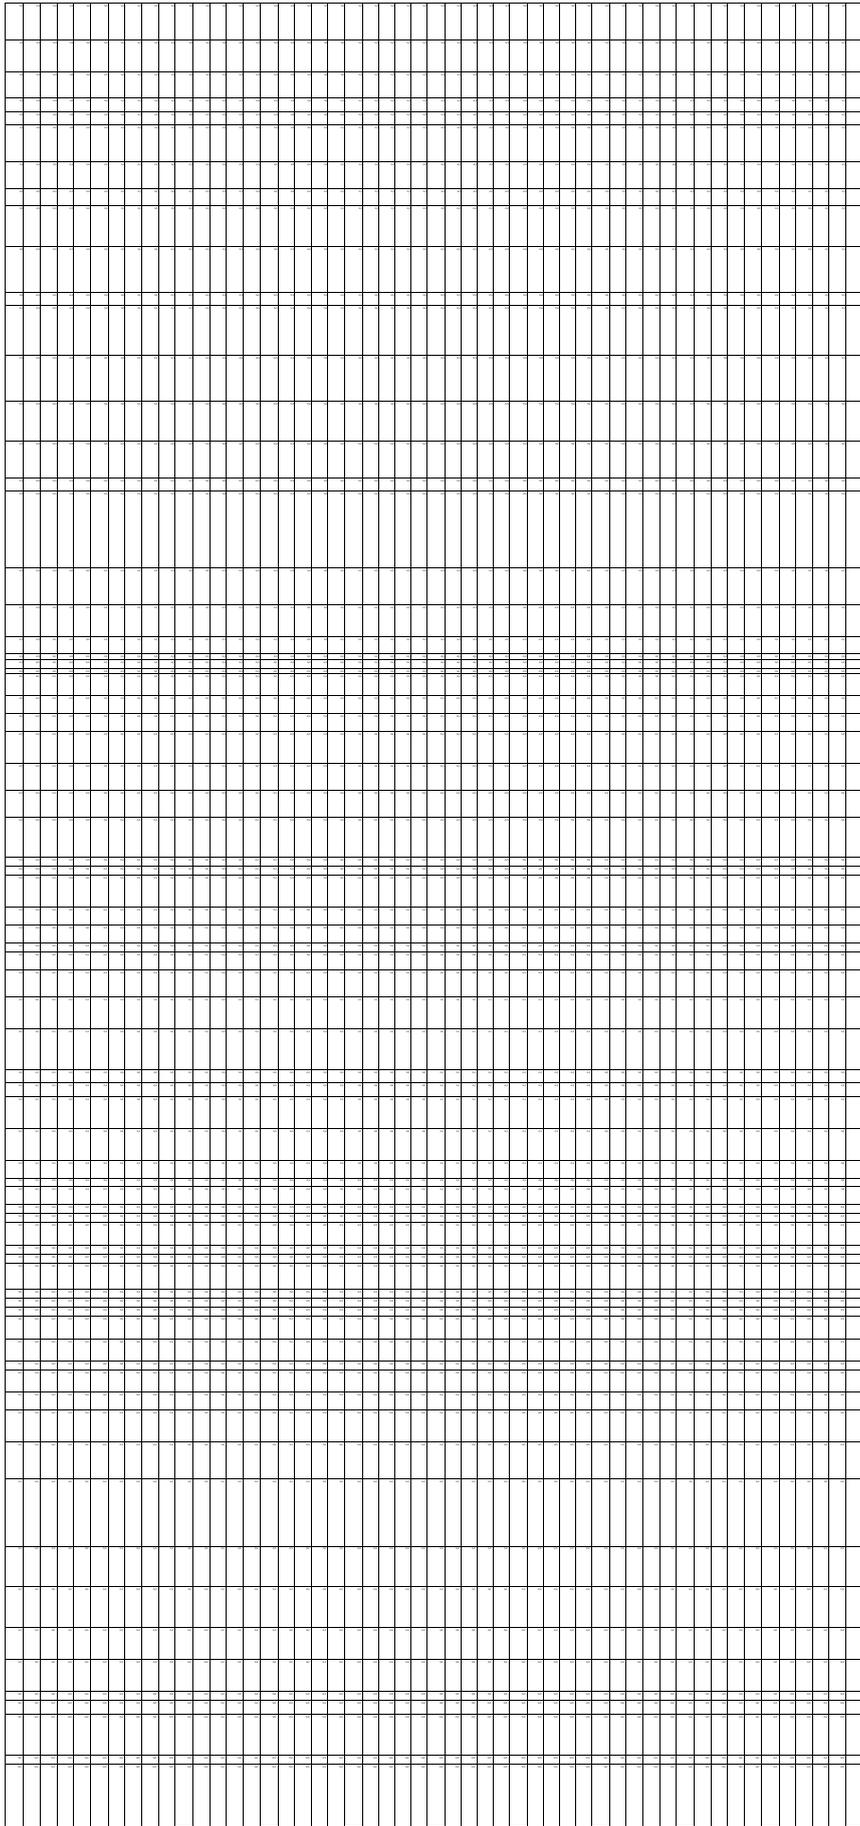

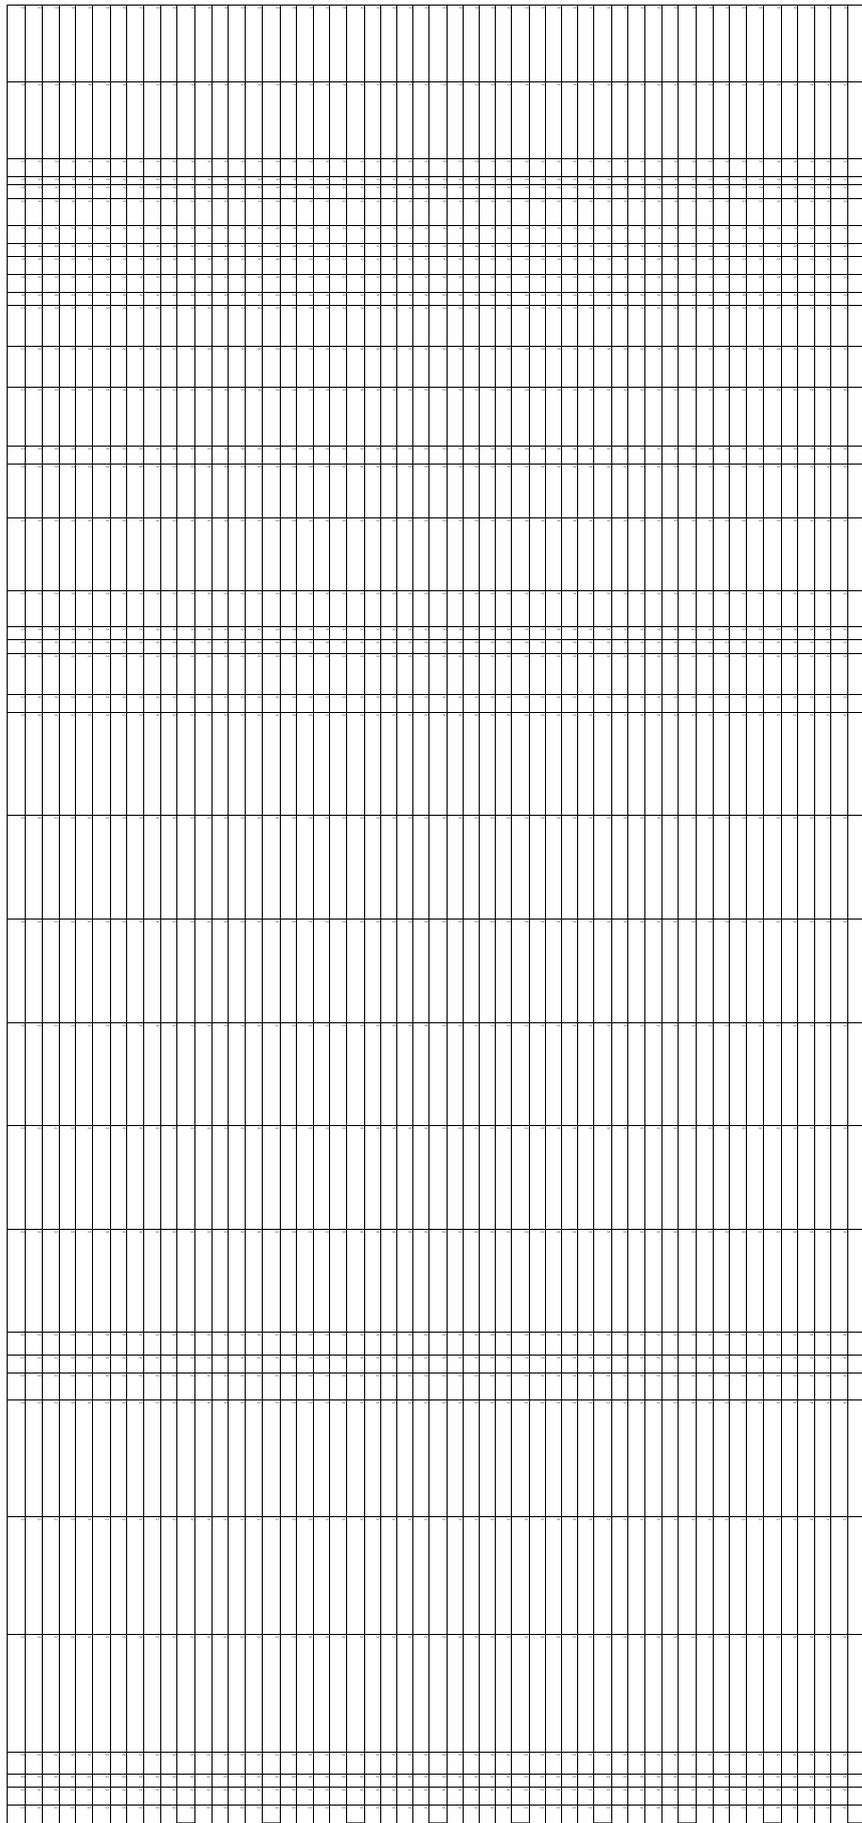

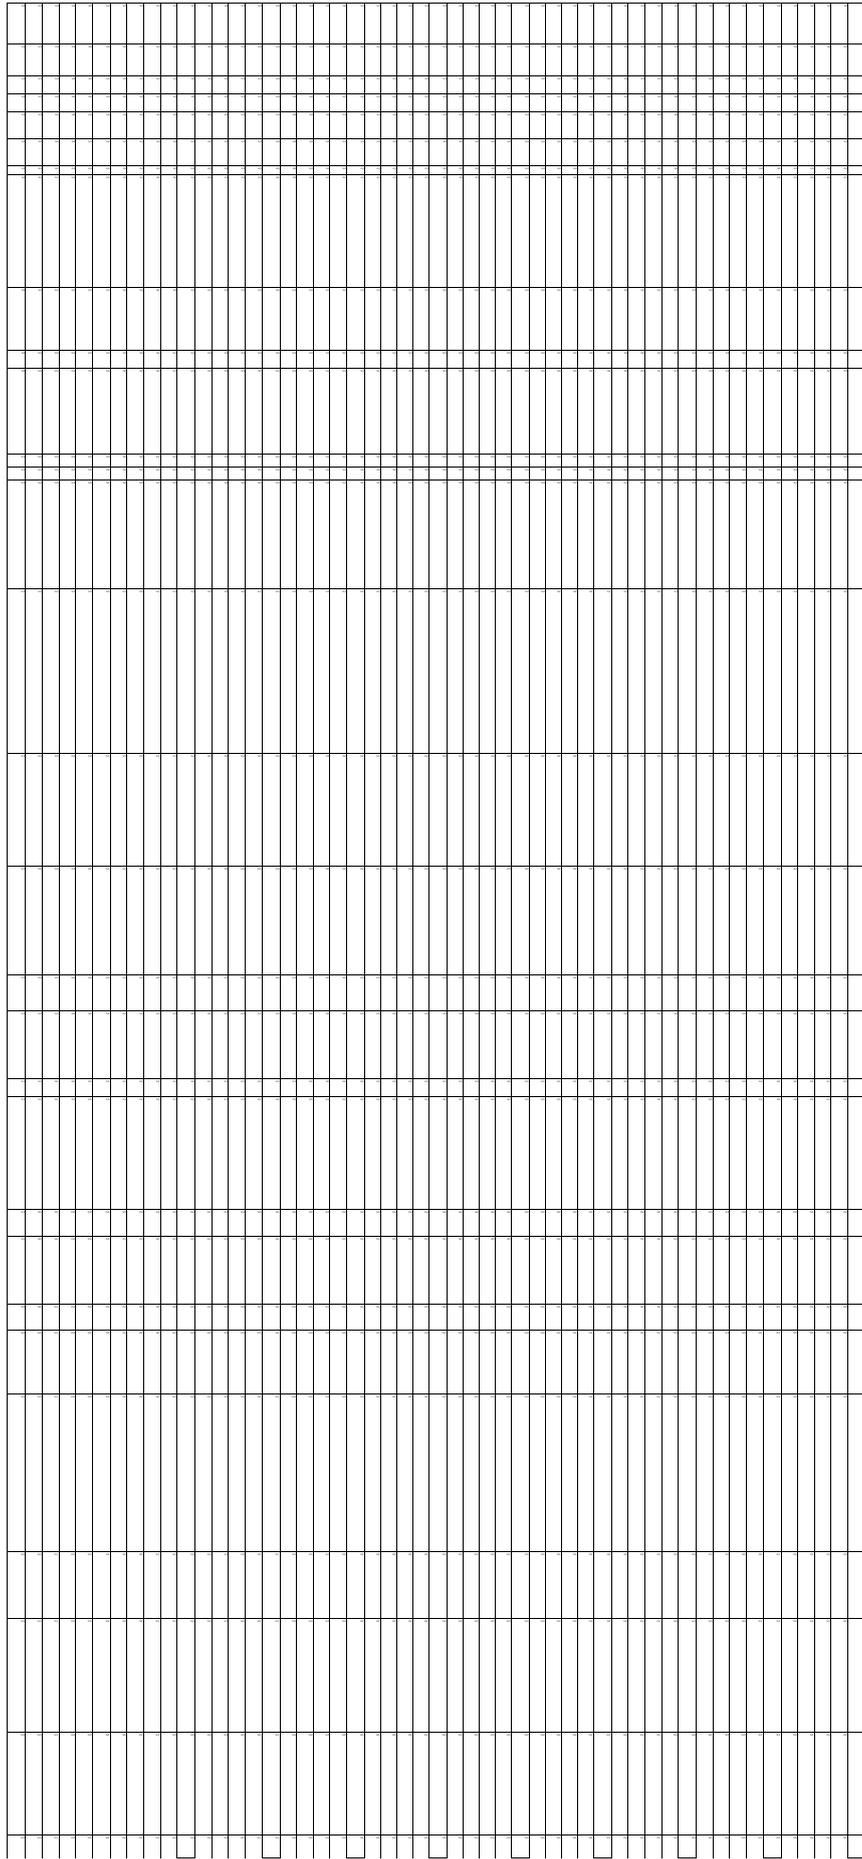

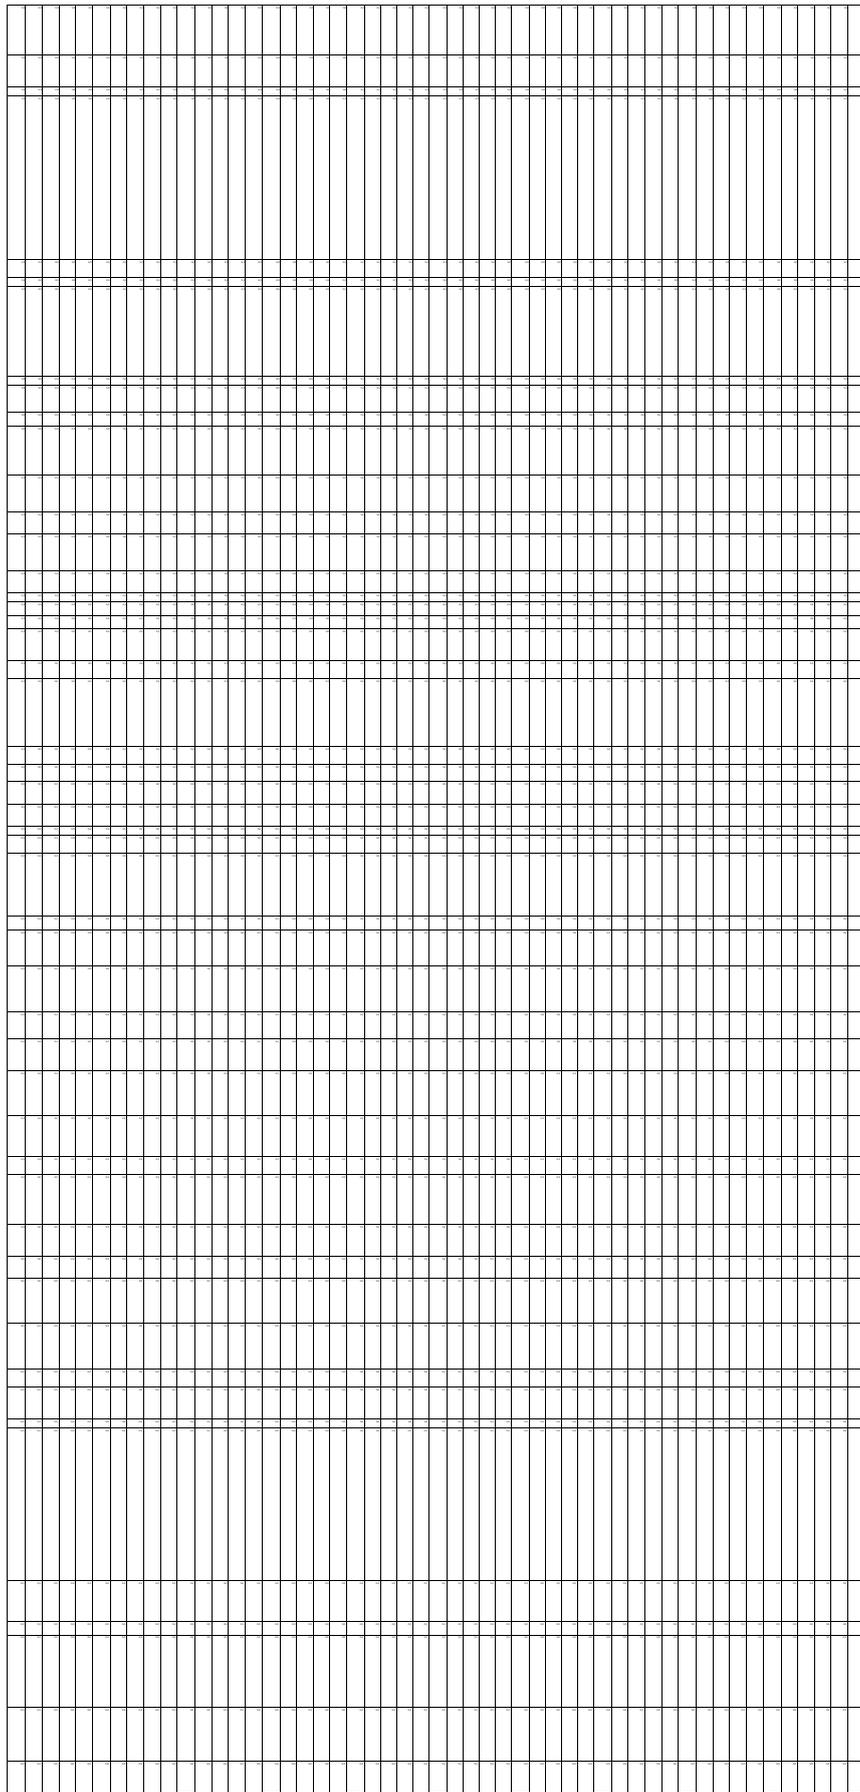

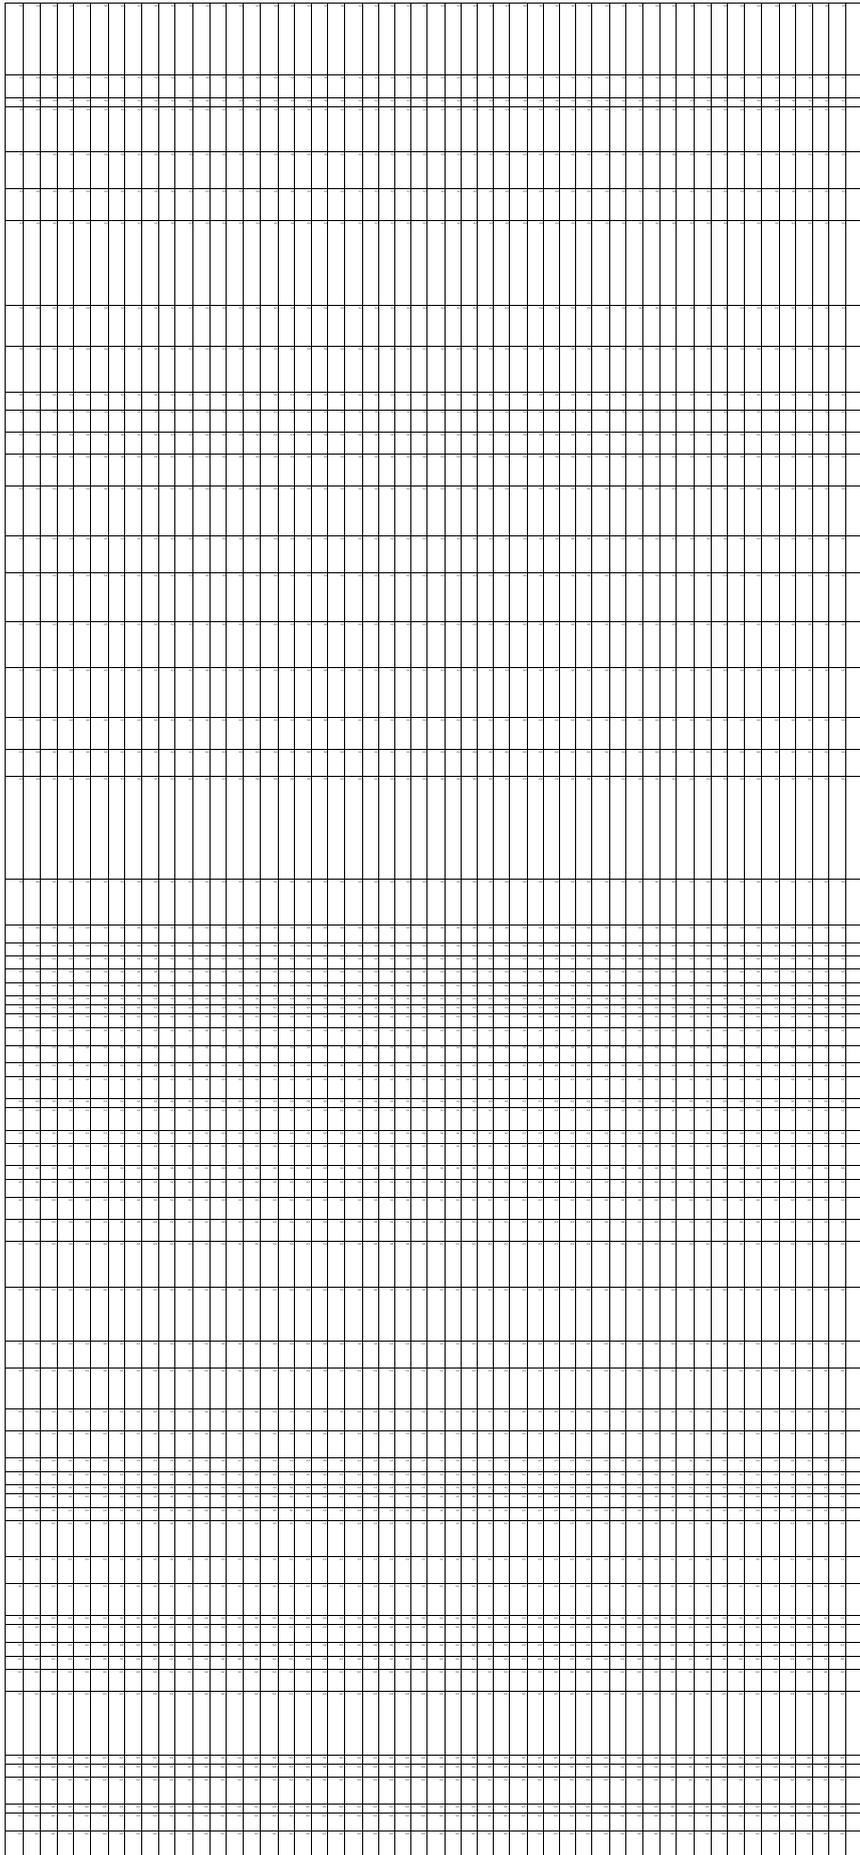

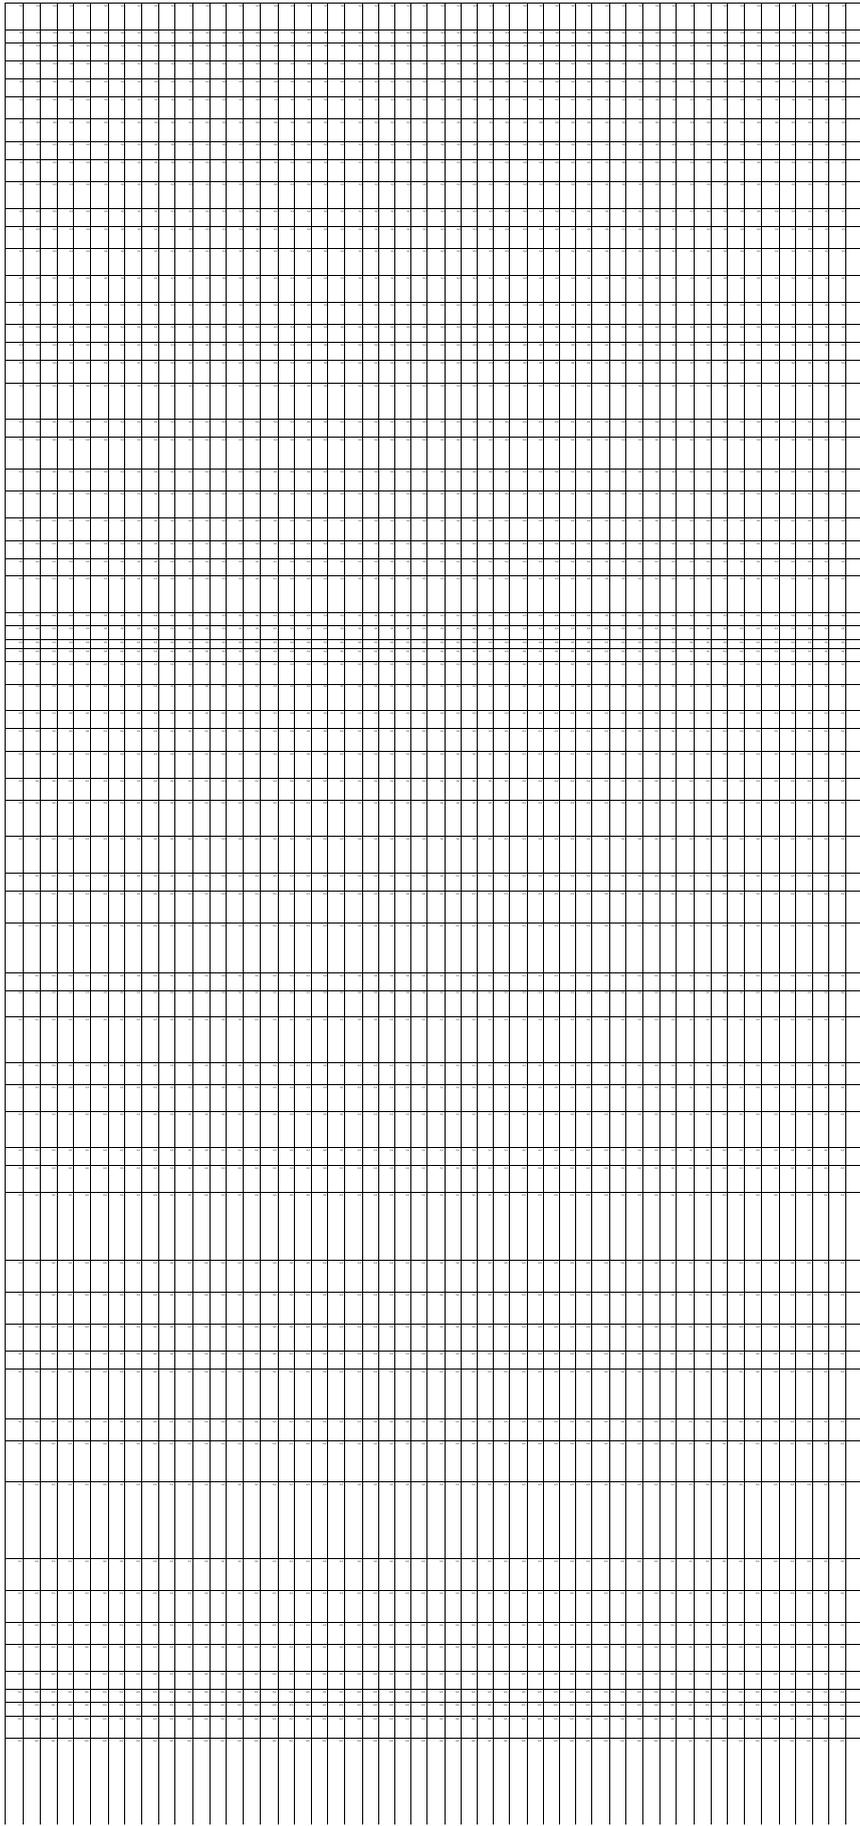

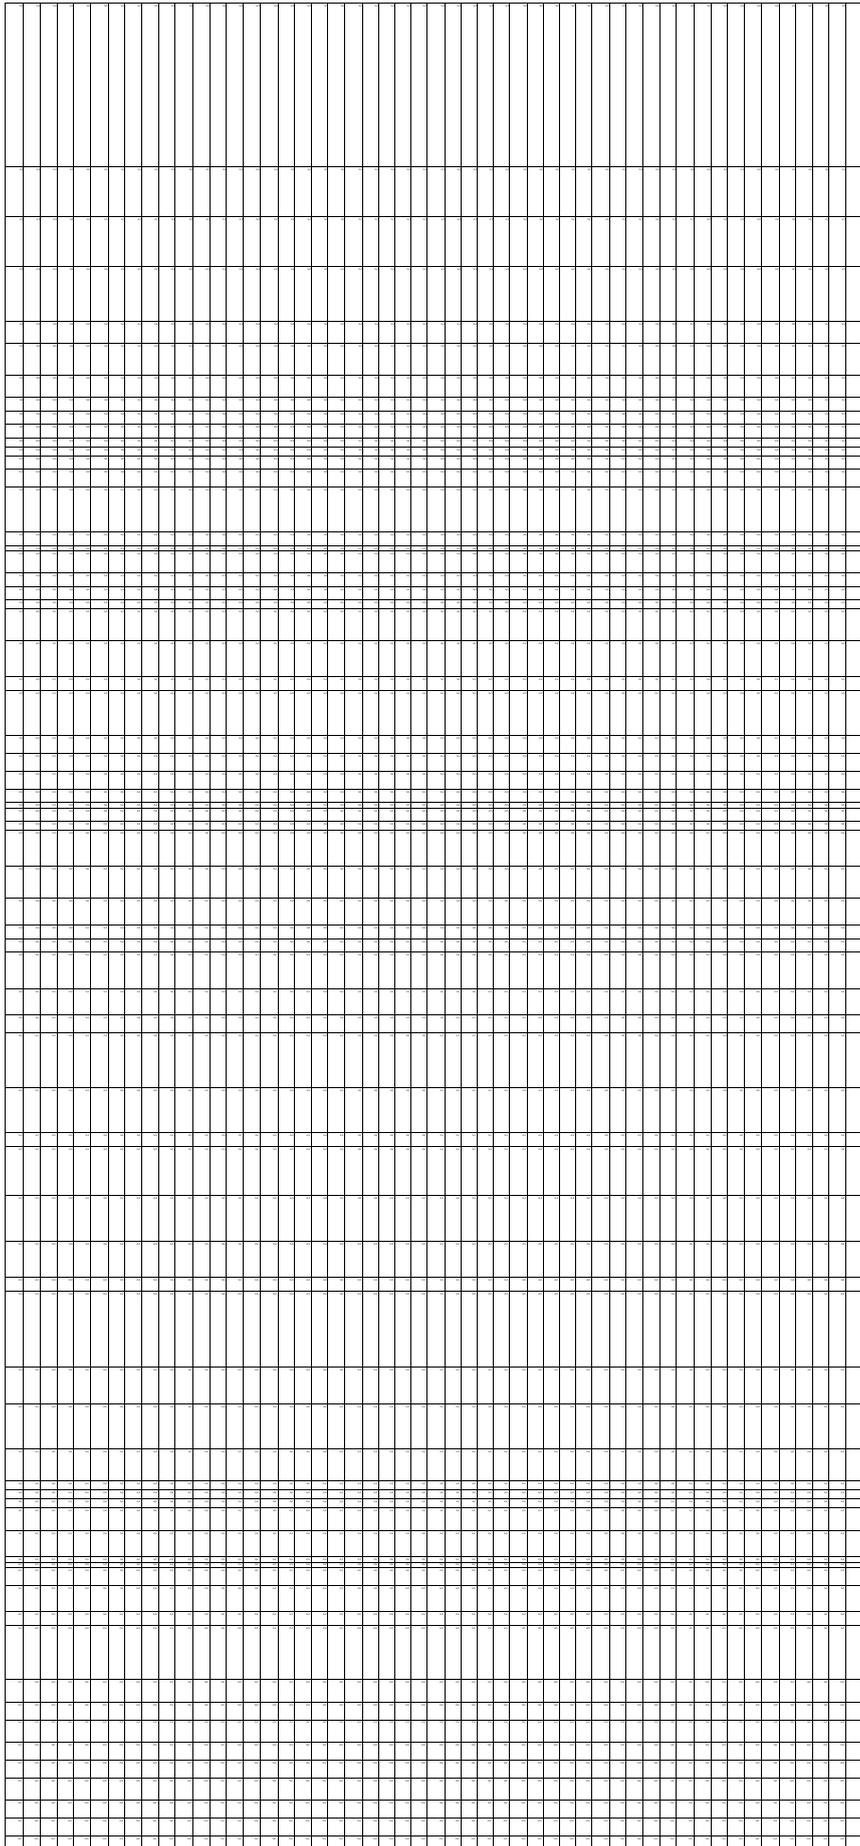

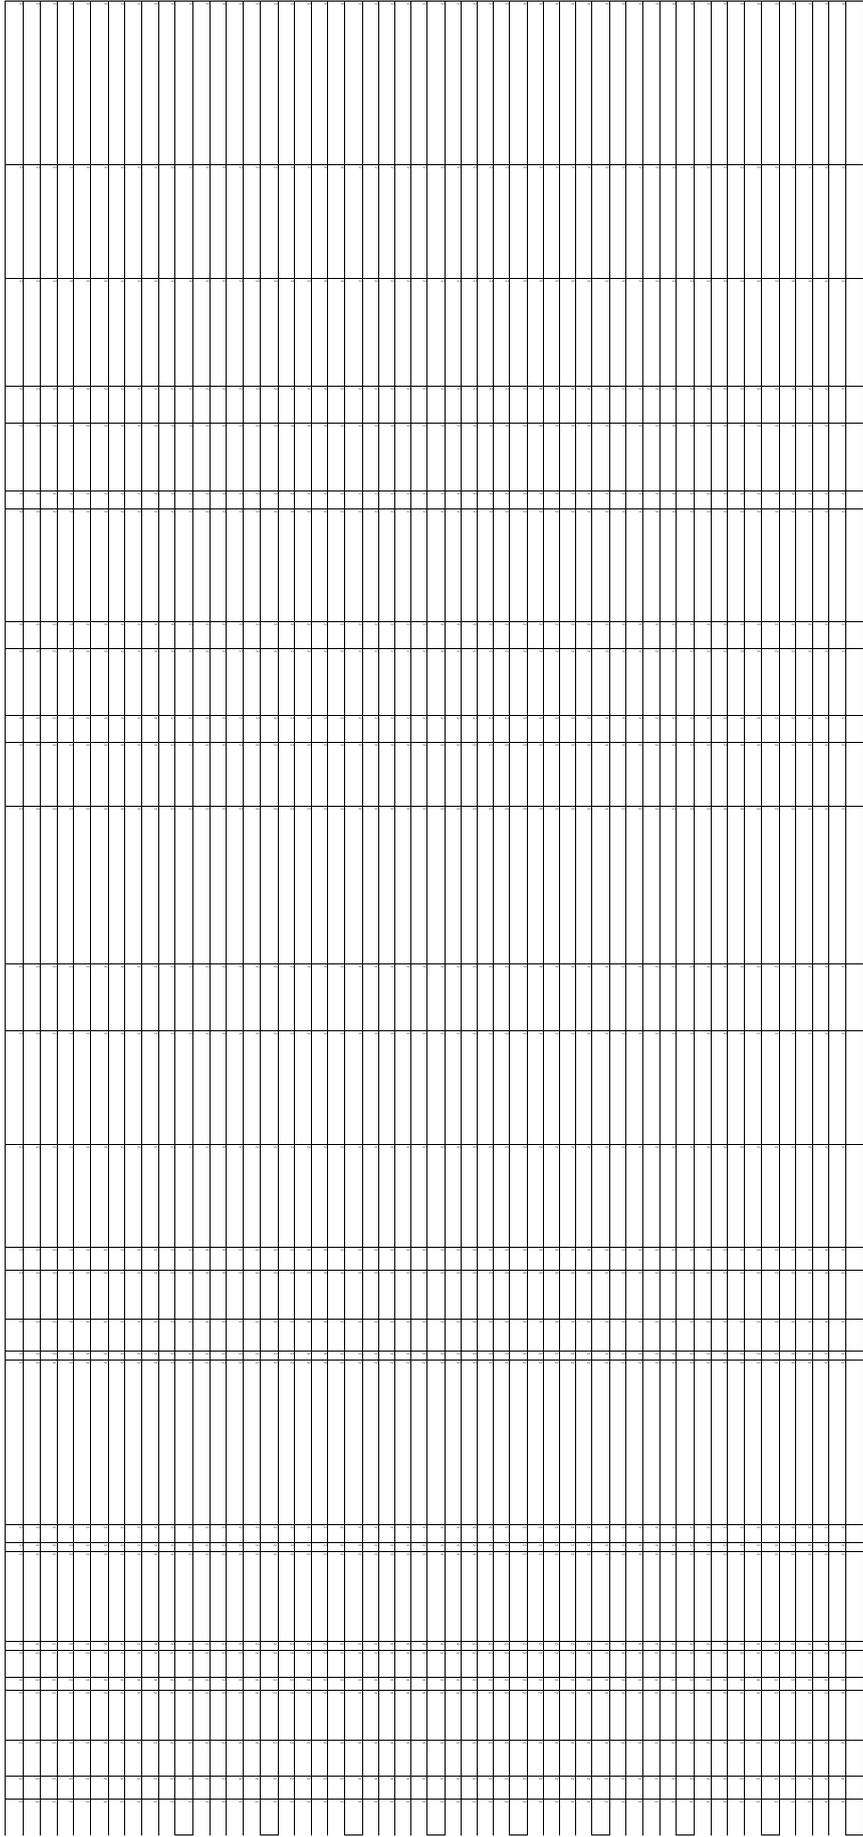

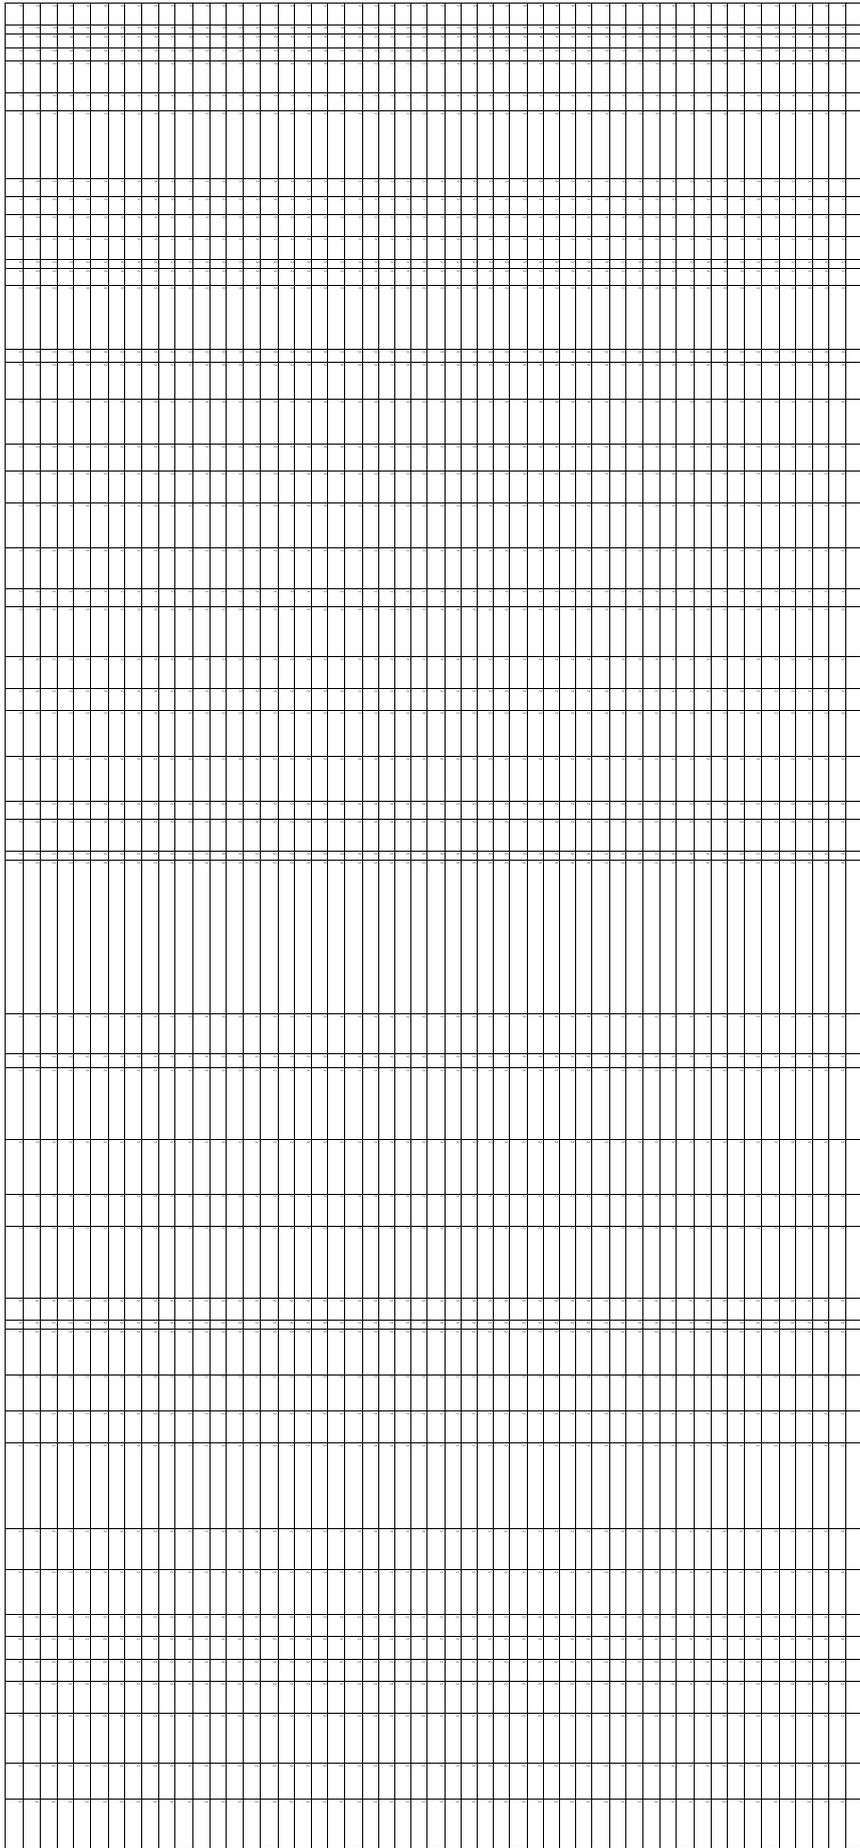

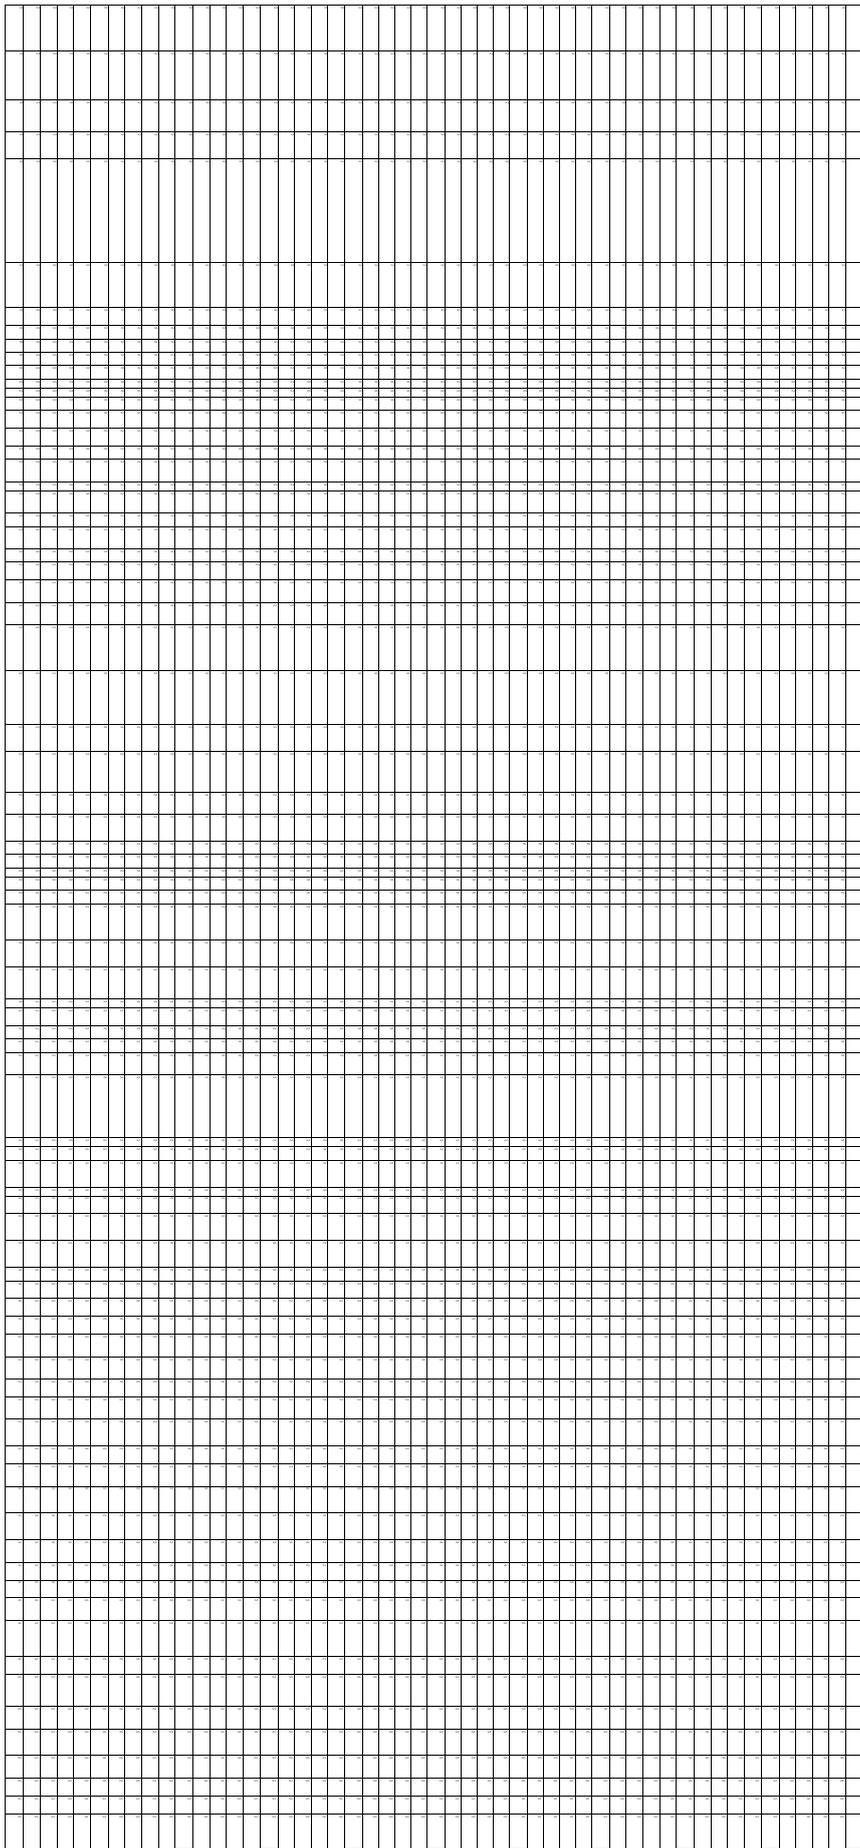

The image shows a sheet of graph paper with a grid of small squares. At the top, there is a header section consisting of several rows of larger, empty rectangular boxes, likely for writing a title or student information. The rest of the page is filled with a standard grid of small squares. The grid is approximately 20 columns wide and 40 rows high, with the header section occupying the top 5 rows.

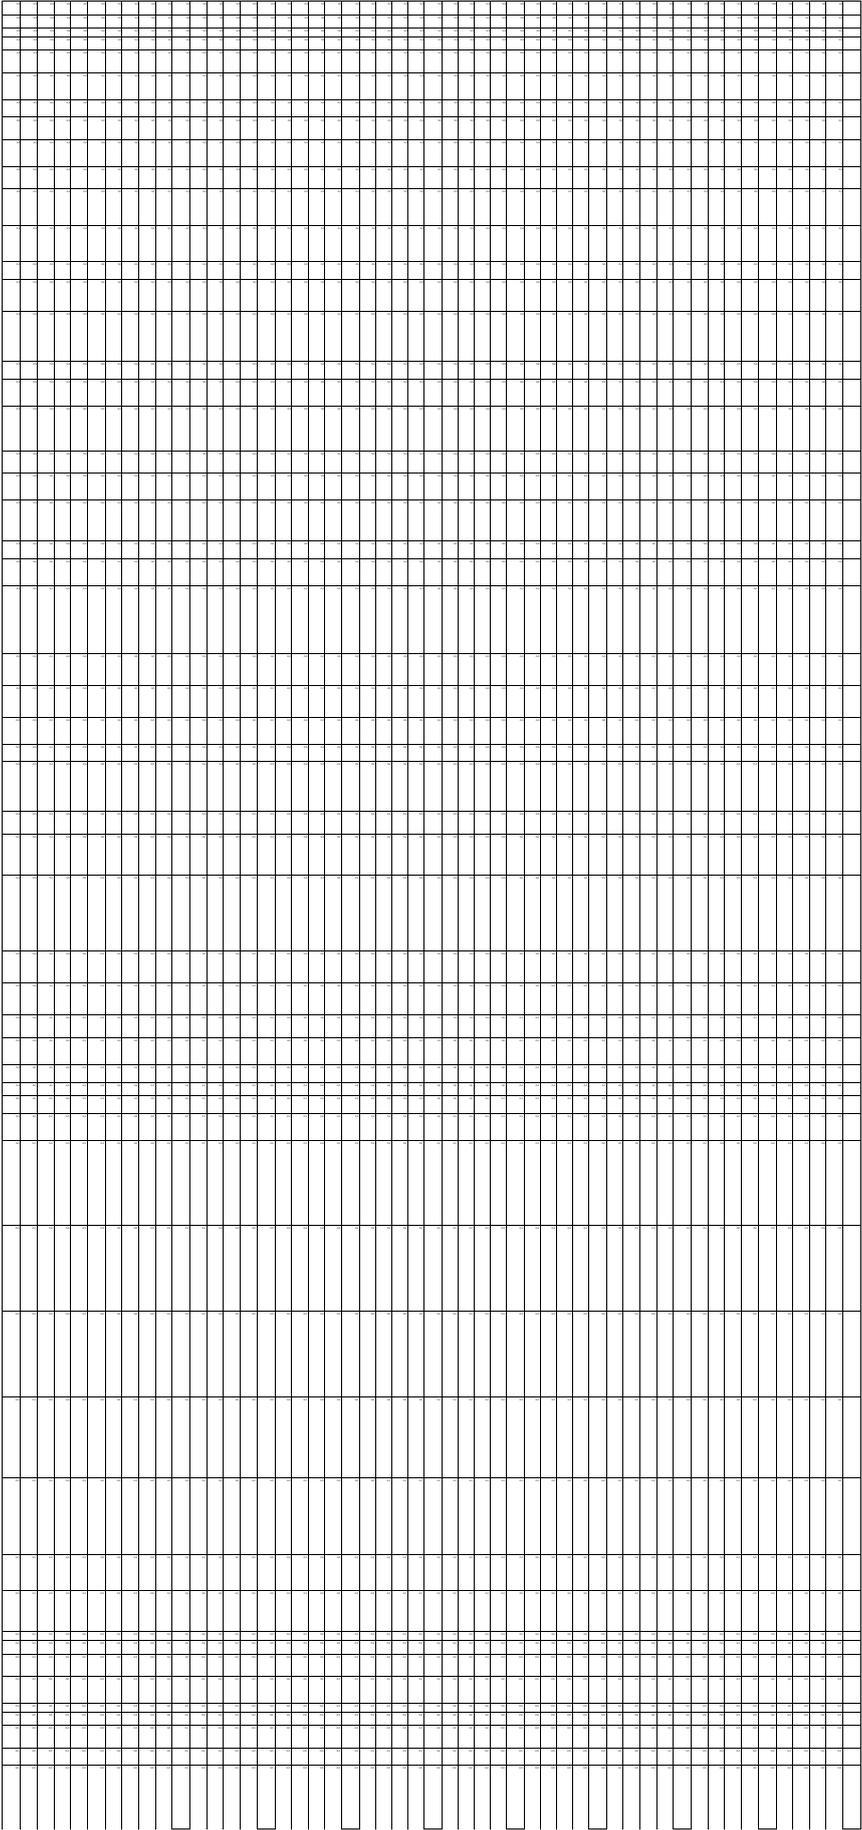

A large grid table with 20 columns and 40 rows. The grid is composed of thin black lines forming a uniform pattern of small squares. The table is empty, with no text or data entered in any of the cells. The grid occupies the central portion of the page, with margins on all sides.

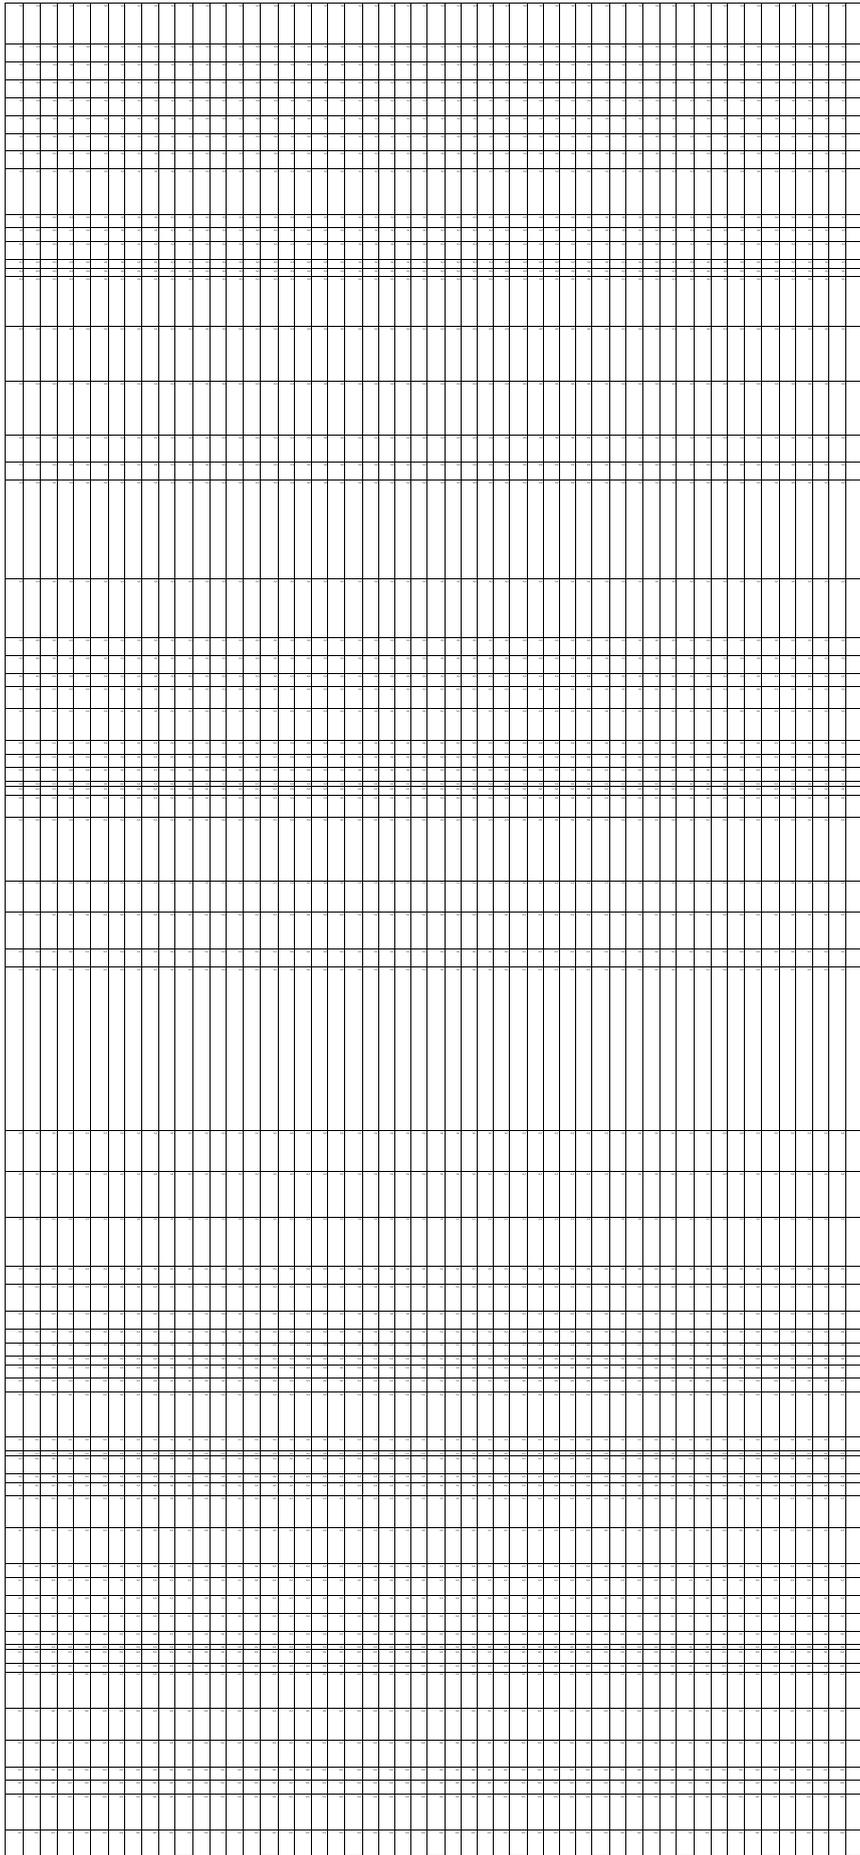

This image shows a large, empty grid of cells, resembling a ledger or notebook page. The grid is composed of many small, uniform rectangular cells. It is organized into approximately 30 columns and 45 rows. There are several distinct sections or bands: a top band with 7 rows, a middle band with 25 rows, and a bottom band with 3 rows. Each band is separated from the next by a pair of horizontal lines. The bottom-most row of the grid contains small, square-like marks at the end of each column, possibly indicating the start of a footer or a specific data entry point.

This image shows a large, empty grid of cells, resembling a spreadsheet or a data table. The grid is composed of approximately 20 columns and 30 rows of small, uniform cells. The grid is centered on the page and occupies most of the vertical space. The lines forming the grid are thin and black, creating a clear structure for data entry or analysis.
